Construction Offroad Calculations

Nothing for the user to do here.

This tab calculates fuel consumption from offroad equipment and schedule input in the USER INPUT tab

Fuel consumption calculated from OFFROAD based on fuel consumption divided by horsepower hours to generate an average for all epuipment output

Total = 244,979

OffRoad Equipment

EMFAC OUTPUT

Model Output: OFFROAD2021 (v1.0.3) Emissions Inventory
Region Type: Statewide
Region: California

Calendar Year: 2000, 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2009, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017, 2018, 2019, 2020, 2021, 2022, 2023, 2024, 2025, 2026, 2027, 2028, 2029, 2030, 2031, 2032, 2033, 2034, 2035, 2036, 2037, 2038, 2039, 2040, 2041, 2042, 2043, 2044, 2045, 2046, 2047, 2048, 2049, 2050
Scenario: All Adopted Rules - Exhaust
Vehicle Classification: OFFROAD2021 Equipment Types
Units: tons/day for Emissions, gallons/year for Fuel, hours/year for Activity, Horsepower-hours/year for Horsepower-hours

Model Output: OFFROAD2021 (v1.0.3) Emissions Inventory
Region Type: Statewide
Region: California
Calendar Year: 2000, 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2009, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017, 2018, 2019, 2020, 2021, 2022, 2023, 2024, 2025, 2026, 2027, 2028, 2029, 2030, 2031, 2032, 2033, 2034, 2035, 2036, 2037, 2038, 2039, 2040, 2041, 2042, 2043, 2044, 2045, 2046, 2047, 2048, 2049, 2050
Scenario: All Adopted Rules - Exhaust
Vehicle Classification: OFFROAD2021 Equipment Types
Units: tons/day for Emissions, gallons/year for Fuel, hours/year for Activity, Horsepower-hours/year for Horsepower-hours

APPENDIX C – NOISE MODELING OUTPUTS

Attenuation Calculations for Stationary Noise Sources

KEY: Orange cells are for input.
Grey cells are intermediate calculations performed by the model.
Green cells are data to present in a written analysis (output).

STEP 1: Identify the noise source and enter the reference noise level (dBA and distance).

STEP 2: Select the ground type (hard or soft), and enter the source and receiver heights.

STEP 3: Select the distance to the receiver.

Noise Source/ID	Reference Noise Level			Attenuation Characteristics				Attenuated Noise Level at Receptor		
	noise level (dBA)	@	distance (ft)	Ground Type (soft/hard)	Source Height (ft)	Receiver Height (ft)	Ground Factor	noise level (dBA)	@	distance (ft)
HVAC leq (day)	70.0	@	50	hard	6	5	0.00	60.1	@	157
HVAC Leq (night)	70.0	@	50	hard	6	5	0.00	55.1	@	279

Notes:

Estimates of attenuated noise levels do not account for reductions from intervening barriers, including walls, trees, vegetation, or structures of any type.

Computation of the attenuated noise level is based on the equation presented on pg. 176 and 177 of FTA 2018.

Computation of the ground factor is based on the equation presentd in Table 4-26 on pg. 86 of FTA 2018, where the distance of the reference noise leve can be adjusted and the usage factor is not applied (i.e., the usage factor is equal to 1).

FHWA Roadway Construction Noise Model, January 2006. Table 9.1
U.S. Department of Transportation
CA/T Construction Spec. 721.560

Distance Propagation Calculations for Stationary Sources of Ground Vibration

KEY: Orange cells are for input.

Grey cells are intermediate calculations performed by the model.

Green cells are data to present in a written analysis (output).

STEP 1: Determine units in which to perform calculation.

— If vibration decibels (VdB), then use Table A and proceed to Steps 2A and 3A.

— If peak particle velocity (PPV), then use Table B and proceed to Steps 2B and 3B.

STEP 2A: Identify the vibration source and enter the reference vibration level (VdB) and distance.

STEP 3A: Select the distance to the receiver.

Table A. Propagation of vibration decibels (VdB) with distance

Noise Source/ID	Reference Noise Level			Attenuated Noise Level at Receptor		
	vibration level (VdB)	@	distance (ft)	vibration level (VdB)	@	distance (ft)
Impact pile driver	112	@	25	65.0	@	925
Vibratory Roller	94	@	25	74.9	@	108

The Lv metric (VdB) is used to assess the likelihood for vibration to result in human annoyance.

STEP 2B: Identify the vibration source and enter the reference peak particle velocity (PPV) and distance.

STEP 3B: Select the distance to the receiver.

Table B. Propagation of peak particle velocity (PPV) with distance

Noise Source/ID	Reference Noise Level			Attenuated Noise Level at Receptor		
	vibration level (PPV)	@	distance (ft)	vibration level (PPV)	@	distance (ft)
Impact pile driver	1.518	@	25	0.199	@	97
Vibratory Roller	0.210	@	25	0.198	@	26
Impact pile driver	1.518	@	25	0.079	@	180
Vibratory Roller	0.210	@	25	0.079	@	48

The PPV metric (in/sec) is used for assessing the likelihood for the potential of structural damage.

Notes:

Computation of propagated vibration levels is based on the equations presented on pg. 185 of FTA 2018. Estimates of attenuated vibration levels do not account for reductions from intervening underground barriers or other underground structures of any type, or changes in soil type.

RESOLUTION NO. XXXX-

Adopted by the Sacramento City Council

October 22, 2024

CERTIFYING THE ENVIRONMENTAL IMPACT REPORT AND ADOPTING THE MITIGATION MONITORING PROGRAM FOR THE STOCKTON BOULEVARD PLAN PROJECT

BACKGROUND

A. On October 10, 2024, the Planning and Design Commission conducted a public hearing on the Stockton Boulevard Plan, and considered and reviewed the EIR prepared for the project, for which notice was given pursuant Sacramento City Code Section 17.812.030(B)(1) (publication in the official newspaper of the city at least ten days prior to the hearing) and forwarded to the City Council a recommendation to approve the Stockton Boulevard Plan.

B. On October 22, 2024, the City Council conducted a public hearing on the Stockton Boulevard Plan, for which notice was given pursuant Sacramento City Code Section 17.812.030(B)(1) (publication in the official newspaper of the city at least ten days prior to the hearing) and received and considered evidence concerning the Stockton Boulevard Plan (Project).

BASED ON THE FACTS SET FORTH IN THE BACKGROUND, THE CITY COUNCIL RESOLVES AS FOLLOWS:

Section 1.

The City Council finds that the Environmental Impact Report for the Stockton Boulevard Plan (herein EIR), which consists of the Draft EIR and the Final EIR (Response to Comments) (collectively the "EIR") has been completed in accordance with the requirements of the California Environmental Quality Act (CEQA), the State CEQA Guidelines, and the Sacramento Local Environmental Procedures.

Section 2.

The City Council certifies that the EIR was prepared, published, circulated and reviewed in accordance with the requirements of CEQA, the State CEQA Guidelines and the Sacramento Local Environmental Procedures, and constitutes an adequate, accurate, objective and complete Final Environmental

Impact Report in full compliance with the requirements of CEQA, the State CEQA Guidelines, and the Sacramento Local Environmental Procedures.

Section 3.

The City Council certifies that the EIR has been presented to the City Council and that the City Council has reviewed the EIR and has considered the information contained in the EIR prior to acting on the Project, and that the EIR reflects the City Council's independent judgment and analysis.

Section 4.

Pursuant to CEQA Guidelines Sections 15091 and 15093, and in support of its approval of the Project, the City Council adopts the attached Findings of Fact and Statement of Overriding Considerations in support of approval of the Project as set forth in the attached Exhibit A of this Resolution.

Section 5.

Pursuant to CEQA section 21081.6 and CEQA Guidelines section 15091, and in support of its approval of the Project, the City Council adopts the Mitigation Monitoring Program to require all reasonably feasible mitigation measures be implemented by means of Project modifications other measures, as set forth in the Mitigation Monitoring Program as set forth in Exhibit B of this Resolution.

Section 6.

The City Council directs that, upon approval of the Project, the City's Environmental Planning Services shall file a notice of determination with the County Clerk of Sacramento County and with the State Office of Planning and Research, pursuant to the provisions of CEQA section 21152.

Section 7.

Pursuant to Guidelines section 15091(e), the documents and other materials that constitute the record of proceedings upon which the City Council has based its decision are located in and may be obtained from, the Office of the City Clerk at 915 I Street, Sacramento, California. The City Clerk is the custodian of records for all matters before the City Council.

Table of Contents:

Exhibit A – CEQA Findings of Fact and Statement of Overriding Considerations for the Stockton Boulevard Plan

Exhibit B – Mitigation Monitoring Program

CEQA Findings of Fact and Statement of Overriding Considerations for the Stockton Boulevard Plan Environmental Impact Report

1 STATEMENT OF FINDINGS

The City of Sacramento (City), as lead agency pursuant to the California Environmental Quality Act (CEQA), has prepared an Environmental Impact Report (EIR) for the Stockton Boulevard Plan (project) (State Clearinghouse [SCH] No. 2021070139). The EIR consists of the Draft EIR and Final EIR.

These findings, as well as the accompanying statement of overriding considerations in Section 2, have been prepared in accordance with CEQA (Public Resources Code [PRC], Section 21000 et seq.) and the State CEQA Guidelines (14 California Code of Regulations [CCR] Section 15000 et seq.).

1.1 DESCRIPTION OF PROJECT

The City is considering a Specific Plan and a Neighborhood Action Plan for an area of Sacramento southeast of downtown.

The Specific Plan provides a planning framework for making decisions about development and other activities within the Specific Plan Area. The 353-acre Specific Plan Area consists of properties along a 4.5-mile-long stretch of the Stockton Boulevard corridor, from Alhambra Boulevard to 65th Street. The Specific Plan includes land use regulations and policies designed to streamline the development process within the Specific Plan Area and that are consistent with the City of Sacramento's 2040 General Plan.

The Neighborhood Action Plan, which covers the Specific Plan Area and 23 surrounding residential neighborhoods (referred to as the Neighborhood Study Area), includes desired "Priority Actions." Priority Actions are measures, procedures, or programs that are consistent with the 2040 General Plan and may, but not necessarily will, be carried forward by the community, the City, or a combination of the two. The Neighborhood Action Plan acts as an information resource for future planning and decision making, but does not mandate any one action nor include any specific project commitments. Adoption of the Neighborhood Action Plan does not authorize development or any other improvements that would not otherwise be allowed within the Neighborhood Study Area. As a result, the Neighborhood Action Plan does not have the potential to result in physical environmental effects. Accordingly, the EIR focuses on the Specific Plan.

1.1.1 Project Objectives

In adopting the Stockton Boulevard Plan, the City seeks to achieve the following objectives.

- Accommodate growth that increases the long-term economic sustainability, equity and well-being, and protection of people living and working in the Specific Plan Area.
- Provide for the orderly and systematic integration of land uses within the Specific Plan Area.

- Facilitate new mixed-use development, reuse, and redevelopment within the Specific Plan Area.
- Promote new infill residential development and redevelopment within the Specific Plan Area that supports a mixed-income community and a variety of housing choices, including market-rate and affordable housing options for low-income, very low-income, and extremely low-income households.
- Promote neighborhood-serving uses, including a grocery store and venue(s) for afterschool programs and activities for area youth.
- Enhance public recreation, use, and open space access in the Specific Plan Area.
- Enhance the Stockton Boulevard corridor as a future gateway and bridge connection between the City of Sacramento and unincorporated areas of Sacramento County to the south of the Specific Plan Area.
- Balance new investments with proactive protection and healing of the community, especially for residents and business owners that are black, indigenous, and people of color.
- Enhance the pedestrian and bicyclist environment along the corridor with safe routes to schools, parks, businesses, and other landmarks.
- Support and promote local businesses in the Specific Plan Area.
- Protect, celebrate, and enhance the cultural and ethnic diversity, art, and community-centered character of the Stockton Boulevard corridor and its surrounding neighborhoods.

1.2 PROCEDURAL FINDINGS

The City Council of the City of Sacramento finds the Draft EIR for the Stockton Boulevard Plan (SCH No. 2021070139) was prepared, noticed, published, circulated, reviewed, and completed in compliance with the CEQA (PRC Section 21000 et seq.), the State CEQA Guidelines (14 CCR Section 15000 et seq.), and the City of Sacramento environmental guidelines, as follows:

- A Notice of Preparation (NOP) of the Draft EIR was filed with the Governor's Office of Planning and Research (OPR) and each responsible and trustee agency and was circulated for public comments from July 8, 2021, to Augst 9, 2021.
- A web-based public scoping meeting was held on July 20, 2021, to request the public's input on the scope and content of the environmental information that should be addressed in the Draft EIR.
- A Notice of Completion (NOC) and copies of the Draft EIR were distributed to the OPR on June 21, 2024, and to those public agencies that have jurisdiction by law with respect to the Stockton Boulevard Plan, or which exercise authority over resources that may be affected by the Stockton Boulevard Plan, and to other interested parties and agencies, as required by law.
- An official 45-day public review and comment period for the Draft EIR was established by the OPR. The official OPR public comment period was from June 21, 2024, to August 7, 2024.
- A Notice of Availability (NOA) of the Draft EIR was mailed on June 19, 2024, to all interested groups, organizations, and individuals who had previously requested notice in writing. Additionally, the NOA was emailed to interested parties and agencies on June 21, 2024. The NOA stated that the City of Sacramento had completed the Draft EIR and that copies were available at the City of Sacramento, Community Development Department, 300 Richards

Boulevard, Third Floor, Sacramento, California, 95811, and on the City's website. An electronic copy of the Draft EIR was available for review at the downtown Central Library. The letter also indicated that the official 45-day public review period for the Draft EIR would end on August 7, 2024 and that the Draft EIR was available for public review and comment.

- A public notice was placed in the City's official newspaper of general circulation (Sacramento Bulletin) on June 21, 2024, which stated that the Draft EIR was available for public review and comment.
- A public notice was posted in the office of the Sacramento County Clerk on June 21, 2024, which stated that the Draft EIR was available for public review and comment.
- The NOA and Draft EIR were posted on the City's website at https://www.cityofsacramento.gov/community-development/planning/environmental/impact-reports.
- Following closure of the public comment period, all comments received on the Draft EIR during the comment period, the City's written responses to those comments, corrections to the Draft EIR, the Draft EIR, and additional information required by CEQA were used to produce the Final EIR. The Final EIR also includes the Draft EIR.
- The Final EIR was made available for public review and posted on the City's website at https://www.cityofsacramento.gov/community-development/planning/environmental/impact-reports on September 20, 2024.
- On September 19, 2024, the City mailed via certified mail all federal and state agencies that provided comments on the Draft EIR the agency's comment letter with the City's proposed response to that comment letter. On September 20, 2024, an email was sent to the same agencies that provided comments on the Draft EIR that included their comments and responses along with tentative hearing dates and location information.
- A written notice was published in the City's official newspaper of general circulation (Sacramento Bulletin) on September 30, 10 days prior to the October 10, 2024, Planning and Design Commission public hearing.
- The Planning and Design Commission held a public hearing on October 10, 2024, and recommended that City Council approve the Stockton Boulevard Plan and related documents.
- A written notice was published in the City's official newspaper of general circulation (Sacramento Bulletin) on October 12, 2024, 10 days prior to the October 22, 2024, City Council public hearing.

In certifying the Final EIR, the City Council finds that the Final EIR does not add significant new information to the Draft EIR that would require recirculation of the EIR under CEQA because the Final EIR contains no information revealing (1) any new significant environmental impact that would result from the Stockton Boulevard Plan or from a new or revised mitigation measure proposed to be implemented, (2) any substantial increase in the severity of a previously identified environmental impact, (3) any feasible project alternative or mitigation measures considerably different from others previously analyzed that would clearly lessen the environmental impacts of the Stockton Boulevard Plan but that was rejected by the City, or (4) that the Draft EIR was so fundamentally and basically inadequate and conclusory in nature that meaningful public review and comment were precluded. Any modifications are either environmentally benign or environmentally neutral, and thus represent the kinds of changes that commonly occur as the environmental review process works towards its

conclusion. The City Council hereby determines, based on the standards provided in section 15088.5 of the State CEQA Guidelines, that recirculation of the Draft EIR is not required

1.3 RECORD OF PROCEEDINGS

The contents of the record of proceedings shall be as set forth in subdivision (e) of PRC Section 21167.6. The following information is incorporated by reference and made part of the record supporting these findings:

- The proposed Stockton Boulevard Plan;
- Resolution No. 2024-XXX making Findings of Fact and adopting the Stockton Boulevard Plan;
- The Draft and Final EIR for the Stockton Boulevard Plan and all documents relied upon or incorporated by reference;
- Mitigation Monitoring Program for the Stockton Boulevard Plan;
- All public notices issued by the City in conjunction with the Stockton Boulevard Plan and EIR;
- Resolution No. 2024-XX certifying the EIR for and making Findings of Fact and Statement of Overriding Considerations in support of the adoption of the Stockton Boulevard Plan.
- The City of Sacramento 2040 General Plan adopted February 27, 2024;
- The Master EIR for the City of Sacramento 2040 General Plan certified on February 27, 2024;
- Findings of Fact and Statement of Overriding Considerations for the Adoption of the Sacramento 2040 General Plan adopted February 27, 2024;
- Planning and Development Code of the City of Sacramento, as amended as of the date of this Resolution;
- The Sacramento Area Council of Governments' (SACOG) Metropolitan Transportation Plan/Sustainability Communities Strategy (MTP/SCS), November 2019;
- All records of decision, staff reports, memoranda, maps, exhibits, letters, synopses of meetings, and other documents approved, reviewed, relied upon, or prepared by any City commissions, boards, officials, consultants, or staff relating to the Stockton Boulevard Plan; and
- Any other materials required by PRC Section 21167.6, or other applicable law, to be included in the record of proceedings.

1.4 FINDINGS OF FACT

CEQA requires that the lead agency adopt mitigation measures or alternatives, where feasible, to substantially lessen or avoid significant environmental impacts that would otherwise occur. Mitigation measures or alternatives are not required, however, where such changes are infeasible or where the responsibility for the project lies with some other agency. (State CEQA Guidelines, Section 15091, sub. (a), (b).)

With respect to a project for which significant impacts are not avoided or substantially lessened, a public agency, after adopting proper findings, may nevertheless approve the project if the agency first adopts a statement of overriding considerations setting forth the specific reasons why the agency found

that the project's "benefits" rendered "acceptable" its "unavoidable adverse environmental effects." (State CEQA Guidelines, Sections15093, 15043, sub. (b); see also PRC, Section 21081, sub. (b).)

In seeking to effectuate the substantive policy of CEQA to substantially lessen or avoid significant environmental effects to the extent feasible, an agency, in adopting findings, need not necessarily address the feasibility of *both* mitigation measures and environmentally superior alternatives when contemplating approval of a proposed project with significant impacts. Where a significant impact can be mitigated to an "acceptable" level solely by the adoption of feasible mitigation measures, the agency, in drafting its findings, has no obligation to consider the feasibility of any environmentally superior alternative that could also substantially lessen or avoid that same impact — even if the alternative would render the impact less severe than would the proposed project as mitigated. (*Laurel Hills Homeowners Association v. City Council* (1978) 83 Cal.App.3d 515, 521; *see also Kings County Farm Bureau v. City of Hanford* (1990) 221 Cal.App.3d 692, 730-731; and *Laurel Heights Improvement Association v. Regents of the University of California ("Laurel Heights I")* (1988) 47 Cal.3d 376, 400-403.)

In these Findings, the City first addresses the extent to which each significant environmental effect can be substantially lessened or avoided through the adoption of feasible mitigation measures. Only after determining that, even with the adoption of all feasible mitigation measures, an effect is significant and unavoidable, the City addresses the extent to which alternatives described in the EIR are (i) environmentally superior with respect to that effect and (ii) "feasible" within the meaning of CEQA.

In cases in which a project's significant effects cannot be mitigated or avoided, an agency, after adopting proper findings, may nevertheless approve the project if it first adopts a statement of overriding considerations setting forth the specific reasons why the agency found that the "benefits of the project outweigh the significant effects on the environment." (PRC, Section 21081, sub. (b); *see also,* State CEQA Guidelines, Sections 15093, 15043, sub.(b).) In the Statement of Overriding Considerations found at the end of these Findings, the City identifies the specific economic, social, and other considerations that, in its judgment, outweigh the significant environmental effects that the Stockton Boulevard Plan will cause.

The California Supreme Court has stated that "[t]he wisdom of approving ... any development project, a delicate task which requires a balancing of interests, is necessarily left to the sound discretion of the local officials and their constituents who are responsible for such decisions. The law as we interpret and apply it simply requires that those decisions be informed, and therefore balanced." (*Goleta II* (1990) 52 Cal.3d 553 at 576.)

In support of its approval of the Stockton Boulevard Plan, the City Council makes the following findings for each of the significant environmental effects and alternatives of the Stockton Boulevard Plan identified in the EIR pursuant to Sections 21080 and 15091 of the State CEQA Guidelines.

1.4.1 Impacts Found to be Less Than Significant and Thus Requiring No Mitigation

Under CEQA, no mitigation measures are required for impacts that are less than significant. (PRC, Section 21002; State CEQA Guidelines, Sections 15126.4, subd. (a)(3), 15091.) Based on substantial evidence in the whole record of this proceeding, the City Council finds that implementation of the Stockton Boulevard Plan will not result in any significant impacts in the following areas and that these impact areas, therefore, do not require mitigation.

AIR QUALITY

- Impact 3.1-1: Conflict with or Obstruction Implementation of an Applicable Air Quality Plan (Draft EIR pages 3.1-14 and 3.1-15)
- Impact 3.1-5: Create Objectionable Odors Affecting a Substantial Number of People (Draft EIR pages 3.1-21 and 3.1-22)

BIOLOGICAL RESOURCES

- Impact 3.2-2: Conflict with Any Local Policies or Ordinances Protecting Biological Resources, Such as a Tree Preservation Policy or Ordinance (Draft EIR pages 3.2-15 and 3.2-16)

CULTURAL RESOURCES

- Impact 3.3-3: Disturb Human Remains (Draft EIR pages 3.3-15 and 3.3-16)

ENERGY

- Impact 3.4-1: Wasteful, Inefficient, or Unnecessary Consumption of Energy, During Project Construction or Operation (Draft EIR pages 3.4-7 through 3.4-10)

HAZARDS AND HAZARDOUS MATERIALS

- Impact 3.6-3: Result in Significant Hazards to the Public or Environment due to Development on a site which is Included on a List of Hazardous Materials Sites (Draft EIR page 3.6-15)

PUBLIC SERVICES AND RECREATION

- Impact 3.8-1: Result in Substantial Adverse Physical Impacts Associated with the Provision of Fire Protection and Emergency Services (Draft EIR pages 3.8-9 and 3.8-10)
- Impact 3.8-2: Result in Substantial Adverse Physical Impacts Associated with the Provision of Police Protection (Draft EIR pages 3.8-10 and 3.8-11)
- Impact 3.8-3: Result in Substantial Adversely Physical Impacts Associated with the Provision of Schools (Draft EIR page 3.8-11)
- Impact 3.8-4: Result in Substantial Adverse Physical Impacts Associated with the Provision of Libraries (Draft EIR page 3.8-12)

TRANSPORTATION

- Impact 3.9-3: Impacts to Bicycle and Pedestrian Facilities or Access (Draft EIR page 3.9-23)
- Impact 3.9-4: Result in Geometric Design Features Inconsistent with Applicable Design Standards (Draft EIR page 3.9-24)

UTILITIES AND SERVICE SYSTEMS

- Impact 3.11-1: Require or Result in the Relocation or Construction of New or Expanded Water Infrastructure or Have Insufficient Water Supplies (Draft EIR pages 3.11-18 and 3.11-19)

- Impact 3.11-2: Require or Result in the Relocation or Construction of New or Expanded Wastewater Treatment and Stormwater Drainage Infrastructure (Draft EIR pages 3.11-19 through 3.11-21)
- Impact 3.11-3: Generate Solid Waste that Exceed the Capacity of Local Infrastructure and/or Reduction Goals (Draft EIR pages 3.11-21 and 3.11-22)
- Impact 3.11-4: Require Construction of New/Expanded Electricity, Natural Gas, and Telecommunication Services and Facilities (Draft EIR pages 3.11-22 and 3.11-23)

1.4.2 Significant or Potentially Significant Impacts Mitigated to a Less Than Significant Level

The following significant and potentially significant environmental impacts resulting from implementation of the Stockton Boulevard Plan, including cumulative impacts, will be mitigated to a less-than-significant level. Pursuant to Section 21081(a)(1) of CEQA and Section 15091(a)(1) of the State CEQA Guidelines, as to each such impact, the City Council, based on the evidence in the record before it, finds that changes or alterations incorporated into the Stockton Boulevard Plan by means of conditions or otherwise, mitigate, avoid or substantially lessen to a level of insignificance these significant or potentially significant environmental impacts of the Stockton Boulevard Plan. The basis for the Finding of Fact for each identified impact is set forth below.

AIR QUALITY

Impact 3.1-2: Cause Construction-Generated Criteria Air Pollutant or Precursor Emissions to Exceed SMAQMD-Recommended Thresholds

Findings

Changes or alterations have been required in, or incorporated into, the Stockton Boulevard Plan by the City of Sacramento that mitigate or avoid the significant effects on the environment.

Facts in Support of Findings

The City of Sacramento has adopted and will implement the following mitigation measure that will reduce impacts related to short-term construction emissions of PM_{10} and $PM_{2.5}$ to a less-than-significant level. With implementation of SMAQMD's Basic Construction Emission Control Practices, the emissions thresholds would be 80 lb/day or 14.6 tpy for PM_{10} and 82 lb/day and or 15 tpy for $PM_{2.5}$. As shown in Table 3.1-4 of the Draft EIR (pages 3.1-15 and 3.1-16) modeled PM_{10} and $PM_{2.5}$ emissions would fall below the adjusted thresholds. Therefore, PM_{10} and $PM_{2.5}$ emissions resulting from construction of new uses under the Stockton Boulevard Plan would not exceed applicable thresholds. (Draft EIR pages 3.1-15 through 3.1-17)

Mitigation Measure

Mitigation Measure 3.1-2: Implement 2040 General Plan Policy

The City shall ensure that construction and grading activities minimize short-term impacts to air quality by employing appropriate measures and best practices. Refer to Basic Construction Emissions Control Practices (BMPs) recommended by the Sacramento Metropolitan Air Quality Management District (SMAQMD) (2040 General Plan Policy ERC-4.5).

As a condition of approval, construction contractors shall implement the following BMPs included in SMAQMD's Basic Construction Emission Control Practices:

- water all exposed surfaces two times daily. Exposed surfaces include, but are not limited to soil piles, graded areas, unpaved parking areas, staging areas, and access roads;
- cover or maintain at least two feet or free board space on haul trucks transporting soil, sand, or other loose material on the site. Any haul trucks that would be traveling along freeways or major roadways should be covered;
- use wet power vacuum street sweepers to remove any visible trackout mud or dirt onto adjacent public roads at least once a day. Use of dry power sweeping is prohibited;
- limit vehicle speeds on unpaved roads to 15 miles per hour (mph);
- complete construction of all roadways, driveways, sidewalks, parking lots as soon as possible. In addition, building pads should be laid as soon as possible after grading unless seeding or soil binders are used;
- minimize idling time either by shutting equipment off when not in use or reducing the time of idling to 5 minutes [required by California Code of Regulations, Title 13, sections 2449(d)(3) and 2485]. Provide clear signage that posts this requirement for workers at the entrances to the site; and
- maintain all construction equipment is in proper working condition according to manufacturer's specifications. The equipment must be checked by a certified mechanic and determined to be running in proper condition before it is operated.

BIOLOGICAL RESOURCES

Impact 3.2-1: Have a Substantial Adverse Effect, Either Directly or Through Habitat Modifications, on Any Species Identified as a Candidate, Sensitive, or Special Status Species in Local or Regional Plans, Policies, or Regulations, or by CDFW or USFWS

Findings

Changes or alterations have been required in, or incorporated into, the Stockton Boulevard Plan by the City of Sacramento that mitigate or avoid the significant effects on the environment.

Facts in Support of Findings

The City of Sacramento has adopted and will implement the following mitigation measures that will reduce the potential for impacts on purple martin to a less-than-significant level through survey and avoidance requirements. (Draft EIR pages 3.2-14 and 3.2-15)

Mitigation Measure

Mitigation Measure 3.2-1a: Avoid Direct Loss and Disturbance of Nesting Purple Martin

The City shall incorporate the following policy into the Specific Plan:

- **Policy BR-1:** Purple Martin Avoidance If vegetation removal, structure demolition, or ground disturbance is proposed between April and August, a qualified biologist shall conduct preconstruction surveys for nesting purple martin within 500 feet of the activities no more than 30 days before construction commences. A qualified biologist shall establish a non-disturbance buffer at a distance sufficient to minimize nest disturbance based on the nest

location, topography, cover, the species' sensitivity to disturbance, and the intensity/type of potential disturbance. The exclusionary buffer shall remain in place until the chicks have fledged or as otherwise determined appropriate by a qualified biologist. If a purple martin nest tree, or structure, (any tree or structure that has an active nest in the year the impact is to occur) must be removed, the tree/structure shall be removed between September and March, when not occupied.

Mitigation Measure 3.2-1b: Implement 2040 General Plan Policy

- Biological Resources. The City shall ensure that adverse impacts on sensitive biological resources, including special-status species, sensitive natural communities, sensitive habitat, and wetlands are avoided, minimized, or mitigated to the greatest extent feasible as development takes place. (2040 General Plan Policy ERC-2.2)

Impact 3.2-3: Potential for the Implementation of the Specific Plan, in Combination with other Development, to Contribute to a Significant Cumulative Impact to Biological Resources

Findings

Changes or alterations have been required in, or incorporated into, the Stockton Boulevard Plan by the City of Sacramento that mitigate or avoid the significant effects on the environment.

Facts in Support of Findings

The City of Sacramento has adopted and will implement the Mitigation Measures 3.2-1a and 3.2-1b (described above) that will reduce impacts related to biological resources to a less-than-significant level. Therefore, implementation of the Specific Plan would not result in considerable contribution to cumulative impacts associated with biological resources and the cumulative impacts would be reduced to a less-than-significant level with mitigation. (Draft EIR page 3.2-16)

Mitigation Measure

Mitigation Measure 3.2-1a: Avoid Direct Loss and Disturbance of Nesting Purple Martin (see above)

Mitigation Measure 3.2-1b: Implement 2040 General Plan Policy (see above)

ENERGY

Impact 3.4-2: Conflict with or Obstruct a State or Local Plan for Renewable Energy or Energy Efficiency

Findings

Changes or alterations have been required in, or incorporated into, the Stockton Boulevard Plan by the City of Sacramento that mitigate or avoid the significant effects on the environment.

Facts in Support of Findings

The City of Sacramento has adopted and will implement the following mitigation measure that will reduce impacts related to conflicts with or obstruction of a State or local plan for renewable energy or energy efficiency to a less-than-significant level. Implementation of Mitigation Measure 3.4-2 would require future project applicants to provide electric vehicle charging parking to encourage the use of electric vehicles. Implementation of Mitigation Measure 3.5-1b would require compliance with the City's

Climate Action and Adaptation Plan (CAAP). Implementation of these mitigation measures would ensure that impacts related to conflict with or obstruction of a State or local plan for renewable energy or energy efficiency would be less than significant. (Draft EIR pages 3.4-10 and 3.4-11)

Mitigation Measure

Mitigation Measure 3.4-2: Electric Vehicle Charging Parking

The City shall incorporate the following policy related to electric vehicle charging stations into the Specific Plan:

- **Policy E-1:** EV Parking Spaces Applicants shall include the most recent CalGreen Tier 2 requirements pertaining to required EV parking spaces in the project design in order to meet the prerequisites for SMAQMD's Tier 1 BMP 2.

Mitigation Measure 3.5-1b (see Impact 3.5-1 below)

Impact 3.4-3: Potential for the Implementation of the Specific Plan, in Combination with Other Development, to Contribute to a Significant Cumulative Energy Impact

Findings

Changes or alterations have been required in, or incorporated into, the Stockton Boulevard Plan by the City of Sacramento that mitigate or avoid the significant effects on the environment.

Facts in Support of Findings

The City of Sacramento has adopted and will implement Mitigation Measures 3.4-2 and 3.5-1b (described above) that will reduce impacts related to energy to a less-than-significant level. With implementation of mitigation measures and the City's continued encouragement for all-electric development, the Specific Plan would not conflict with the goals of the 2022 Scoping Plan and the City's CAAP to reduce natural gas utility use. Therefore, implementation of the Specific Plan would not result in a considerable contribution to a significant cumulative impact. (Draft EIR pages 3.4-11 and 3.4-15)

Mitigation Measure

Mitigation Measure 3.4-2: Electric Vehicle Charging Parking (see above)

Mitigation Measure 3.5-1b: Implement the Greenhouse Gas Emission Reduction Actions of the Climate Action & Adaptation Plan (see Impact 3.5-1 below)

GREENHOUSE GAS EMISSIONS AND CLIMATE CHANGE

Impact 3.5-1: Generate GHG Emissions, Either Directly or Indirectly, That May Have a Significant Impact on the Environment

Findings

Changes or alterations have been required in, or incorporated into, the Stockton Boulevard Plan by the City of Sacramento that mitigate or avoid the significant effects on the environment.

Facts in Support of Findings

The City of Sacramento has adopted and will implement the following mitigation measures that will reduce impacts related to generation of GHG emissions that may have a significant impact on the environment to a less-than-significant level. Implementation of Mitigation Measures 3.5-1a and 3.5-1b would ensure that GHG emissions from project operation and construction would be less than significant through compliance with applicable General Plan policies and the City's CAAP policies. (Draft EIR pages 3.5-9 through 3.5-15)

Mitigation Measure

Mitigation Measure 3.5-1a: Implement 2040 General Plan Policies

- Project Design. The City shall promote the incorporation of new technologies, materials, and design and construction techniques in private development projects that minimize air pollution, noise, excess heat, and other forms of pollution and its impacts. (2040 General Plan Policy ERC-4.3)

- Construction Emissions. The City shall ensure that construction and grading activities minimize short-term impacts to air quality by employing appropriate measures and best practices. Refer to Basic Construction Emissions Control Practices (BMPs) recommended by the Sacramento Metropolitan Air Quality Management District (SMAQMD). (2040 General Plan Policy ERC-4.5)

- Regenerative Food System. The City shall encourage regenerative agriculture practices in urban agriculture uses, including carbon-sequestering practices. (2040 General Plan Policy ERC-9.12)

- Street Classification System. The City shall maintain a street classification system that considers the role of streets as corridors for movement but prioritizes a context-sensitive Complete Streets concept that enables connected, comfortable, and convenient travel for those walking, rolling, and taking transit. (2040 General Plan Policy M-1.1)

- User Prioritization. The City shall prioritize mobility, comfort, health, safety, and convenience for those walking, followed by those bicycling and riding transit, ahead of design and operations for those driving. (2040 General Plan Policy M-1.2)

- Walking Facilities. The City shall work to complete the network of tree-shaded sidewalks throughout the city, to the greatest extent feasible, by building new sidewalks and crossings, especially within the high-injury network, in disadvantaged communities, near high-ridership transit stops, and near important destinations, such as schools, parks, and commercial areas. Walking facilities should incorporate shade trees. (2040 General Plan Policy M-1.14).

- Improve Bicycling Connectivity. The City shall plan and seek funding for a continuous, low-stress bikeway network consisting of bicycling-friendly facilities that connect neighborhoods with destinations and activity centers throughout the city. (2040 General Plan Policy M-1.17)

Mitigation Measure 3.5-1b: Implement the Greenhouse Gas Emission Reduction Actions of the Climate Action & Adaptation Plan

- Future development projects under the Specific Plan shall incorporate GHG emissions reductions measures contained in the Climate Action and Adaptation Plan (CAAP). The CAAP includes the following measures: Eliminate natural gas in new construction (CAAP Measure E-2).

- Support infill growth to ensure that 90 percent of growth is in the established and center/corridor communities and 90 percent small-lot and attached homes by 2040, consistent with the regional Sustainable Communities Strategy. Project-level VMT should be 15 percent below (or 85 percent of) the regional average. (CAAP Policy E-5)
- Improve active transportation infrastructure to achieve 6 percent active transportation mode share by 2030 and 12 percent by 2045. (CAAP Policy TR-1)
- Support public transit improvements to achieve 11 percent public transit mode share by 2030 and maintain through 2045. (CAAP Policy TR-2)
- Achieve zero-emission vehicle adoption rates of 28 percent for passenger vehicles and 22 percent for commercial vehicles by 2030 and 100 percent for all vehicles by 2045. (CAAP Policy TR-3)
- Work to reduce organic waste disposal 75 percent below 2014 levels by 2025. (CAAP Policy W-1)
- Reduce water utility emissions (in MT CO2e per million gallon) delivered by 100 percent by 2030 and maintain that through 2045. (CAAP Policy WW-1)
- Reduce wastewater emissions by 22 percent by 2030 and 40 percent by 2045. (CAAP Policy WW-2)
- Increase urban tree canopy cover to 25 percent by 2030 and 35 percent by 2045. (CAAP Policy CS-1)

HAZARDS AND HAZARDOUS MATERIALS

Impact 3.6-1: Create a Significant Hazard to the Public or the Environment through the Routine Transport, Use, or Disposal of Hazardous Materials or through the Reasonably Foreseeable Upset and Accident Conditions Involving the Release of Hazardous Materials into the Environment

Findings

Changes or alterations have been required in, or incorporated into, the Stockton Boulevard Plan by the City of Sacramento that mitigate or avoid the significant effects on the environment.

Facts in Support of Findings

The City of Sacramento has adopted and will implement the following mitigation measure that will reduce the impacts related to the routine transport, use, and disposal of hazardous materials and reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment to a less-than-significant level. Implementation of Mitigation Measure 3.6-1 would reduce impacts associated with hazardous materials to a less-than-significant level by requiring preparation of a Phase I environmental site assessment and implementation of remediation activities appropriate to the site based on the conclusions and recommendations of the Phase I report. (Draft EIR pages 3.6-11 through 3.6-14)

Mitigation Measure

Mitigation Measure 3.6-1: Conduct a Phase I ESA

Prior to the issuance of a grading permit, project applicants for all future development projects within the Specific Plan Area shall complete a Phase I ESA (performed in accordance with the current ASTM Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process [E 1527]) for each individual property prior to development or redevelopment to ascertain the presence or absence of Recognized Environmental Conditions (RECs), Historical Recognized Environmental Condition (HRECs), and Potential Environmental Concerns (PECs). The findings and conclusions of the Phase I ESA shall become the basis for potential recommendations for follow-up investigation, if found to be warranted.

Impact 3.6-2: Emit Hazardous Emissions or Handle Hazardous or Acutely Hazardous Materials, Substances, or Waste within 0.25 Mile of an Existing or Proposed School

Findings

Changes or alterations have been required in, or incorporated into, the Stockton Boulevard Plan by the City of Sacramento that mitigate or avoid the significant effects on the environment.

Facts in Support of Findings

The City of Sacramento has adopted and will implement Mitigation Measures 3.6-1 that will reduce impacts related to emitting hazardous emissions within 0.25 mile of an existing or proposed school. Mitigation Measure 3.6-1 would require preparation of Phase I environmental site assessments and implementation of remediation activities prior to the issuance of grading permits. Implementation of Mitigation Measure 3.6-1 as well as compliance with federal, state, and local regulations, would reduce potential impacts associated with emitting hazardous emissions or handling hazardous or acutely hazardous materials, substances, or waste within 0.25 mile of an existing or proposed school. Impacts would be less than significant. (Draft EIR pages 3.6-14 and 3.6-15, Final EIR Chapter 3, “Revisions to Draft EIR)

Mitigation Measure

Mitigation Measure 3.6-1: Conduct a Phase I ESA (see above)

Impact 3.6-4: Impair Implementation of or Physically Interfere with an Emergency Response Plan or Emergency Evacuation Area

Findings

Changes or alterations have been required in, or incorporated into, the Stockton Boulevard Plan by the City of Sacramento that mitigate or avoid the significant effects on the environment.

Facts in Support of Findings

The City of Sacramento has adopted and will implement the following mitigation measure that will reduce impacts related to impairing implementation of or physically interfering with an emergency response plan or emergency evacuation area to a less-than-significant level. Implementation of Mitigation Measure 3.6-4 will require preparation and enforcement of a construction traffic management plan. The plan will include access points (if applicable), procedures for notification of road closures, construction materials delivery plan, and a description of emergency personnel access routes during road closures. The plan will be subject to review and approval by the City. Because this mitigation measure ensures that acceptable operating conditions on local roadways are maintained,

implementation of the Specific Plan would not interfere with an emergency response plan or emergency evacuation area and this impact would be less than significant. (Draft EIR pages 3.6-15 and 3.6-16)

Mitigation Measure

Mitigation Measure 3.6-4: Prepare and enforce a Construction Traffic Management Plan

Prior to issuance of grading permits, the applicant shall submit to the City for review and approval a Construction Traffic Management Plan to minimize traffic impacts on all roadways at and near the work site affected by construction activities. The plan shall include construction and public (if applicable) access points, procedures for notification of road closures, construction materials delivery plan, a description of emergency personnel access routes during road closures, this plan shall ensure adequate access for emergency responders.

Impact 3.6-5: Potential for the Implementation of the Stockton Boulevard Specific Plan, in Combination with Other Development, to Contribute to a Significant Cumulative Impact to Hazards and Hazardous Materials

Findings

Changes or alterations have been required in, or incorporated into, the Stockton Boulevard Plan by the City of Sacramento that mitigate or avoid the significant effects on the environment.

Facts in Support of Findings

The City of Sacramento has adopted and will implement the Mitigation Measures 3.6-1 and 3.6-4 that will reduce impacts related to hazards and hazardous materials to a less-than-significant level as discussed above. Through adherence to applicable regulatory requirements and implementation of mitigation measures, the contributions of individual projects under the Specific Plan within the cumulative context would be less than cumulatively considerable. (Draft EIR page 3.6-17)

Mitigation Measure

Mitigation Measure 3.6-1: Conduct a Phase I ESA (see above)

Mitigation Measure 3.6-4: Prepare and enforce a Construction Traffic Management Plan (see above)

NOISE AND VIBRATION

Impact 3.7-1: Generate a Substantial Temporary Increase in Noise Levels at Noise-Sensitive Land Uses in Excess of Standards Established by the City Code

Findings

Changes or alterations have been required in, or incorporated into, the Stockton Boulevard Plan by the City of Sacramento that mitigate or avoid the significant effects on the environment.

Facts in Support of Findings

The City of Sacramento has adopted and will implement the following mitigation measures that will reduce impacts related to construction noise to a less-than-significant level. Compliance with Mitigation Measures 3.7-1a and 3.7-1b would restrict construction operations to less sensitive time periods and implement the best available construction noise level reductions necessary for specific projects.

Construction noise impacts would be reduced to less than significant with mitigation incorporated. (Draft EIR pages 3.7-19 through 3.7-22)

Mitigation Measure

Mitigation Measure 3.7-1a: Implement 2040 General Plan Policies

- Project Design. The City shall promote the incorporation of new technologies, materials, and design and construction techniques in private development projects that minimize air pollution, noise, excess heat, and other forms of pollution and its impacts (2040 General Plan Policy ERC-4.3).

- Construction Noise Controls. The City shall limit the potential noise impacts of construction activities on surrounding land uses through noise regulations in the City Code that address permitted days and hours of construction, types of work, construction equipment, and sound attenuation devices. (2040 General Plan Policy ERC-10.9).

Mitigation Measure 3.7-1b: New Policy for Goal E-1: Environment, Public Health, and Safety
The City shall include the following new policy in the Specific Plan:

- **Policy NV-1:** Implement additional measures to reduce construction-related noise. For all projects in the Specific Plan Area that require a building permit, the City shall require that the contractor implement the following measures during all phases of construction:

    - Construction hours shall be limited to 7:00 a.m. to 6:00 p.m. Monday through Saturday and between 9:00 a.m. and 6:00 p.m. on Sunday. Construction outside of these hours may be approved through a development permit based on a site specific “construction noise mitigation plan” and a finding by the Director of Community Development or their designee that the construction noise mitigation plan is adequate to prevent excessive noise disturbance of affected residential uses. The site-specific development permit would allow for work outside normally permitted hours (e.g., overnight) subject to conditions of approval, including performance standards, imposed by the City to limit noise impacts.

    - All heavy construction equipment and all stationary noise sources shall have manufacturer-installed mufflers. Mufflers and noise suppressors shall be properly maintained and tuned to ensure proper fit, function, and minimization of noise.

    - Heavy-duty equipment shall be operated at the lowest operating power possible and shall be restricted in close proximity to sensitive receptors.

    - For construction activity that occurs during nighttime hours, where available and feasible, equipment with back-up alarms shall be equipped with either audible self-adjusting backup alarms or alarms that only sound when an object is detected. Self-adjusting backup alarms shall automatically adjust to 5 dB over the surrounding background levels. All non-self-adjusting backup alarms shall be set to the lowest setting required to be audible above the surrounding noise levels.

    - To the extent that noise-generating outdoor construction activity needs to occur at night as part of a continuous construction activity, the activity shall be planned such that the portion that needs to take place closest to sensitive receptors takes place during less noise-sensitive daytime hours. Temporary noise barriers shall be constructed, if needed, to screen noise-generating equipment when located near noise-sensitive land uses.

- If impact pile driving is required, sonic pile drivers shall be used, unless engineering studies are submitted to the City that show this is not feasible, based on geotechnical considerations.

Impact 3.7-2: Generation of Excessive Groundborne Vibration or Groundborne Noise Levels

Findings

Changes or alterations have been required in, or incorporated into, the Stockton Boulevard Plan by the City of Sacramento that mitigate or avoid the significant effects on the environment.

Facts in Support of Findings

The City of Sacramento has adopted and will implement the following mitigation measures that will reduce impacts related to construction vibration to a less-than-significant level. Implementation of Mitigation Measures 3.7-2a and 3.7-2b will serve to reduce potential vibration impacts from the use of equipment during construction activities by requiring minimum setbacks to sensitive land uses, impact monitoring during pile driving activity, and use of alternative equipment when appropriate and feasible. These measures will ensure that construction activities within the Specific Plan Area would reduce the potential exposure to excessive groundborne noise and vibration levels and ensure that construction vibration levels would not impact persons or buildings. Therefore, implementation of Migration Measures 3.7-2a and 3.7-2b will reduce this impact to a less-than-significant level. (Draft EIR pages 3.7-23 through 3.7-26)

Mitigation Measure

Mitigation Measure 3.7-2a: Implement 2040 General Plan Policies

- Interior Vibration Standards. The City shall require construction projects that are anticipated to generate significant vibration levels to use appropriate methods (i.e., type of equipment, low-impact tools, modifying operations, increasing setback distance, vibration monitoring) to ensure acceptable interior vibration levels at nearby residential and commercial uses based on the current City or Federal Transit Administration (FTA) criteria. (2040 General Plan Policy ERC10.5)

- Vibration. The City shall consider the potential for vibration-induced damage associated with construction activities, highways, and rail lines in close proximity to historic buildings and archaeological sites. Where there is potential for substantial vibration-induced damage, the City shall require preparation of a Pre-Construction Survey and Vibration Management and Monitoring Plan, prepared by a qualified historic preservation specialist or structural engineer to document existing conditions, present appropriate methods to avoid or reduce potential vibration damage, monitor for excessive vibration, and ensure any damage is documented and repaired. (2040 General Plan Policy ERC-10.7)

Mitigation Measure 3.7-2b: New Policy for Goal E-1: Environment, Public Health, and Safety

The City shall include the following new policy in the Specific Plan:

- **Policy NV-2:** Implement additional measures to reduce construction-related vibration.

  The following vibration control measures (or other equally effective measures approved by the City) shall be included in the plan:

  - To prevent structural damage, minimum setback requirements for different types of ground vibration-producing activities (e.g., pile driving) for the purpose of preventing damage to nearby structures shall be established based on the proposed activities and

locations, once determined. Factors to be considered include the specific nature of the vibration producing activity (e.g., type and duration of pile driving), local soil conditions, and the fragility/resiliency of nearby structures. Established setback requirements can be breached if a project-specific site-specific vibration analysis is conducted by a qualified geotechnical engineer or ground vibration specialist that indicates that no structural damage would occur at nearby buildings or structures.

- To prevent disturbance to sensitive land uses, minimum setback requirements for different types of ground vibration producing activities (e.g., pile driving) shall be established based on the proposed activities and locations, once determined.
- Alternatives to traditional pile driving (e.g., sonic pile driving, jetting, cast-in-place or auger cast piles, etc.,) shall be considered and implemented where feasible to reduce vibration levels. ▪ Phase pile-driving and high-impact activities so as not to occur simultaneously with other construction activities, to the extent feasible. The total vibration level produced could be significantly less when each vibration source is operated at separate times.

Impact 3.7-4: Expose Noise-Sensitive Land Uses to Operational Stationary Noise that Exceeds Applicable Standards

Findings

Changes or alterations have been required in, or incorporated into, the Stockton Boulevard Plan by the City of Sacramento that mitigate or avoid the significant effects on the environment.

Facts in Support of Findings

The City of Sacramento has adopted and will implement the following mitigation measures that will reduce impacts related to operational stationary noise to a less-than-significant level. Implementation of Mitigation Measures 3.7-1a (detailed above) and 3.7-3 (detailed below) will ensure that new stationary noise sources associated with development under the Specific Plan would be mitigated so as not exceed City exterior noise standards at sensitive receptors. Therefore, implementation of Migration Measures 3.7-1a and 3.7-3 would reduce this impact to a less-than-significant level. (Draft EIR pages 3.7-30 and 3.7-31)

Mitigation Measure

Mitigation Measure 3.7-1a: Implement 2040 General Plan Policies (see above)

Mitigation Measure 3.7-3: Implement 2040 General Plan Policies (see below)

PUBLIC SERVICES AND RECREATION

Impact 3.8 -5: Result in Substantial Adverse Physical Impacts Associated with the Demand for or Provision of New Parks and Other Recreational Facilities

Findings

Changes or alterations have been required in, or incorporated into, the Stockton Boulevard Plan by the City of Sacramento that mitigate or avoid the significant effects on the environment.

Facts in Support of Findings

The City of Sacramento has adopted and will implement the following mitigation measures that will reduce impacts related to parks and other recreational facilities to a less-than-significant level. Mitigation Measure 3.8-5a will require implementation of 2040 General Plan policies to ensure that the park and recreational facilities level of service standards can be met through the dedication of parks and open space, the payment of in-lieu fees, and incorporation of privately-owned open spaces and facilities in the design of future development in the Specific Plan Area. Mitigation Measure 3.8-5b will require the City to evaluate the equitable increase in public parkland and recreation facilities to serve the needs of the current and new residents within the Specific Plan Area, that would be developed as neighborhood parks or other non-conventional park solutions to be accessible within a 10-minute walk of residential land uses. Therefore, implementation of Mitigation Measures 3.8-5a and 3.8-5b would reduce this impact to a less-than-significant level. (Draft EIR pages 3.8-12 through 3.8-15)

Mitigation Measure

Mitigation Measure 3.8 -5a: Implement 2040 General Plan Policies

- Parkland Dedication Requirements. The City shall continue to require that new residential development projects contribute toward the provision of adequate parks and recreational facilities to serve the new residents, either through the dedication of parkland, the construction of public and/or private recreation facilities, or the payment of parkland in-lieu fees, consistent with the Quimby Ordinance. To achieve the level of service for all parkland in all areas of the city, the City shall seek other funding resources to prioritize park needs in park deficit areas. (2040 General Plan Policy YPRO-1.4)

- Incentivizing Onsite Public Facilities. The City shall continue to provide Park Impact Fee (PIF) credit for development projects that provide publicly accessible parks, plazas, and parkways onsite that promote active or passive recreational opportunities and serve as neighborhood gathering points. (2040 General Plan Policy YPRO-1.5)

- Non-Conventional Park Solutions. In densely built out urban areas of the city where the provision of large park spaces is not feasible, the City shall explore creative solutions to provide neighborhood park and recreation facilities that serve the needs of local residents and employees. Such solutions may include the following:

    - Publicly accessible, privately-owned open spaces and plazas;
    - Rooftop play courts and gardens;
    - Freeway underpass, utility corridor, and wide landscape medians;
    - Conversion of rails to rails with trails;
    - Pocket parks and pedestrian areas in the public right-of-way; and
    - The provision of neighborhood and community-serving recreational facilities in regional parks. (2040 General Plan Policy YPRO-1.8)

Mitigation Measure 3.8 -5b: Identify Park and Recreation Facilities

Through implementation of the 2040 Parks Plan, the City shall evaluate the equitable increase in public parkland and recreation facilities to serve the needs of the current and new residents within the Stockton Boulevard Specific Plan Area, that shall be developed as neighborhood parks or other nonconventional park solutions to be accessible within a 10-minute walk of residential land uses.

Impact 3.8 -6: Potential for the Implementation of the Specific Plan, in Combination with Other Development, to Contribute to a Significant Cumulative Impacts to Public Services and Recreation

Findings

Changes or alterations have been required in, or incorporated into, the Stockton Boulevard Plan by the City of Sacramento that mitigate or avoid the significant effects on the environment.

Facts in Support of Findings

The City of Sacramento has adopted and will implement the following mitigation measures that will reduce cumulative impacts related to public services and recreation to a less-than-significant level. Implementation of Mitigation Measures 3.8 -5a and 3.8 -5b would ensure that there would be parks/recreational facilities available to serve the Specific Plan Area and would not result in demand for construction or expansion of these facilities. In addition, the contribution of impact fees for the provision of services to the City would further reduce the Specific Plan's incremental contribution to the need for public services and recreation/park facilities within the cumulative context. Therefore, the Specific Plan would not result in a considerable contribution to the existing significant cumulative impacts associated with the provision of parks and other recreation facilities. This impact would be less than significant with mitigation. (Draft EIR page 3.8-15)

Mitigation Measure

Mitigation Measure 3.8 -5a: Implement 2040 General Plan Policies (see above)

Mitigation Measure 3.8 -5b: Identify Park and Recreation Facilities (see above)

VISUAL RESOURCES

Impact 3.12-1: Conflict with Applicable Zoning and Other Regulations Governing Scenic Quality

Findings

Changes or alterations have been required in, or incorporated into, the Stockton Boulevard Plan by the City of Sacramento that mitigate or avoid the significant effects on the environment.

Facts in Support of Findings

The City of Sacramento has adopted and will implement the following mitigation measure that will reduce impacts related to conflict with applicable zoning and other regulations governing scenic quality to a less-than-significant level. Implementation of Mitigation Measure 3.12-1 would ensure that implementation of the Specific Plan would ensure that new development would be consistent with existing design guidelines, resulting in development that complements the scenic quality of surrounding areas by requiring compliance with 2040 General Plan policies. Implementation of Mitigation Measure 3.12-1 and the City's Urban Design Guidelines would ensure that impacts related to conflict with applicable zoning and other regulations that govern scenic quality would be less than significant. (Draft EIR pages 3.12-12 through 3.12-14)

Mitigation Measure

Mitigation Measure 3.12-1: Implement 2040 General Plan Policies

- Compatibility with Adjoining Uses. The City shall ensure that the introduction of higher-intensity mixed-use development along major arterial corridors is compatible with adjacent land uses, particularly residential uses, by requiring features such as the following:
    - Buildings set back from rear or side yard property lines adjoining single-unit dwelling residential uses;
    - Building heights stepped back from sensitive adjoining uses to maintain appropriate transitions in scale and to minimize impacts to privacy and solar access;
    - Landscaped off-street parking areas, loading areas, and service areas screened from adjacent residential areas to the degree feasible; or
    - Lighting shielded from view and directed downward to minimize impacts on adjacent residential uses. (2040 General Plan Policy LUP-4.6)
- Compatibility with Historic Context. The City shall continue to review new development, alterations, and rehabilitation/remodels for compatibility with the surrounding historic context and consistency with adopted design guidelines/standards, including the Historic District Plans. The City shall pay special attention to the scale, massing, and relationship of proposed new development to complement surrounding historic environments. (2040 General Plan Policy HCR-1.3)
- Responsiveness to Context. The City shall require building and site design that respects and responds to the local context, including use of local materials and plant species where feasible, responsiveness to Sacramento's climate, and consideration of cultural and historic context of Sacramento's neighborhoods, corridors, and centers. (2040 General Plan Policy LUP-8.10)

Impact 3.12-2: Create a New Source of Substantial Light or Glare which Would Adversely Affect Day or Nighttime Views in the Area

Findings

Changes or alterations have been required in, or incorporated into, the Stockton Boulevard Plan by the City of Sacramento that mitigate or avoid the significant effects on the environment.

Facts in Support of Findings

The City of Sacramento has adopted and will implement the following mitigation measure that will reduce impacts related to light and glare to a less-than-significant level. Implementation of Mitigation Measure 3.12-1 will ensure that lighting will be directed away from adjacent residential areas within and surrounding the Specific Plan Area, reducing impacts associated with substantial light and glare sources by requiring compliance with 2040 General Plan Policy LUP-4.6. This impact would be less than significant with mitigation. (Draft EIR page 3.12-15)

Mitigation Measure

Mitigation Measure 3.12-1: Implement 2040 General Plan Policies (see above)

Impact 3.12-3: Potential for the Implementation of the Stockton Boulevard Specific Plan, in combination Other Development, to Contribute to a Significant Cumulative Impact Related to Aesthetics

Findings

Changes or alterations have been required in, or incorporated into, the Stockton Boulevard Plan by the City of Sacramento that mitigate or avoid the significant effects on the environment.

Facts in Support of Findings

The City of Sacramento has adopted and will implement Mitigation Measure 3.12-1, which will reduce cumulative impacts related to visual resources to a less-than-significant level. As discussed under Impacts 3.12-1 and 3.12-2 above, implementation of Mitigation Measure 3.12-1 would ensure that future development within the Specific Plan Area would be consistent and complement the existing visual quality and characteristics of the Plan Area and shield light sources from adjacent residential areas by directing the light downward. The Specific Plan will be required to apply policies stated in the 2040 General Plan and would not conflict with those policies related to zoning or scenic quality. Therefore, the Specific Plan would not result in considerable contribution to the existing significant cumulative impacts associated with visual resources within and surrounding the Plan Area and the cumulative impacts would be less than significant with mitigation.

Mitigation Measure

Mitigation Measure 3.12-1: Implement 2040 General Plan Policies (see above)

1.4.3 Significant and Unavoidable Impacts

The following significant and potentially significant environmental impacts of implementing the Specific Plan, including cumulative impacts, are unavoidable and cannot be mitigated in a manner that would lessen the significant impact to below the level of significance. Notwithstanding disclosure of these impacts, the City Council elects to approve the Specific Plan due to overriding considerations as set forth below in Section 2, “Statement of Overriding Considerations.”

AIR QUALITY

Impact 3.1-3: Result in a Net Increase in Long-Term Operational Criteria Air Pollutant and Precursor Emissions That Exceed SMAQMD-Recommended Thresholds

Findings

Changes or alterations, which substantially reduce the significant effects of long-term operational emissions of ROG, PM_{10}, and $PM_{2.5}$ have been required in, or incorporated into, the Specific Plan by the City of Sacramento; however, these would not be sufficient to reduce the impact to less than significant. Specific social, economic, and environmental benefits of the Specific Plan outweigh the identified potential unavoidable significant impacts. See Section 2, “Statement of Overriding Considerations,” below.

Facts in Support of Findings

Implementation of Mitigation Measure 3.5-1b would reduce PM emissions associated with future development in the Specific Plan Area through the implementation of various measures of the City of Sacramento Climate Action and Adaptation Plan that directly reduce exhaust and fugitive dust, endorse low-emission vehicles, and require electric development. However, at this level of analysis, it cannot be guaranteed that these measures would be sufficient to reduce PM emissions below a significant level. This is because the extent of the application of these measures cannot be reliably estimated without specifics regarding diesel truck trips that would occur at the project level during the operation of individual project under the Specific Plan. Enforcement of these measures cannot be guaranteed at this level of analysis but would occur at the project level as subsequent CEQA analyses are performed for individual projects under the Specific Plan. Additionally, there is no mitigation which can implemented to reliably reduce the use of consumer products in order to minimize ROG emissions below a significant level. Thus, this impact would be significant and unavoidable even after implementation of mitigation. (Draft EIR pages 3.1-17 through 3.1-19)

Mitigation Measure

Mitigation Measures 3.5-1b: Implement the Greenhouse Gas Emission Reduction Actions of the Climate Action & Adaptation Plan (see above)

Impact 3.1-4: Expose Sensitive Receptors to Substantial Pollutant Concentrations

Findings

Changes or alterations, which substantially reduce the significant effects related to TAC emissions have been required in, or incorporated into, the Specific Plan by the City of Sacramento; however, these would not be sufficient to reduce the impact to less than significant. Specific social, economic, and environmental benefits of the Specific Plan outweigh the identified potential unavoidable significant impacts. See Section 2, “Statement of Overriding Considerations,” below.

Facts in Support of Findings

Mitigation Measure 3.1-4 requires implementation of 2040 General Plan policies to reduce TAC emissions. General Plan Policy ERC-3.11 recommends amendments to the City’s Parking Lot Shading Design and Maintenance Guidelines and Parking Lot Shading Ordinance. General Plan Policy ERC-4.2 directs the City to promote new technologies and design considerations to minimize exposure to air pollution. General Plan Policy ERC-4.4 encourages partnership with SMAQMD to reduce exposure to TACs. General Plan Policy EJ-A.2 directs the City to explore opportunities to accelerate the installation of air filtration systems in existing homes currently experiencing high pollution. Nevertheless, the potential development, particularly from the emissions of diesel PM from truck-related activity, would expose sensitive uses to TACs emissions. Impacts for construction and operation would be significant and unavoidable. (Draft EIR pages 3.1-19 through 3.1-21)

Mitigation Measure

Mitigation Measure 3.1-4: Implement 2040 General Plan Polices

- Parking Lot Shading. The City shall review and amend the Parking Lot Shading Design and Maintenance Guidelines and Parking Lot Shading Ordinance as needed to promote tree health, growth, and maintenance of trees to reduce urban heat island impacts. (General Plan Policy ERC-3.11)

- Project Design. The City shall promote the incorporation of new technologies, materials, and design and construction techniques in private development projects that minimize air pollution, noise, excess heat, and other forms of pollution and its impacts. (General Plan Policy ERC-4.3)

- Sensitive Uses. The City shall consult, as appropriate, with the Sacramento Metropolitan Air Quality Management District (SMAQMD) in evaluating exposure of sensitive receptors to toxic air contaminants, and will impose conditions, as appropriate, on projects to protect public health and safety. (General Plan Policy ERC-4.4)

- Air Filtration Systems: The City shall explore opportunities to accelerate the installation of air filtration systems in existing buildings in partnerships with the Sacramento Metropolitan Air Quality Management District (SMAQMD) and other partners in the Sacramento region. Schools, nursing homes, and other sensitive uses within disadvantaged communities (DACs) and areas most affected by air quality issues should be prioritized. (General Plan Policy EJ-A.2) (2040 General Plan Policy ERC-4.4)

Impact 3.1-6: Potential for the Implementation of the Specific Plan, in Combination with Other Development, to Contribute to a Significant Cumulative Air Quality or Odor Impact

Findings

Changes or alterations, which substantially reduce the cumulative significant effects to air quality have been required in, or incorporated into, the Specific Plan by the City of Sacramento; however, these would not be sufficient to reduce the impact to less than significant. Specific social, economic, and environmental benefits of the Specific Plan outweigh the identified potential unavoidable significant impacts. See Section 2, “Statement of Overriding Considerations,” below.

Facts in Support of Findings

As noted in Impacts 3.1-3 and 3.1-4, Mitigation Measures 3.5-1b and 3.1-4 would reduce air pollution emissions impacts but not to a level that reduces the Specific Plan’s contribution to emissions less than cumulatively considerable. Impacts would remain significant and unavoidable. (Draft EIR pages 3.1-22 through 3.1-24)

Mitigation Measure

No additional feasible mitigation is available to reduce the Specific Plan’s contribution to less than cumulatively considerable.

CULTURAL RESOURCES

Impact 3.3-1: Cause a Substantial Adverse Change in the Significance of a Historical Resource

Findings

Changes or alterations, which substantially reduce the impacts to significant historic resources have been required in, or incorporated into, the Specific Plan by the City of Sacramento; however, these would not be sufficient to reduce the impact to less than significant. Specific social, economic, and environmental benefits of the Specific Plan outweigh the identified potential unavoidable significant impacts. See Section 2, “Statement of Overriding Considerations,” below.

Facts in Support of Findings

Implementation of Mitigation Measures 3.3-1a through 3.3-1h would reduce the impacts to historic resources through compliance with General Plan policies and conducting surveys and for the historic-age buildings and structures present in the Specific Plan Area prior to any physical alterations. However, because there is no feasible mitigation available to ensure demolition, damage, or destruction of historically significant resources would not occur, the impact would be significant and unavoidable. (Draft EIR pages 3.3-10 through 3.3-14)

Mitigation Measure

Mitigation Measure 3.3-1a: Code Enforcement

The City shall implement 2040 General Plan Policy HCR-2.5:

- Code Compliance. The City's Code Enforcement, Building, and Preservation Planning Division staff shall work collaboratively to identify historic properties under code enforcement actions and facilitate repair work that brings historic properties into compliance, consistent with preservation best practices, including utilizing the State Historical Building Code to support preservation goals. (2040 General Plan Policy HCR-2.5)

Mitigation Measure 3.3-1b: Early Consultation

The City shall implement 2040 General Plan Policy HCR-1.6:

- Early Project Consultation. The City will continue to strive to minimize impacts to historic and cultural resources by consulting with property owners, land developers, tribal representatives, and the building industry early in the development review process as needed. (2040 General Plan Policy HCR-1.6)

Mitigation Measure 3.3-1c: Context Compatibility

The City shall implement 2040 General Plan Policies LUP-8.10 and LUP-8.11:

- Responsiveness to Context. The City shall require building and site design that respects and responds to the local context, including use of local materials and plant species where feasible, responsiveness to Sacramento's climate, and consideration of cultural and historic context of Sacramento's neighborhoods, corridors, and centers. (2040 General Plan Policy LUP-8.10)

- Neighborhood and Transitions. The City shall ensure that development standards facilitate transitions between areas that border one another so that neighborhoods and districts maintain their own unique qualities. (2040 General Plan Policy LUP-8.11)

The City shall include the following implementing action in the Specific Plan:

- **Action CR-A2:** Avoidance or Minimization of Effects on Identified Historic Resources. If assessment of project impacts finds that a proposed project would have a significant impact on historic resources, the project applicant shall, in consultation with City of Sacramento Planning Division staff, determine whether the project can be feasibly redesigned or revised to avoid such impacts. If avoidance of historic resource(s) is not feasible, the project applicant shall seek to reduce the effect on historic resource(s) as much as possible through project design.

Mitigation Measure 3.3-1d: Identification of Historic Resources

The City shall implement 2040 General Plan Policy HCR-1.18:

- Evaluation of Potentially Eligible Built Environment Resources. The City shall continue to evaluate all buildings and structures 50 years old and older for potential historic significance prior to approving a project that would demolish or significantly alter the resource. (2040 General Plan Policy HCR-1.18)

The City shall incorporate the following implementing action into the Specific Plan:

- **Action CR-A3:** Evaluate the Historic Significance of Age-Eligible Properties. If alteration or new construction is proposed on a parcel within the Plan Area which includes a building, structure, or landscape more than 45 years old (the typical age threshold applied by the California Office of Historic Preservation), the project applicant, at the request of the City's Preservation Director, shall retain a professional who meets the Secretary of the Interior's Professional Qualifications Standards for architectural history or history (as appropriate) to conduct an evaluation of the historic significance and eligibility of buildings, structures, and landscape features on the parcel for listing on the Sacramento Register of Historic and Cultural Resources (Sacramento Register) and California Register of Historical Resources (California Register).

Mitigation Measure 3.3-1e: Assessing Impacts

The City shall include the following implementing action in the Specific Plan:

- **Action CR-A4:** Assess Project Impacts on Eligible Properties. Projects proposing to alter buildings, structures, or landscape features found through evaluation to be eligible for listing on the California Register or National Register of Historic Places shall, at the direction of the City's Preservation Director, be evaluated for adherence to the Secretary of the Interior's Standards for the Treatment of Historic Properties. Potential direct and/or indirect effects on the identified historic resources shall be assessed according to CEQA Guidelines Section 15064.5(b).

Mitigation Measure 3.3-1f: Design Consistency

The City shall implement 2040 General Plan Policy HCR-1.3:

- Compatibility with Historic Context. The City will continue to review new development, alterations, and rehabilitation/remodels for compatibility with the surrounding historic context and consistency with design guidelines/standards, including the Historic District Plans. The City shall pay special attention to the scale, massing, and relationship of proposed new development to complement surrounding historic environments. (2040 General Plan Policy HCR-1.3)

Mitigation Measure 3.3-1g: Demolition Mitigation

The City shall implement 2040 General Plan Policy HCR-1.10:

- Demolition. Consistent with Secretary of the Interior Standards, the City shall consider demolition of historic resources as a last resort, to be permitted only if rehabilitation or adaptive reuse of the resource is not feasible; demolition is necessary to protect the health, safety, and welfare of its residents; or the public benefits outweigh the loss of the historic resource. (2040 General Plan Policy HCR-1.10)

The City shall include the following implementing actions in the Specific Plan:

- **Action CR-A5:** Documentation of Identified Historic Resources. In cases where impacts to historic resources cannot be reduced through avoidance or project redesign to a less-than-significant level, the project applicant shall undertake historic documentation prior to issuance of building permits. Documentation may include completion of a Historic American

Buildings Survey (HABS) Historical Report and accompanying HABS-style photographs. The appropriate level of photographic and narrative HABS documentation shall be determined by City Preservation Director based on the significance and associations of the resource.

- **Action CR-A6:** Interpretive Program. If a proposed project within the Plan Area would cause a significant impact to a historic resource, and the City Preservation Director deems that an interpretive program would be effective and feasible, the project applicant shall hire a qualified professional to develop an on-site interpretive program. An interpretive program would likely be deemed effective in cases where the resource(s) planned for alteration or demolition has particular significance to the history of Sacramento or within the community. The development of interpretive program content shall be conducted or overseen by a qualified professional who meets Secretary of the Interior's Professional Qualification Standards for history, architectural history, or architecture (as appropriate), and approved by the City of Sacramento Planning Division staff. The interpretive program shall include, at a minimum, an on-site, publicly accessible exhibit with information about the property's history, contribution to the history of the neighborhood and/or city, and relevant historic photographs or drawings.

Mitigation Measure 3.3-1h: Protection during Construction

The City shall include the following implementing actions in the Specific Plan:

- **Action CR-A6:** Protection of Historic Resources During Construction. If a project within the Plan Area proposes demolition, alteration, or new construction within 25 feet of a building, structure, or feature which has been listed on the Sacramento Register, California Register, or National Register, or found eligible through evaluation for listing on the California Register or National Register, the project applicant shall incorporate into construction specifications for the proposed project a requirement that construction contractors use all feasible means to avoid damage to adjacent and nearby historic resources. Such methods may include maintaining a safe distance between the construction site and the historic resource, using construction techniques that reduce vibration (including alternatives to jackhammers and hoe-rams where possible), appropriate excavation shoring methods to prevent movement of adjacent structures, and adequate site security to minimize risks of vandalism and fire. This measure shall apply to historic buildings, structures, and site or landscape features both within and outside of the proposed project parcel.

- **Action CR-A7:** Construction Monitoring Program for Historical Resources. If a project within the Plan Area proposes demolition, alteration, or new construction within 25 feet of a building, structure, or feature which has been listed on the Sacramento Register, California Register, or National Register, or found eligible through evaluation for listing on the California Register or National Register, the project applicant shall undertake a monitoring program to document and minimize damage to adjacent historic resources. Prior to the start of ground-disturbing project activity, the project applicant shall engage a historic architect or qualified historic preservation professional to undertake a pre-construction survey of historic resources within 25 feet of planned project activities to document and photograph existing conditions of the resource(s). The consultant shall conduct regular periodic inspections of each historic resource during ground-disturbing activity on the project site. Should damage to a historic resource occur, the contractor or consultant, as appropriate, shall immediately notify the project applicant. Any historic resource(s) damaged as a result of project activities shall be remediated to their pre-construction condition at the conclusion of ground-disturbing activity on the site. The consultant shall submit monthly monitoring reports, which shall include photographs from site inspections and reports of any observed damage, to the project applicant for the duration of monitoring activity. This mitigation measure may be implemented in combination with required mitigation measures for vibration, as appropriate.

Impact 3.3-2: Cause a Substantial Adverse Change in the Significance of Unique Archaeological Resources

Findings

Changes or alterations, which substantially reduce the impacts to significant archaeological resources have been required in, or incorporated into, the Specific Plan by the City of Sacramento; however, these would not be sufficient to reduce the impact to less than significant. Specific social, economic, and environmental benefits of the Specific Plan outweigh the identified potential unavoidable significant impacts. See Section 2, "Statement of Overriding Considerations," below.

Facts in Support of Findings

Implementation of Mitigation Measures 3.3-2a to 3.3-2c would help reduce the significance of impacts to archeological resources through compliance with General Plan policies, conducting archaeological survey prior to construction, and taking actions to identify unanticipated discoveries. However, because there is no feasible mitigation available to ensure that the loss, damage or destruction of significant archeological resources would occur, the impact would be significant and unavoidable. (Draft EIR pages 3.3-14 and 3.3-15)

Mitigation Measure

Mitigation Measure 3.3-2a: Regulations and Best Practices

The City shall implement 2040 General Plan Policy HCR-1.14:

- Archaeological, Tribal, and Cultural Resources. The City shall continue to comply with federal and State regulations and best practices aimed at protecting and mitigating impacts to archaeological resources and the broader range of cultural resources as well as tribal cultural resources. (2040 General Plan Policy HCR-1.14)

Mitigation Measure 3.3-2b: Conduct Archaeological Survey Prior to Construction

The City shall include the following policy in the Specific Plan:

- **Policy CR-1**: Upon direction of the City Preservation Director, the City shall require archaeological resources surveys for projects that include ground disturbance.

Mitigation Measure 3.3-2c: Identify Unanticipated Discoveries

The City shall include the following implementation action for the above policy in the Specific Plan:

- **Action CR-A1:** In the event that archaeological resources or human remains are encountered during construction, work within 100 feet of the discovery shall cease until a notice to proceed is issued by the City. The applicant shall notify the City of Sacramento Manager of Environmental Planning Services or the City Preservation Director and shall comply with City direction, and federal and State regulations and guidelines regarding the treatment of cultural resources and human remains. The Coroner shall be notified in the event human remains are discovered; the applicant shall be responsible for the employment of a qualified archaeologist to advise regarding treatment of any artifacts

Impact 3.3-4: Potential for the Implementation of the Specific Plan, in Combination with Other Development, to Contribute to a Significant Cumulative Impacts to Cultural Resources

Findings

Changes or alterations, which substantially reduce the cumulative effects to cultural resources have been required in, or incorporated into, the Specific Plan by the City of Sacramento; however, these would not be sufficient to reduce the impact to less than significant. Specific social, economic, and environmental benefits of the Specific Plan outweigh the identified potential unavoidable significant impacts. See Section 2, "Statement of Overriding Considerations," below.

Facts in Support of Findings

As noted in Impacts 3.3-1 and 3.3-2, Mitigation Measures 3.3-1a through 3.3-1h and 3.3-2a through 3.3-2c would reduce historical resources and archaeological resources impacts. However, because there is no feasible mitigation available to ensure the loss, damage or destruction of significant historic and archeological resources would not occur, the Specific Plan's contribution to this cumulative impact is significant and unavoidable. (Draft EIR page 3.3-16)

Mitigation Measure

No additional feasible mitigation is available to reduce the Specific Plan's contribution to less than cumulatively considerable.

NOISE AND VIBRATION

Impact 3.7-3: Exposure of Existing Sensitive Receptors to Project-Generated Traffic Noise

Findings

Changes or alterations, which substantially reduce the impacts to traffic noise have been required in, or incorporated into, the Specific Plan by the City of Sacramento; however, these would not be sufficient to reduce the impact to less than significant. Specific social, economic, and environmental benefits of the Specific Plan outweigh the identified potential unavoidable significant impacts. See Section 2, "Statement of Overriding Considerations," below.

Facts in Support of Findings

Implementation of Mitigation Measure 3.7-3 would help reduce the significance of impacts related to traffic noise through compliance with General Plan policies. Specifically, Policy ERC10.1 (Exterior Noise Standards) would require mitigation at the project level for development which would exceed the General Plan's Noise Compatibility standards; Policy ERC-10.3 (Interior Noise Standards) would require new development to attenuate interior noise levels to appropriate levels; and Policy ERC-10.8 would encourage the use of alternative pavement materials, which would reduce vehicular noise generation. Although the implementation of Mitigation Measure 3.7-3 would reduce traffic noise to the extent feasible, it is not possible to guarantee that long-term traffic noise associated with development under the Specific Plan would be reduced below the applicable thresholds. Therefore, this impact would be significant and unavoidable. (Draft EIR pages 3.7-26 through 3.7-30)

Mitigation Measure

Mitigation Measure 3.7-3: Implement 2040 General Plan Policies

- Exterior Noise Standards. The City shall require noise mitigation for all development where the projected exterior noise levels exceed those shown in Table ERC-1 [shown as Table 3.7-2 in this EIR], to the extent feasible. (2040 General Plan Policy ERC-10.1)
- Interior Noise Standards. The City shall require new development to include noise attenuation to assure acceptable interior noise levels appropriate to the land use, as follows:
  - 45 dB L_{dn} for residential, transient lodgings, hospitals, nursing homes, and other uses where people normally sleep; and
  - 45 dB L_{eq} (peak hour with windows closed) for office buildings and similar uses. (2040 General Plan Policy ERC-10.3)
- Alternative Paving Materials. The City shall continue to explore opportunities to use alternative pavement materials such as rubberized asphalt and porous pavement on residential roadways in order to reduce noise generation, extend maintenance cycles, and improve air quality and stormwater management. (2040 General Plan Policy ERC-10.8)

Impact 3.7-5: Potential for Implementation of the Specific Plan, in Combination with Other Development, to Contribute to a Significant Cumulative Noise Impact

Findings

Changes or alterations, which substantially reduce the cumulative noise impacts have been required in, or incorporated into, the Specific Plan by the City of Sacramento; however, these would not be sufficient to reduce the impact to less than significant. Specific social, economic, and environmental benefits of the Specific Plan outweigh the identified potential unavoidable significant impacts. See Section 2, “Statement of Overriding Considerations,” below.

Facts in Support of Findings

As noted in Impact 3.7-3, Mitigation Measure 3.7-3 would reduce traffic noise impacts. However, it is not possible to guarantee that long-term traffic noise associated with development under the Specific Plan would be reduced below the applicable thresholds. Therefore, the Specific Plan’s contribution to this cumulative impact is significant and unavoidable. (Draft EIR page 3.7-31 and 3.7-32)

Mitigation Measure

No additional feasible mitigation is available to reduce the Specific Plan’s contribution to less than cumulatively considerable.

TRANSPORTATION AND CIRCULATION

Impact 3.9-1: Result in VMT Impacts on the Roadway System

Findings

Changes or alterations, which substantially reduce VMT impacts have been required in, or incorporated into, the Specific Plan by the City of Sacramento; however, these would not be sufficient to reduce the impact to less than significant. Specific social, economic, and environmental benefits of the Specific Plan outweigh the identified potential unavoidable significant impacts. See Section 2, “Statement of Overriding Considerations,” below.

Facts in Support of Findings

Implementation of Mitigation Measures 3.9-1a and 3.9-1b would reduce VMT impacts by instituting a Transportation Demand Management (TDM) plan and contributing to the construction of infrastructure and facilitation of programs associated with the reduction of vehicle trips generated by the Specific Plan. However, even with TDM strategy implementation, the Specific Plan's passenger vehicle VMT would likely exceed the threshold of 34.22 personal vehicle VMT per capita. Due to uncertainties regarding the ability for the mitigation measure to reduce VMT to a less-than-significant level, as well as TDM being dependent on individual property owners and tenants, the impact would remain significant and unavoidable. (Draft EIR pages 3.9-16 through 3.9-21)

Mitigation Measure

Mitigation Measure 3.9-1a: Project applicants shall prepare and implement a Transportation Demand Management (TDM) Plan to guide implementation of TDM strategies for development, as outlined below.

Prior to issuance of building permits, future projects shall submit to the City either a project-specific transportation analysis that demonstrates that the project would obtain the City's VMT reduction target or a TDM Plan. Both documents shall be subject to review and approval by the City of Sacramento Department of Public Works. The TDM Plan shall be designed to reduce passenger vehicle VMT per capita to 34.22 (a 16.8-percent reduction from baseline passenger vehicle VMT per capita) or as close as deemed feasible by the City. The TDM Plan shall contain VMT reduction strategies identified in the Handbook for Analyzing Greenhouse Gas Emission Reductions, Assessing Climate Vulnerabilities, and Advancing Health and Equity (California Air Pollution Control Officers Association [CAPCOA] 2021) or an equivalent reference where the effectiveness of strategies is supported by substantial evidence.

The TDM Plan may include, but would not be limited to, the CAPCOA strategies listed in Table 3.9-3.

Table 3.9-3 Applicable CAPCOA Strategies

Category	Measure	Strategy Description	VMT Mitigation Reduction Potential
Land Use	T-1	Increase Residential Density	0 – 30.0 percent of GHG emissions from project VMT in Specific Plan Area, based upon how much the residential density of project exceeds 9.1 DU/acre
	T-2	Increase Job Density	0 – 30.0 percent of GHG emissions from project VMT in the Specific Plan Area, based upon job density of project development
	T-3	Provide Transit Oriented Development	6.9 – 31.0 percent of GHG emissions from project VMT in Specific Plan Area, based upon existing transit mode share in the city
	T-4	Integrate Affordable and Below Market Rate Housing	0 – 28.6% of GHG emissions from project multifamily residential VMT, based upon percent of multifamily units dedicated as affordable
Neighborhood Design	T-19A	Construct or Improve Bike Facility	0 – 0.8 percent of GHG emissions from vehicles on parallel roadways, based upon percent of plan VMT that occurs on the parallel roadway, number of key destinations near project, and facility type
	T-20	Expand Bikeway Network	0 – 0.5 percent of GHG emissions from vehicle travel in the community, based on trip lengths and mode share
	T-21-A/B	Implement Carshare Program (Conventional or Electric)	0 – 0.18 percent of GHG emissions from vehicle travel in the community, based upon number and type of vehicles deployed and project VMT

Category	Measure	Strategy Description	VMT Mitigation Reduction Potential
	T-22-A/B/C	Implement Bikeshare or Scootershare Program (Pedal or Electric)	0 – 0.07 percent of GHG emissions from vehicle travel in the community, based upon proximity to share stations
Trip Reduction Programs	T-23	Provide Community-Based Travel Planning	0 – 2.3 percent of GHG emissions from vehicle travel in the community, based upon residences in community
Parking or Road Pricing/ Management	T-24	Implement Market Price Public Parking (On-Street)	0 – 30 percent of GHG emissions from vehicle travel in the community, based upon VMT in the area without the measure, parking prices, and trips parking on the street
Transit	T-25	Extend Network Coverage or Hours	0 – 4.6 percent of GHG emissions from vehicle travel in the community, based upon transit service miles or hours in community before expansion
	T-26	Increase Transit Service Frequency	0 – 11.3 percent of GHG emissions from vehicle travel in the community, based upon increase in transit frequency, level of implementation, and mode share
	T-27	Implement Transit-Supportive Roadway Treatments	0 – 0.6 percent of GHG emissions from vehicle travel in the community, based upon percent of transit routes that receive treatments
	T-28	Provide Bus Rapid Transit	0 – 13.8 percent of GHG emissions from vehicle travel in the community, based upon increase in transit frequency due to BRT and level of implementation
	T-29	Reduce Transit Fares	0 – 1.2 percent of GHG emissions from vehicle travel in the community, based upon reduction in fare and percent of routes with reduced fares

Sources: *Handbook for Analyzing Greenhouse Gas Emission Reductions, Assessing Climate Vulnerabilities, and Advancing Health and Equity* CAPCOA 2021, Fehr & Peers 2023.

Mitigation Measure 3.9-1b: Project applicants shall contribute to the City of Sacramento's development impact fee program an amount determined by City, subject to the following conditions:

- The contribution will only apply towards improvement projects that demonstrate VMT reduction potential per CAPCOA.
- The contribution, when combined with the other fee revenue and city revenues, shall be sufficient to construct the applicable improvements prior to build-out of the proposed Specific Plan.

Impact 3.9-2: Impacts to Transit Facilities, Services, or Access

Findings

Changes or alterations, which substantially reduce the impacts to transit facilities, services, and access have been required in, or incorporated into, the Specific Plan by the City of Sacramento; however, these would not be sufficient to reduce the impact to less than significant. Specific social, economic, and environmental benefits of the Specific Plan outweigh the identified potential unavoidable significant impacts. See Section 2, "Statement of Overriding Considerations," below.

Facts in Support of Findings

Implementation of Mitigation Measures 3.9-2a and 3.9-2b would reduce the significance of impacts to transit facilities, services, and access by monitoring transit service performance and implementing strategies to improve transit performance. However, the improvements that are necessary to improve transit performance would require implementation by SacRT. Moreover, the effectiveness of the TDM

strategies identified in Mitigation Measure 3.9-2a are not known and subsequent vehicle trip reduction effects and, in turn, reductions to delays to transit, cannot be guaranteed. In addition, note that SacRT has indicated that "the transit performance improvements identified in these mitigation measures may be possible with sufficient funding," which may increase as a result of the "population growth associated with the implementation of this "Specific Plan." (Final EIR page 2-24) Since the City of Sacramento cannot guarantee that these improvements would be implemented and/or effective, this impact would remain significant and unavoidable. (Draft EIR pages 3.9-21 through 3.9-23)

Mitigation Measure

Mitigation Measure 3.9-2a: Monitor transit service performance and implement strategies to minimize delays to transit service.

The City of Sacramento shall coordinate with SacRT and other relevant transit operators to establish baseline on-time performance metrics for routes operating on Stockton Boulevard in the vicinity of the Specific Plan Area consistent with established standards and methods.

Mitigation Measure 3.9-2b: Monitor transit service performance and implement transit service and/or facility improvements.

The City of Sacramento shall coordinate with SacRT and other relevant transit operators to establish baseline transit performance (i.e., loading, productivity, and on-time performance) and safety metrics for routes operating within the vicinity of the Specific Plan Area consistent with established standards and methods.

Impact 3.9-5: Potential for the Implementation of the Specific Plan, in Combination with Other Development, to Contribute to a Significant Cumulative Impacts to Transportation and Circulation System

Findings

Changes or alterations, which substantially reduce the cumulation impacts to transportation and circulation system have been required in, or incorporated into, the Specific Plan by the City of Sacramento; however, these would not be sufficient to reduce the impact to less than significant. Specific social, economic, and environmental benefits of the Specific Plan outweigh the identified potential unavoidable significant impacts. See Section 2, "Statement of Overriding Considerations," below.

Facts in Support of Findings

As noted in Impacts 3.9-1 and 3.9-2, Mitigation Measures 3.9-1a, 3.9-1b, 3.9-2a, and 3.9-2b would reduce impacts related to VMT and transit facilities, services and access but not to a less-than-significant level. Therefore, the Specific Plan's contribution to cumulative transportation and circulation impacts would be cumulatively considerable, and impacts would be significant and unavoidable. (Draft EIR pages 3.9-24 and 3.9-25)

Mitigation Measure

No additional feasible mitigation is available to reduce the Specific Plan's contribution to less than cumulatively considerable.

TRIBAL CULTURAL RESOURCES

Impact 3.10-1: Cause a Substantial Adverse Change in the Significance of a TCR

Findings

Changes or alterations, which substantially reduce the impacts to tribal cultural resources have been required in, or incorporated into, the Specific Plan by the City of Sacramento; however, these would not be sufficient to reduce the impact to less than significant. Specific social, economic, and environmental benefits of the Specific Plan outweigh the identified potential unavoidable significant impacts. See Section 2, "Statement of Overriding Considerations," below.

Facts in Support of Findings

Mitigation Measures 3.10-1a through 3.10-1c would help reduce the significance of impacts to tribal cultural resources by implementing discovered cultural resources protection measures and implementing 2040 General Plan policies related to cultural and tribal cultural resources protection. However, because there is no feasible mitigation available to ensure damage or destruction of a tribal cultural resource would not occur, the impact remains significant and unavoidable. (Draft EIR pages 3.10-7 through 3.10-10)

Mitigation Measure

Mitigation Measure 3.10-1a: Protect Discovered Tribal Cultural Resources

If any suspected tribal cultural resources (such as unusual amounts of bone or shell, artifacts, or human remains) are encountered at the project site during construction, work shall be suspended within 100 feet of the find (based on the apparent distribution of cultural materials), and the construction contractor shall immediately notify the project's City representative. Avoidance and preservation in place is the preferred manner of mitigating impacts to tribal cultural resources. This will be accomplished, if feasible, by several alternative means, including:

- Planning construction to avoid tribal cultural resources and/or archaeological sites; incorporating these resources within parks, green-space or other open space; covering archaeological resources; deeding a tribal cultural resource to a permanent conservation easement; or other preservation and protection methods agreeable to consulting parties and regulatory authorities with jurisdiction over the activity.

- Recommendations for avoidance of tribal cultural resources will be reviewed by the City representative, interested culturally affiliated Native American tribes, and other appropriate agencies, in light of factors such as costs, logistics, feasibility, design, technology and social, cultural and environmental considerations, and the extent to which avoidance is consistent with project objectives. Avoidance and design alternatives may include realignment within the project site to avoid cultural resources, modification of the design to eliminate or reduce impacts to tribal cultural resources or modification or realignment to avoid highly significant features within a tribal cultural resource.

- Native American representatives from interested culturally affiliated Native American tribes will be invited to review and comment on these analyses and shall have the opportunity to meet with the City representative and its representatives who have technical expertise to identify and recommend feasible avoidance and design alternatives, so that appropriate and feasible avoidance and design alternatives can be identified.

- If the discovered tribal cultural resource can be avoided, the construction contractor(s), will install protective fencing outside the site boundary, including a 100-foot buffer area, before construction restarts. The boundary of a tribal cultural resource will be determined in consultation with interested culturally affiliated Native American tribes and tribes will be invited to monitor the installation of fencing. Use of temporary and permanent forms of protective fencing will be determined in consultation with Native American representatives from interested culturally affiliated Native American tribes.

- The construction contractor(s) will maintain the protective fencing throughout construction to avoid the site during all remaining phases of construction. The area will be demarcated as an "Environmentally Sensitive Area."

If a tribal cultural resource cannot be avoided, the following performance standard shall be met prior to continuance of construction and associated activities that may result in damage to or destruction of tribal cultural resources:

- Each resource will be evaluated for California Register of Historical Resources (CRHR) eligibility through application of established eligibility criteria (California Code of Regulations 15064.636), in consultation with consulting Native American Tribes, as applicable.

If a cultural resource or a tribal cultural resource is determined to be eligible for listing in the CRHR, the City will avoid damaging effects to the resource in accordance with California PRC Section 21084.3, if feasible. The City will coordinate the investigation of the find with a qualified archaeologist (meeting the Secretary of the Interior's Professional Qualifications Standards for Archeology) approved by the City and with interested culturally affiliated Native American tribes that respond to the City's invitation. As part of the site investigation and resource assessment, the City and the archaeologist shall consult with interested culturally affiliated Native American tribes to assess the significance of the find, make recommendations for further evaluation and treatment as necessary and provide proper management recommendations should potential impacts to the resources be determined by the City to be significant. A written report detailing the site assessment, coordination activities, and management recommendations will be provided to the City representative by the qualified archaeologist. These recommendations will be documented in the project record. For any recommendations made by interested culturally affiliated Native American tribes that are not implemented, a justification for why the recommendation was not followed will be provided in the project record.

Native American representatives from interested culturally affiliated Native American Tribes and the City representative will also consult to develop measures for long-term management of any discovered tribal cultural resources. Consultation will be limited to actions consistent with the jurisdiction of the City and taking into account ownership of the subject property. To the extent that the City has jurisdiction, routine operation and maintenance within tribal cultural resources retaining tribal cultural integrity shall be consistent with the avoidance and minimization standards identified in this mitigation measure.

If the City determines that the project may cause a significant impact to a tribal cultural resource, and measures are not otherwise identified in the consultation process, the following are examples of mitigation capable of avoiding or substantially lessening potential significant impacts to a tribal cultural resource or alternatives that would avoid significant impacts to the resource. These measures may be considered to avoid or minimize significant adverse impacts and constitute the standard by which an impact conclusion of less-than significant may be reached:

- Avoid and preserve resources in place, including, but not limited to, planning construction to avoid the resources and protect the cultural and natural context to incorporate the resources with culturally appropriate protection and management criteria.

- Treat the resource with culturally appropriate dignity taking into account the Tribal cultural values and meaning of the resource, including, but not limited to, the following:
    - Protect the cultural character and integrity of the resource.
    - Protect the traditional use of the resource.
    - Protect the confidentiality of the resource.
    - Establish permanent conservation easements or other interests in real property, with culturally appropriate management criteria for the purpose of preserving or using the resources or places.
    - Protect the resource.

Mitigation Measure 3.10-1b: Protect Discovered Human Remains

If an inadvertent discovery of human remains is made at any time during project-related construction activities or project planning, the City the following performance standards shall be met prior to implementing or continuing actions such as construction, which may result in damage to or destruction of human remains. In accordance with the California Health and Safety Code (HSC), if human remains are encountered during ground-disturbing activities, the City shall immediately halt potentially damaging excavation in the area of the remains and notify the Sacramento County Coroner and a professional archaeologist to determine the nature of the remains. The Coroner is required to examine all discoveries of human remains within 48 hours of receiving notice of a discovery on private or State lands (HSC Section 7050.5[b]).

If the human remains are of historic age and are determined to be not of Native American origin, the City will follow the provisions of the HSC Section 7000 (et seq.) regarding the disinterment and removal of non-Native American human remains.

If the Coroner determines that the remains are those of a Native American, he or she must contact the Native American Heritage Commission (NAHC) by phone within 24 hours of making that determination (HSC Section 7050[c]). After the Coroner's findings have been made, the archaeologist and the NAHC-designated Most Likely Descendant (MLD), in consultation with the landowner, shall determine the ultimate treatment and disposition of the remains. The responsibilities of the City for acting upon notification of a discovery of Native American human remains are identified in California PRC Section 5097.9 et seq.

Mitigation Measure 3.10-1c: Implement 2040 General Plan Policies

- Early Project Consultation. The City will continue to strive to minimize impacts to historic and cultural resources by consulting with property owners, land developers, tribal representatives, and the building industry early in the development review process as needed. (2040 General Plan Policy HCR-1.6)
- Indigenous Cultures. The City shall seek ways to recognize the peoples who first lived in, traveled, and traded in what is now the Sacramento area, by working with tribal representatives to preserve their identity, culture, and artifacts. Methods for recognizing tribal history and imagery may include, but are not limited to, the following:
    - Public art that provides a Native American perspective including works by Native artists;
    - Naming of parks and places that reflects local Native American heritage and/or restores tribal names;

  - Parks and recreation programming that increases awareness of tribal heritage and culture (including through interpretive displays) and allows opportunities for craft sharing;
  - Incorporation of traditional native plants into landscape design palettes. (2040 General Plan Policy HCR-1.13)

- Archaeological, Tribal, and Cultural Resources. The City shall continue to comply with federal and State regulations and best practices aimed at protecting and mitigating impacts to archaeological resources and the broader range of cultural resources as well as tribal cultural resources. (2040 General Plan Policy HCR-1.14)
- Treatment of Native American Human Remains. The City shall treat Native American human remains with sensitivity and dignity and ensure compliance with the associated provisions of California Health and Safety Code and the California Public Resources Code. The City shall collaborate with the most likely descendants identified by the Native American Heritage Commission. (2040 General Plan Policy HCR-1.15)
- Endemic Traditions. The City shall seek ways to recognize the endemic traditions of various communities in Sacramento, including African American, Hispanic, Native, and Asian American communities, to promote the retention of Sacramento's intangible cultural heritage, which may include oral traditions, performing arts, social practices and festive events, legacy businesses, knowledge and practices concerning nature and the universe, and traditional craftsmanship. (2040 General Plan Policy HCR-1.16)
- Evaluation of Archeological Resources. The City shall work in good faith with interested communities to evaluate proposed development sites for the presence of sub-surface historic, archaeological, and tribal cultural resources that may be present at the site. These efforts may include the following:
  - Consideration of existing reports and studies,
  - Consultation with Native American tribes as required by State law,
  - Appropriate site-specific investigative actions, and
  - Onsite monitoring during excavation if appropriate. (2040 General Plan Policy HCR-1.17)

Impact 3.10-2: Potential for the Project, in Combination with Other Development, to Contribute to a Significant Cumulative Impact to Tribal Cultural Resources

Findings

Changes or alterations, which substantially reduce the cumulative impacts to tribal cultural resources have been required in, or incorporated into, the Specific Plan by the City of Sacramento; however, these would not be sufficient to reduce the impact to less than significant. Specific social, economic, and environmental benefits of the Specific Plan outweigh the identified potential unavoidable significant impacts. See Section 2, "Statement of Overriding Considerations," below.

Facts in Support of Findings

As noted in Impact 3.10-1, implementation of Mitigation Measures 3.10-1a through 3.10-1c would help reduce the significance of the impact. However, because there is no feasible mitigation available to ensure damage or destruction of a tribal cultural resource would not occur, the cumulative impact would remain significant and unavoidable. (Draft EIR pages 3.10-10 and 3.10-11)

Mitigation Measure

No additional feasible mitigation is available to reduce the Specific Plan's contribution to less than cumulatively considerable.

1.4.4 Project Alternatives

PRC Section 21002 provides that "public agencies should not approve projects as proposed if there are feasible alternatives or feasible mitigation measures available which would *substantially lessen* the significant environmental effects of such projects[.]" (PRC, Section 21002, italics added.) The same statute states that the procedures required by CEQA "are intended to assist public agencies in systematically identifying both the significant effects of proposed projects and the feasible alternatives or feasible mitigation measures which will *avoid or substantially lessen* such significant effects." (*Ibid*., italics added.) Section 21002 goes on to state that "in the event [that] specific economic, social, or other conditions make infeasible such project alternatives or such mitigation measures, individual projects may be approved in spite of one or more significant effects." (*Ibid*.)

CEQA defines "feasible" to mean "capable of being accomplished in a successful manner within a reasonable period of time, taking into account economic, environmental, social and technological factors." (PRC, Section 21061.1.) The State CEQA Guidelines add another factor: "legal" considerations. (State CEQA Guidelines, Section 15364; see also *Citizens of Goleta Valley v. Board of Supervisors* (1990) 52 Cal.3d 553, 565 (*Goleta II*).) Among the factors that may be taken into account when addressing the feasibility of alternatives are site suitability, economic viability, availability of infrastructure, general plan consistency, other plans or regulatory limitations, jurisdictional boundaries, and whether the proponent can reasonably acquire, control or otherwise have access to the alternative site. (State CEQA Guidelines, Section 15126.6, subd. (f)(1).) The concept of "feasibility" also encompasses the question of whether a particular alternative or mitigation measure promotes the underlying goals and objectives of a project. (*City of Del Mar v. City of San Diego* (1982) 133 Cal.App.3d 410, 417.)

Where a significant impact can be substantially lessened (i.e., mitigated to an "acceptable level") solely by the adoption of mitigation measures, the lead agency, in drafting its findings, has no obligation to consider the feasibility of alternatives with respect to that impact, even if the alternative would mitigate the impact to a greater degree than the project. (PRC, Section 21002; *Laurel Hills Homeowners Association v. City Council* (1978) 83 Cal.App.3d 515, 521; see also *Kings County Farm Bureau v. City of Hanford* (1990) 221 Cal.App.3d 691, 730-731; and *Laurel Heights Improvement Association v. Regents of the University of California* (1988) 47 Cal.3d 376, 400-403.) In short, CEQA requires that the lead agency adopt mitigation measures or alternatives, where feasible, to substantially lessen or avoid significant environmental impacts that would otherwise occur. Project modification or alternatives are not required, however, where such changes are infeasible or where the responsibility of modifying the project lies with some other agency. (State CEQA Guidelines, Section 15091, subds. (a), (b).)

The City Council has considered the project alternatives presented and analyzed in the EIR. Some of these alternatives have the potential to avoid or reduce certain significant or potentially significant environmental impacts, as set forth below. The City Council finds that it considered a reasonable range of potentially feasible alternatives consistent with State CEQA Guidelines Section 15126.6, subdivision (f).

The City Council finds, based on specific economic, legal, social, technological, or other considerations, that these alternatives are infeasible. Based on the impacts identified in the EIR and other reasons summarized below, and as supported by substantial evidence in the record, the City Council finds that approval and implementation of the Specific Plan as proposed is the most desirable, feasible, and

appropriate action and hereby rejects the other alternatives and other combinations and/or variations of alternatives as infeasible based on consideration of the relevant factors set forth in State CEQA Guidelines Section 15126.6, subdivision (f). (See also State CEQA Guidelines, Section 15091, subd. (a)(3).) Each alternative and the facts supporting the finding of infeasibility of each alternative are set forth below.

ALTERNATIVES CONSIDERED AND DISMISSED FROM FURTHER CONSIDERATION

In identifying alternatives to the Specific Plan, primary consideration was given to alternatives that could reduce significant unavoidable impacts resulting from the Specific Plan while still obtaining the Specific Plan's objectives. The following alternatives were considered but rejected for the reasons discussed below:

Enhanced VMT Land Use Scenario

The Enhanced VMT Land Use Scenario Alternative would involve changing the land use configuration to shorten trip lengths and reduce trip generation, which would reduce VMT impacts. This approach typically involves a greater focus on mixed-use development to place jobs and retail closer to residences. The proposed Specific Plan envisions mixed-use use development almost exclusively throughout the Plan Area. Because the Specific Plan already maximizes mixed use, there are no opportunities for modifying the land use scenario to better maximize VMT efficiency. Therefore, this potential alternative was dismissed for further consideration.

Reduced Residential

A slight reduction in transportation noise may be achieved by reducing the number of residential units allowed. To achieve meaningful reduction in transportation noise generation, a major decrease in trip generation is necessary. A Reduced Residential Alternative that could achieve the project's objectives related to residential capacity would not likely reduce the project's significant impact related to transportation noise to a less-than-significant level. Further, reducing the number of residential units would be contrary to basic principles of the 2040 General Plan. The General Plan encourages residential development in established corridors, and Stockton Boulevard within the Specific Plan Area. In addition, state law, including the Housing Accountability Act and the Housing Crisis Act prohibit reduction of density in particular cases; therefore, this alternative may be contrary to state law. This alternative is considered infeasible.

Employment-Focused Land Use Scenario

Increasing residential density and prioritizing mixed-use development in areas that are well-served by public transit generally translates to increased VMT efficiency; however, it is possible that expanding commercial uses with high employment generation potential near existing residential uses could also result in greater VMT efficiency, due to reduced trip length. Such uses could include office, light-industrial/manufacturing, or heavy industrial. The Employment-Focused Land Use Scenario Alternative would include increased employment-generating uses. However, this alternative would not be consistent with the land uses identified in the 2040 General Plan. In addition, increased industrial and commercial use in the Specific Plan Area could result in issues related to environmental justice, especially related to increases in heavy trucks and associated emissions. Although expanding employment generating uses could result VMT efficiencies, it is unlikely that the VMT efficiency would be substantially greater than the proposed Specific Plan; therefore, it is unlikely that this alternative would substantially reduce or avoid the significant VMT impact associated with the Specific Plan. In

addition, this alternative would not achieve several project objectives related to housing. For all of these reasons, this alternative was dismissed from further evaluation.

Reduced Historic Resources Impacts

Implementation of the Specific Plan would result in a significant impact related to historic resources. The Reduced Historic Resources Impacts Alternative would avoid the significant impact to historic resources through placing a prohibition on demolition of any structure that is listed or eligible for listing on the State or National registers. However, this alternative was dismissed, as its legality is questionable. The City may not have legal authority to place a blanket prohibition on demolition of privately-owned structures across an entire plan area; typically, proposed demolition of these structures involves a discretionary approval process, not outright prohibition. Also, some structures may require demolition for public health and safety purposes. Therefore, this alternative was dismissed, due to likely infeasibility.

ALTERNATIVES CONSIDERED IN THE DRAFT EIR

The alternatives considered in the EIR are:

- **Alternative 1: No Project-Planned Land Use.** Alternative 1 assumes a specific plan would not be approved and development in the plan area would occur according to the 2040 General Plan.
- **Alternative 2: Enhanced Transit.** Alternative 2 would reduce the Specific Plan's significant impacts related to VMT. This alternative would further reduce reliance on automobiles by enhancing transit facilities beyond the improvements identified in the Corridor Study.

Alternative 1: No Project-Planned Land Use

Under Alternative 1, the Stockton Boulevard Plan would not be approved and the primary land use plan guiding development in the Specific Plan Area would be the currently adopted 2040 General Plan. The proposed Stockton Boulevard Plan is designed to be consistent with the land use designations identified in the 2040 General Plan for the Specific Plan Area; therefore, under the No Project Alternative, buildout of the project area would be identical to the project in terms of the type and arrangement of land uses. Alternative 1 would not reduce impacts as compared to the project.

Facts in Support of Finding of Infeasibility

Both the 2040 General Plan and the proposed Specific Plan identify the same area for urban development. Therefore, impacts associated with ground disturbance would be practically identical between Alternative 1 and the Specific Plan, including impacts related to cultural resources, tribal cultural resources, biological resources, construction-related hazardous materials, construction-generated water pollutant emissions, and tribal cultural resources. Operational impacts would also be nearly identical because the types of land use allowed within the 2040 General Plan and the proposed Specific Plan are essentially identical. Therefore, because the only difference in the level of impact would relate to potential timing of development due to streamlining and funding associated with the project, which would be unavailable under Alternative 1, overall impacts resulting from Alternative 1 would be similar to those associated with the project.

Development under the Alternative 1 would not receive some of the regulatory streamlining that would be available under the project, including the level of discretionary review, as well as additional CEQA streamlining (i.e., under Section 15182). Alternative 1 would also not include the same level of integrated infrastructure planning associated with the Specific Plan. It would also not include the same level of public input and coordination as the proposed Specific Plan. In addition, public and private

funding opportunities, including grants, bonds, and incentives targeted at planned developments, would not be as likely available under Alternative 1. These financial mechanisms can accelerate development by providing necessary capital up front or by making projects more economically viable from the outset. Therefore, Alternative 1 is rejected due to economic infeasibility.

Alternative 2: Enhanced Transit

Alternative 2 would include improvements (beyond those identified in the Corridor Study) consistent with the Stockton Boulevard Multimodal Partnership and Bus Rapid Transit (BRT) Corridor—a project submitted in early 2023 for SACOG's Transformative Grant Program. This project would be a multi-agency endeavor involving the City, County, Sacramento Regional Transit, and Sacramento Transportation Authority. Specifically, the project would include transit improvements along BRT Route 51, including BRT-lite treatments, BRT station shelters and amenities, traffic signal priority, intelligent transportation system equipment, zero emission vehicle and related infrastructure needs, as well as complete streets safety and mobility improvements on Stockton Boulevard. Other than these improvements, the land use types and intensities are identical to the proposed project.

Facts in Support of Finding of Infeasibility

Because the only difference between the alternative and the project is the further enhancement of transit facilities, the only potential project-related significant impacts that could be reduced by the alternative are those associated with VMT, specifically, air quality, noise, and transportation. The alternative would not result in any new or more severe significant impacts. The Enhanced Transit Alternative would meet the project objectives; however, because the Stockton Boulevard Multimodal Partnership and BRT Corridor requires involvement by several separate agencies, as well as funding from a grant that has not yet been awarded, the feasibility of this alternative is currently uncertain.

ENVIRONMENTALLY SUPERIOR ALTERNATIVE

An EIR is required to identify the environmentally superior alternative from among the range of reasonable alternatives that are evaluated. Section 15126.6 (e)(2) of the State CEQA Guidelines requires that an environmentally superior alternative be designated and states that if the environmentally superior alternative is the No Project alternative, the EIR also is required to identify an environmentally superior alternative among the other alternatives.

Alternative 2: Enhance Transit would be considered the environmentally superior action alternative because although the environmental impacts would, overall, be similar to the proposed project, and no significant impacts would be completely avoided, the increased VMT efficiency would result in modest reductions to transportation-related impacts related to air quality, GHG emissions, noise, and VMT.

2 STATEMENT OF OVERRIDING CONSIDERATIONS

Pursuant to Guidelines Section 15092, the City Council finds that in approving the project it has eliminated or substantially lessened all significant and potentially significant effects of the Specific Plan on the environment, where feasible. The City Council further finds that it has balanced the economic, legal, social, technological, and other benefits of the Specific Plan against the remaining unavoidable environmental risks in determining whether to approve the Specific Plan and has determined that those benefits outweigh the unavoidable environmental risks and that those risks are acceptable. The City Council makes this Statement of Overriding Considerations in accordance with Section 15093 of the State CEQA Guidelines in support of approval of the project.

The City of Sacramento has considered the information contained in and related to the EIR for the Specific Plan (i.e., the Draft EIR, comments on the Draft EIR, responses to comments, text changes and other revisions to the EIR, and all other public comments, responses to comments, accompanying technical memoranda and staff reports, and findings included in the public record for the Specific Plan). Pursuant to State CEQA Guidelines Section 15092, the City Council finds that in approving the Specific Plan, it has eliminated or substantially lessened all significant and potentially significant effects of the Specific Plan on the environment where feasible as shown in the Findings of Fact.

The overall purpose of the Specific Plan is to provide a comprehensive guide for the integration of infill development and redevelopment to facilitate the transformation of the area along Stockton Boulevard south of downtown Sacramento by establishing goals, policies, standards, design guidelines and implementation actions. Based on the objectives identified in the EIR and administrative record, and through extensive public participation, the City Council has determined that the Stockton Boulevard Plan should be approved, and any remaining significant environmental impacts attributable to the Stockton Boulevard Plan are outweighed by the following specific economic, fiscal, social, housing and other overriding considerations. Each benefit set forth below is supported by substantial evidence in the record and constitutes an overriding consideration warranting approval of the Stockton Boulevard Plan, independent of the other benefits, despite each and every unavoidable impact.

The considerations that have been taken into account by the City Council in making this decision are identified below:

- **Achieving the City's Vision.** The Specific Plan adopts the land uses and design standards set forth in existing city documents, including the 2040 General Plan, the City's Planning and Development Code, and various design guidelines. The Stockton Boulevard Plan fulfills the City's objectives to preserve and create neighborhoods that provide a range of housing choices, economic opportunities, and safe streets that ensure neighborhoods will be inclusive and places that provide long- term health, equity, and social well-being for the entire community. The Stockton Boulevard Plan is built around a framework of values, community priorities, goals, policies, and actions. The goals reflect the desired future, in line with the anti-displacement values. The goals reveal the ideal end result when the community priorities are addressed. The policies apply only to the Specific Plan Area and are meant to direct the City's actions to achieve the end result described in the goals. The Specific Plan includes policies that generally encourage inclusive community revitalization through support for programs that improve access to housing and commercial space, which reflect the City's vision of sustainable, equitable growth and community development.

For the reasons set forth above, the City Council finds that the ability of the project to provide a policy framework for achieving the City's vision outweighs its environmental impacts.

- **Focusing Growth on Vacant and Underdeveloped Land.** The Stockton Boulevard Plan builds on goals and policies from the 2040 General Plan and encourages future growth within vacant and underutilized spaces in the Specific Plan Area. The Stockton Boulevard Plan facilitates infill development and compact development patterns by including land use policies that encourage infill development, focus on community priorities, and increase community-supportive uses of vacant parcels and buildings. The Stockton Boulevard Plan provides opportunity for future development to integrate housing with commercial, office, and entertainment uses, reducing residents' need to travel far for goods and services or jobs.

For the reasons set forth above, the City Council finds that the ability of the Stockton Boulevard Plan to focus growth on vacant and underdeveloped land, result in a more compact, higher density pattern of development, and mixed-uses in a complementary fashion outweighs its environmental impacts.

- **Providing Safe Spaces for Diverse Cultural Expression.** The Stockton Boulevard Plan encourages local residents to continue investing in their neighborhoods by expressing cultural awareness and promoting pride of ownership through local building and business owners, a vibrant art and music scene curated by local artists, and regular community events. The Stockton Boulevard Plan includes cultural, arts, and community character policies to promote streetscape beautification; celebrate and highlight historic resources of social or cultural significance; support the expansion of affordable spaces for arts; and encourage lively, safe, and accessible nightlife.

For the reasons set forth above, the City Council finds that the ability of the Stockton Boulevard Plan to provide a variety of forms of expression to celebrate diverse voices and cultures outweighs its environmental impacts

- **Providing Inclusive Economic Development Opportunities.** The Stockton Boulevard Plan promotes inclusive economic growth by including policies that support the diversity of small businesses and provide workforce training and support to nearby residents. The objective of inclusive economic growth is to create an equitable, prosperous, and resilient society for people of all backgrounds and incomes, particularly for those facing the greatest barriers, by broadly expanding economic opportunities and enhancing quality of life. Promoting inclusive economic growth also strengthens the local economy by improving economic competitiveness and fostering sustainable development.

For the reasons set forth above, the City Council finds that the ability of the Stockton Boulevard Plan to promote inclusive economic development for people of all backgrounds and incomes would result in a strong, inclusive, and equitable local economy outweighs its environmental impacts.

- **Promoting a Healthy and Safe Environment.** The Stockton Boulevard Plan includes various neighborhood-level approaches to enhance the local environment, increase community resilience, and promote a sense of safety. The plan includes policies to encourage the addition of lighting along Stockton Boulevard and promote coordination among agencies to address criminal activities.

For the reasons set forth above, the City Council finds that the ability of the Stockton Boulevard Plan to provide a healthy and safe environment to the local residents and businesses outweighs its environmental impacts.

The City Council has considered these benefits and the potentially significant unavoidable environmental effects of the project. The City Council has determined that the economic, social, technological and other benefits of the project outweigh the identified impacts. The City Council has

determined that the project benefits set forth above override the significant and unavoidable environmental costs associated with the project.

The City Council adopts the mitigation measure in the final Mitigation Monitoring Program, incorporated by reference into these Findings, and finds that any residual or remaining effects on the environment resulting from the project, identified as significant and unavoidable in the Findings of Fact, are acceptable due to the benefits set forth in this Statement of Overriding Considerations. The City Council makes this statement of overriding considerations in accordance with Section15093 of the State CEQA Guidelines in support of approval of the project.

MITIGATION MONITORING PROGRAM

INTRODUCTION

Public Resources Code Section 21081.6 and Section 15097 of the California Environmental Quality Act (CEQA) Guidelines require public agencies to establish monitoring or reporting programs for projects approved by a public agency whenever approval involves the adoption of either a mitigated negative declaration or specified environmental findings related to environmental impact reports.

The following is the Mitigation Monitoring Program (MMP) for the City of Sacramento Stockton Boulevard Plan, which was evaluated in an environmental impact report (EIR). The intent of the MMP is to track and successfully implement the mitigation measures identified within the EIR prepared for the Stockton Boulevard Plan. All of the mitigation measures requiring policy and action additions have been incorporated into the hearing draft of the Stockton Boulevard Plan and are included in Section 11.4 of the plan.

COMPONENTS OF THE MMP

The MMP describes the actions that must take place to implement the mitigation measures identified in the Stockton Boulevard Plan EIR, the timing of those actions, and the entities responsible for implementing and monitoring the actions.

The components of the attached table, which contains applicable mitigation measures, are addressed briefly, below.

Impact: This column summarizes the impact stated in the EIR.

Mitigation Measure: The mitigation measure identified in the EIR is presented and numbered according to the EIR.

Implementing Party: This item identifies the entity that will undertake the required action.

Action(s): For the mitigation measure, one or more actions are described. The actions delineate the means by which the mitigation measures will be implemented, and, in some instances, the criteria for determining whether a measure has been successfully implemented. Where mitigation measures are particularly detailed, the action may refer back to the measure.

Timing: Implementation of the action must occur prior to or during some part of project approval, project design or construction or on an ongoing basis. The timing for each measure is identified.

Monitoring and Enforcement: The City of Sacramento is primarily responsible for ensuring that mitigation measures are successfully implemented, including this mitigation measure. Within the City, a number of departments and divisions may have responsibility for monitoring some aspects of the overall project.

This page is intentionally left blank.

City of Sacramento Stockton Boulevard Plan EIR Mitigation Monitoring Program

Impact	Mitigation Measure	Implementing Party	Action(s)	Timing	Monitoring and Enforcement
Air Quality					
Impact 3.1-2: Cause Construction-Generated Criteria Air Pollutant or Precursor Emissions to Exceed SMAQMD-Recommended Thresholds	**Mitigation Measure 3.1-2: Implement 2040 General Plan Policy** The City shall ensure that construction and grading activities minimize short-term impacts to air quality by employing appropriate measures and best practices. Refer to Basic Construction Emissions Control Practices (BMPs) recommended by the Sacramento Metropolitan Air Quality Management District (SMAQMD) (2040 General Plan Policy ERC-4.5). As a condition of approval, construction contractors shall implement the following BMPs included in SMAQMD's Basic Construction Emission Control Practices: ► water all exposed surfaces two times daily. Exposed surfaces include, but are not limited to soil piles, graded areas, unpaved parking areas, staging areas, and access roads; ► cover or maintain at least two feet or free board space on haul trucks transporting soil, sand, or other loose material on the site. Any haul trucks that would be traveling along freeways or major roadways should be covered; ► use wet power vacuum street sweepers to remove any visible trackout mud or dirt onto adjacent public roads at least once a day. Use of dry power sweeping is prohibited; ► limit vehicle speeds on unpaved roads to 15 miles per hour (mph); ► complete construction of all roadways, driveways, sidewalks, parking lots as soon as possible. In addition, building pads should be laid as soon as possible after grading unless seeding or soil binders are used; ► minimize idling time either by shutting equipment off when not in use or reducing the time of idling to 5 minutes [required by California Code of Regulations, Title 13, sections 2449(d)(3) and 2485]. Provide clear signage that posts this requirement for workers at the entrances to the site; and ► maintain all construction equipment is in proper working condition according to manufacturer's specifications. The equipment must be checked by a certified mechanic and determined to be running in proper condition before it is operated.	City of Sacramento and construction contractors	City of Sacramento to include SMAQMD BMPs as a condition of approval Construction contractor to implement SMAQMD BMPs	Prior to and during construction	City of Sacramento
Impact 3.1-3: Result in a Net Increase in Long-Term Operational Criteria Air Pollutant and Precursor Emissions That Exceed SMAQMD-Recommended Thresholds	**Implement Mitigation Measure 3.5-1b (see below)**	See Mitigation Measure 3.5-1b below	See Mitigation Measure 3.5-1b below	See Mitigation Measure 3.5-1b below	See Mitigation Measure 3.5-1b below
Impact 3.1-4: Expose Sensitive Receptors to Substantial Pollutant Concentrations	**Mitigation Measure 3.1-4: Implement 2040 General Plan Policies** ► Parking Lot Shading. The City shall review and amend the Parking Lot Shading Design and Maintenance Guidelines and Parking Lot Shading Ordinance as needed to promote tree health, growth, and maintenance of trees to reduce urban heat island impacts (General Plan Policy ERC-3.11). ► Project Design. The City shall promote the incorporation of new technologies, materials, and design and construction techniques in private development projects that minimize air pollution, noise, excess heat, and other forms of pollution and its impacts. (General Plan Policy ERC-4.3). ► Sensitive Uses. The City shall consult, as appropriate, with the Sacramento Metropolitan Air Quality Management District (SMAQMD) in evaluating exposure of sensitive receptors to toxic air contaminants, and will impose conditions, as appropriate, on projects to protect public health and safety (General Plan Policy ERC-4.4). ► Air Filtration Systems: The City shall explore opportunities to accelerate the installation of air filtration systems in existing buildings in partnerships with the Sacramento Metropolitan Air Quality Management District (SMAQMD) and other partners in the Sacramento region. Schools, nursing homes, and other sensitive uses within disadvantaged communities (DACs) and areas most affected by air quality issues should be prioritized (General Plan Policy EJ-A.2) (2040 General Plan Policy ERC-4.4).	City of Sacramento	City of Sacramento to implement General Plan Polices ERC-3.11, ERC-4.3, ERC-4.4, and EJ-A.2 are implemented	On-going during implementation of the Stockton Boulevard Plan	City of Sacramento
Impact 3.1-6: Potential for the Implementation of the Specific Plan, in Combination with Other Development, to Contribute to a Significant Cumulative Air Quality or Odor Impact	**Implement Mitigation Measures 3.1-2 and 3.1-4 described above and Mitigation Measure 3.5-1b described below**	See Mitigation Measures 3.1-2 and 3.1-4 described above and Mitigation Measure 3.5-1b described below	See Mitigation Measures 3.1-2 and 3.1-4 described above and Mitigation Measure 3.5-1b described below	See Mitigation Measures 3.1-2 and 3.1-4 described above and Mitigation Measure 3.5-1b described below	See Mitigation Measures 3.1-2 and 3.1-4 described above and Mitigation Measure 3.5-1b described below

Impact	Mitigation Measure	Implementing Party	Action(s)	Timing	Monitoring and Enforcement
Biological Resources					
Impact 3.2-1: Have a Substantial Adverse Effect, Either Directly or Through Habitat Modifications, on Any Species Identified as a Candidate, Sensitive, or Special Status Species in Local or Regional Plans, Policies, or Regulations, or by CDFW or USFWS	**Mitigation Measure 3.2-1a: Avoid Direct Loss and Disturbance of Nesting Purple Martin** The City shall incorporate the following policy into the Specific Plan: ► **Policy BR-1: Purple Martin Avoidance** If vegetation removal, structure demolition, or ground disturbance is proposed between April and August, a qualified biologist shall conduct preconstruction surveys for nesting purple martin within 500 feet of the activities no more than 30 days before construction commences. A qualified biologist shall establish a non-disturbance buffer at a distance sufficient to minimize nest disturbance based on the nest location, topography, cover, the species' sensitivity to disturbance, and the intensity/type of potential disturbance. The exclusionary buffer shall remain in place until the chicks have fledged or as otherwise determined appropriate by a qualified biologist. If a purple martin nest tree, or structure, (any tree or structure that has an active nest in the year the impact is to occur) must be removed, the tree/structure shall be removed between September and March, when not occupied.	City of Sacramento	City of Sacramento to incorporate Purple martin Avoidance policy into the Stockton Boulevard Plan	Prior to approval of the Stockton Boulevard Plan	City of Sacramento
	Mitigation Measure 3.2-1b: Implement 2040 General Plan Policy ► Biological Resources. The City shall ensure that adverse impacts on sensitive biological resources, including special-status species, sensitive natural communities, sensitive habitat, and wetlands are avoided, minimized, or mitigated to the greatest extent feasible as development takes place. (2040 General Plan Policy ERC-2.2)	City of Sacramento	City of Sacramento to implement General Plan Policy ERC-2.2	On-going during implementation of the Stockton Boulevard Plan	City of Sacramento
Impact 3.2-3: Potential for the Implementation of the Specific Plan, in Combination with other Development, to Contribute to a Significant Cumulative Impact to Biological Resources	**Implement Mitigation Measures 3.2-1a and 3.2-1b described above.**	See Mitigation Measures 3.2-1a and 3.2-1b above.	See Mitigation Measures 3.2-1a and 3.2-1b above.	See Mitigation Measures 3.2-1a and 3.2-1b above.	See Mitigation Measures 3.2-1a and 3.2-1b above.
Cultural Resources					
Impact 3.3-1: Cause a Substantial Adverse Change in the Significance of a Historical Resource	**Mitigation Measure 3.3-1a: Code Enforcement** The City shall implement 2040 General Plan Policy HCR-2.5: ► Code Compliance. The City's Code Enforcement, Building, and Preservation Planning Division staff shall work collaboratively to identify historic properties under code enforcement actions and facilitate repair work that brings historic properties into compliance, consistent with preservation best practices, including utilizing the State Historical Building Code to support preservation goals. (2040 General Plan Policy HCR-2.5)	City of Sacramento	City of Sacramento to implement General Plan Policy HCR-2.5	On-going during implementation of the Stockton Boulevard Plan	City of Sacramento
	Mitigation Measure 3.3-1b: Early Consultation The City shall implement 2040 General Plan Policy HCR-1.6: ► Early Project Consultation. The City will continue to strive to minimize impacts to historic and cultural resources by consulting with property owners, land developers, tribal representatives, and the building industry early in the development review process as needed. (2040 General Plan Policy HCR-1.6)	City of Sacramento	City of Sacramento to implement General Plan Policy HCR-1.6	On-going during implementation of the Stockton Boulevard Plan	City of Sacramento
	Mitigation Measure 3.3-1c: Context Compatibility The City shall implement 2040 General Plan Policies LUP-8.10 and LUP-8.11: ► Responsiveness to Context. The City shall require building and site design that respects and responds to the local context, including use of local materials and plant species where feasible, responsiveness to Sacramento's climate, and consideration of cultural and historic context of Sacramento's neighborhoods, corridors, and centers. (2040 General Plan Policy LUP-8.10) ► Neighborhood and Transitions. The City shall ensure that development standards facilitate transitions between areas that border one another so that neighborhoods and districts maintain their own unique qualities. (2040 General Plan Policy LUP-8.11) The City shall include the following implementing action in the Specific Plan: ► **Action CR-A2**: **Avoidance or Minimization of Effects on Identified Historic Resources.** If assessment of project impacts finds that a proposed project would have a significant impact on historic resources, the project applicant shall, in consultation with City of Sacramento Planning Division staff, determine whether the project can be feasibly redesigned or revised to avoid such impacts. If avoidance of historic resource(s) is not feasible, the project applicant shall seek to reduce the effect on historic resource(s) as much as possible through project design.	City of Sacramento, Project Applicants	City of Sacramento to implement General Plan Policies LUP-8.10 and LUP-8.11 City of Sacramento to incorporate historic resources avoidance and minimization action into the Stockton Boulevard Plan	On-going during implementation of the Stockton Boulevard Plan Prior to approval of the Stockton Boulevard Plan	City of Sacramento
	Mitigation Measure 3.3-1d: Identification of Historic Resources The City shall implement 2040 General Plan Policy HCR-1.18: ► Evaluation of Potentially Eligible Built Environment Resources. The City shall continue to evaluate all buildings and structures 50 years old and older for potential historic significance prior to approving a project that would demolish or significantly alter the resource. (2040 General Plan Policy HCR-1.18) The City shall incorporate the following implementing action into the Specific Plan:	City of Sacramento, Project Applicants	City of Sacramento to implement General Plan Policy HCR-1.18	On-going during implementation of the Stockton Boulevard Plan	City of Sacramento

Impact	Mitigation Measure	Implementing Party	Action(s)	Timing	Monitoring and Enforcement
	► **Action CR-A3: Evaluate the Historic Significance of Age-Eligible Properties**. If alteration or new construction is proposed on a parcel within the Plan Area which includes a building, structure, or landscape more than 45 years old (the typical age threshold applied by the California Office of Historic Preservation), the project applicant, at the request of the City's Preservation Director, shall retain a professional who meets the Secretary of the Interior's Professional Qualifications Standards for architectural history or history (as appropriate) to conduct an evaluation of the historic significance and eligibility of buildings, structures, and landscape features on the parcel for listing on the Sacramento Register of Historic and Cultural Resources (Sacramento Register) and California Register of Historical Resources (California Register).		City of Sacramento to incorporate age-eligible properties evaluation action into the Stockton Boulevard Plan	Prior to approval of the Stockton Boulevard Plan	
	Mitigation Measure 3.3-1e: Assessing Impacts The City shall include the following implementing action in the Specific Plan: ► **Action CR-A4: Assess Project Impacts on Eligible Properties.** Projects proposing to alter buildings, structures, or landscape features found through evaluation to be eligible for listing on the California Register or National Register of Historic Places shall, at the direction of the City's Preservation Director, be evaluated for adherence to the Secretary of the Interior's Standards for the Treatment of Historic Properties. Potential direct and/or indirect effects on the identified historic resources shall be assessed according to CEQA Guidelines Section 15064.5(b).	City of Sacramento	City of Sacramento to incorporate eligible properties impact assessment action into the Stockton Boulevard Plan	Prior to approval of the Stockton Boulevard Plan	City of Sacramento
	Mitigation Measure 3.3-1f: Design Consistency The City shall implement 2040 General Plan Policy HCR-1.3: Compatibility with Historic Context. The City will continue to review new development, alterations, and rehabilitation/remodels for compatibility with the surrounding historic context and consistency with design guidelines/standards, including the Historic District Plans. The City shall pay special attention to the scale, massing, and relationship of proposed new development to complement surrounding historic environments. (2040 General Plan Policy HCR-1.3)	City of Sacramento	City of Sacramento to implement General Plan Policy HCR-1.3	On-going during implementation of the Stockton Boulevard Plan	City of Sacramento
	Mitigation Measure 3.3-1g: Demolition Mitigation The City shall implement 2040 General Plan Policy HCR-1.10: ► Demolition. Consistent with Secretary of the Interior Standards, the City shall consider demolition of historic resources as a last resort, to be permitted only if rehabilitation or adaptive reuse of the resource is not feasible; demolition is necessary to protect the health, safety, and welfare of its residents; or the public benefits outweigh the loss of the historic resource. (2040 General Plan Policy HCR-1.10) The City shall include the following implementing actions in the Specific Plan: ► **Action CR-A5: Documentation of Identified Historic Resources.** In cases where impacts to historic resources cannot be reduced through avoidance or project redesign to a less-than-significant level, the project applicant shall undertake historic documentation prior to issuance of building permits. Documentation may include completion of a Historic American Buildings Survey (HABS) Historical Report and accompanying HABS-style photographs. The appropriate level of photographic and narrative HABS documentation shall be determined by City Preservation Director based on the significance and associations of the resource. ► **Action CR-A6: Interpretive Program.** If a proposed project within the Plan Area would cause a significant impact to a historic resource, and the City Preservation Director deems that an interpretive program would be effective and feasible, the project applicant shall hire a qualified professional to develop an on-site interpretive program. An interpretive program would likely be deemed effective in cases where the resource(s) planned for alteration or demolition has particular significance to the history of Sacramento or within the community. The development of interpretive program content shall be conducted or overseen by a qualified professional who meets Secretary of the Interior's Professional Qualification Standards for history, architectural history, or architecture (as appropriate), and approved by the City of Sacramento Planning Division staff. The interpretive program shall include, at a minimum, an on-site, publicly accessible exhibit with information about the property's history, contribution to the history of the neighborhood and/or city, and relevant historic photographs or drawings.	City of Sacramento	City of Sacramento to implement General Plan Policy HCR-1.10 City of Sacramento to incorporate documentation of identified historic resources and interpretive program actions into the Stockton Boulevard Plan	On-going during implementation of the Stockton Boulevard Plan Prior to approval of the Stockton Boulevard Plan	City of Sacramento
	Mitigation Measure 3.3-1h: Protection during Construction The City shall include the following implementing actions in the Specific Plan: ► **Action CR-A7: Protection of Historic Resources During Construction.** If a project within the Plan Area proposes demolition, alteration, or new construction within 25 feet of a building, structure, or feature which has been listed on the Sacramento Register, California Register, or National Register, or found eligible through evaluation for listing on the California Register or National Register, the project applicant shall incorporate into construction specifications for the proposed project a requirement that construction contractors use all feasible means to avoid damage to adjacent and nearby historic resources. Such methods may include maintaining a safe distance between the construction site and the historic resource, using construction techniques that reduce vibration (including alternatives to jackhammers and hoe-rams where possible), appropriate excavation shoring methods to prevent movement of adjacent structures, and adequate site security to minimize risks of vandalism and fire. This measure shall apply to historic buildings, structures, and site or landscape features both within and outside of the proposed project parcel.	City of Sacramento	City of Sacramento to incorporate historic resources protection and monitoring actions into the Stockton Boulevard Plan	Prior to approval of the Stockton Boulevard Plan	City of Sacramento

Impact	Mitigation Measure	Implementing Party	Action(s)	Timing	Monitoring and Enforcement
	► **Action CR-A8: Construction Monitoring Program for Historical Resources.** If a project within the Plan Area proposes demolition, alteration, or new construction within 25 feet of a building, structure, or feature which has been listed on the Sacramento Register, California Register, or National Register, or found eligible through evaluation for listing on the California Register or National Register, the project applicant shall undertake a monitoring program to document and minimize damage to adjacent historic resources. Prior to the start of ground-disturbing project activity, the project applicant shall engage a historic architect or qualified historic preservation professional to undertake a pre-construction survey of historic resources within 25 feet of planned project activities to document and photograph existing conditions of the resource(s). The consultant shall conduct regular periodic inspections of each historic resource during ground-disturbing activity on the project site. Should damage to a historic resource occur, the contractor or consultant, as appropriate, shall immediately notify the project applicant. Any historic resource(s) damaged as a result of project activities shall be remediated to their preconstruction condition at the conclusion of ground-disturbing activity on the site. The consultant shall submit monthly monitoring reports, which shall include photographs from site inspections and reports of any observed damage, to the project applicant for the duration of monitoring activity. This mitigation measure may be implemented in combination with required mitigation measures for vibration, as appropriate.				
Impact 3.3-2: Cause a Substantial Adverse Change in the Significance of Unique Archaeological Resources	**Mitigation Measure 3.3-2a: Regulations and Best Practices** The City shall implement 2040 General Plan Policy HCR-1.14: ► Archaeological, Tribal, and Cultural Resources. The City shall continue to comply with federal and State regulations and best practices aimed at protecting and mitigating impacts to archaeological resources and the broader range of cultural resources as well as tribal cultural resources. (2040 General Plan Policy HCR-1.14)	City of Sacramento	City of Sacramento to implement General Plan Policy HCR-1.14	On-going during implementation of the Stockton Boulevard Plan	City of Sacramento
	Mitigation Measure 3.3-2b: Conduct Archaeological Survey Prior to Construction The City shall include the following policy in the Specific Plan: ► **Policy CR-1**: **Archaeological Survey Prior to Construction.** Upon direction of the City Preservation Director, the City shall require archaeological resources surveys for projects that include ground disturbance.	City of Sacramento	City of Sacramento to incorporate archaeological survey requirement policy into the Stockton Boulevard Plan	Prior to approval of the Stockton Boulevard Plan	City of Sacramento
	Mitigation Measure 3.3-2c: Identify Unanticipated Discoveries The City shall include the following implementation action for the above policy in the Specific Plan: ► **Action CR-A1: Identify Unanticipated Discoveries.** In the event that archaeological resources or human remains are encountered during construction, work within 100 feet of the discovery shall cease until a notice to proceed is issued by the City. The applicant shall notify the City of Sacramento Manager of Environmental Planning Services or the City Preservation Director and shall comply with City direction, and federal and State regulations and guidelines regarding the treatment of cultural resources and human remains. The Coroner shall be notified in the event human remains are discovered; the applicant shall be responsible for the employment of a qualified archaeologist to advise regarding treatment of any artifacts.	City of Sacramento, Project Applicant	City of Sacramento to incorporate unanticipated discoveries action into the Stockton Boulevard Plan	Prior to approval of the Stockton Boulevard Plan	City of Sacramento
Impact 3.3-4: Potential for the Implementation of the Specific Plan, in Combination with Other Development, to Contribute to a Significant Cumulative Impacts to Cultural Resources	**Implement Mitigation Measures 3.3-1a through 3.3-1h and 3.3-2a through 3.3-2c described above.**	See Mitigation Measures 3.3-1a through 3.3-1h and 3.3-2a through 3.3-2c described above	See Mitigation Measures 3.3-1a through 3.3-1h and 3.3-2a through 3.3-2c described above	See Mitigation Measures 3.3-1a through 3.3-1h and 3.3-2a through 3.3-2c described above	See Mitigation Measures 3.3-1a through 3.3-1h and 3.3-2a through 3.3-2c described above
Energy					
Impact 3.4-2: Conflict with or Obstruct a State or Local Plan for Renewable Energy or Energy Efficiency	**Mitigation Measure 3.4-2: Electric Vehicle Charging Parking** The City shall incorporate the following policy related to electric vehicle charging stations into the Specific Plan: ► **Policy E-1: Electrical Vehicle Parking Spaces.** Applicants shall include the most recent CalGreen Tier 2 requirements pertaining to required EV parking spaces in the project design in order to meet the prerequisites for SMAQMD's Tier 1 BMP 2.	City of Sacramento, Project Applicant	City of Sacramento to incorporate electric vehicle charging parking requirement policy into the Stockton Boulevard Plan	Prior to approval of the Stockton Boulevard Plan	City of Sacramento
	Implement Mitigation Measure 3.5-1b described below	See Mitigation Measure 3.5-1b described below	See Mitigation Measure 3.5-1b described below	See Mitigation Measure 3.5-1b described below	See Mitigation Measure 3.5-1b described below
Impact 3.4-3: Potential for the Implementation of the Specific Plan, in Combination with Other Development, to Contribute to a Significant Cumulative Energy Impact	**Implement Mitigation Measure 3.4-2 described above and Mitigation Measures 3.5-1b described above.**	See Mitigation Measure 3.4-2 described above and Mitigation Measures 3.5-1b described above	See Mitigation Measure 3.4-2 described above and Mitigation Measures 3.5-1b described above	See Mitigation Measure 3.4-2 described above and Mitigation Measures 3.5-1b described above	See Mitigation Measure 3.4-2 described above and Mitigation Measures 3.5-1b described above

Impact	Mitigation Measure	Implementing Party	Action(s)	Timing	Monitoring and Enforcement
Greenhouse Gas Emissions and Climate Change					
Impact 3.5-1: Generate GHG Emissions, Either Directly or Indirectly, That May Have a Significant Impact on the Environment	**Mitigation Measure 3.5-1a: Implement 2040 General Plan Policies** ► Project Design. The City shall promote the incorporation of new technologies, materials, and design and construction techniques in private development projects that minimize air pollution, noise, excess heat, and other forms of pollution and its impacts. (2040 General Plan Policy ERC-4.3) ► Construction Emissions. The City shall ensure that construction and grading activities minimize short-term impacts to air quality by employing appropriate measures and best practices. Refer to Basic Construction Emissions Control Practices (BMPs) recommended by the Sacramento Metropolitan Air Quality Management District (SMAQMD). (2040 General Plan Policy ERC-4.5) ► Regenerative Food System. The City shall encourage regenerative agriculture practices in urban agriculture uses, including carbon-sequestering practices. (2040 General Plan Policy ERC-9.12) ► Street Classification System. The City shall maintain a street classification system that considers the role of streets as corridors for movement but prioritizes a context-sensitive Complete Streets concept that enables connected, comfortable, and convenient travel for those walking, rolling, and taking transit. (2040 General Plan Policy M-1.1) ► User Prioritization. The City shall prioritize mobility, comfort, health, safety, and convenience for those walking, followed by those bicycling and riding transit, ahead of design and operations for those driving. (2040 General Plan Policy M-1.2) ► Walking Facilities. The City shall work to complete the network of treeshaded sidewalks throughout the city, to the greatest extent feasible, by building new sidewalks and crossings, especially within the high-injury network, in disadvantaged communities, near high-ridership transit stops, and near important destinations, such as schools, parks, and commercial areas. Walking facilities should incorporate shade trees. (2040 General Plan Policy M-1.14). ► Improve Bicycling Connectivity. The City shall plan and seek funding for a continuous, low-stress bikeway network consisting of bicycling-friendly facilities that connect neighborhoods with destinations and activity centers throughout the city. (2040 General Plan Policy M-1.17)	City of Sacramento	City of Sacramento to implement General Plan Policies ERC-4.3, ERC-4.5, ERC-9.12, M-1.1, M-1.2, M-1.14, and M-1.17	On-going during implementation of the Stockton Boulevard Plan	City of Sacramento
	Mitigation Measure 3.5-1b: Implement the Greenhouse Gas Emission Reduction Actions of the Climate Action & Adaptation Plan ► Future development projects under the Specific Plan shall incorporate GHG emissions reductions measures contained in the Climate Action and Adaptation Plan (CAAP). The CAAP includes the following measures: Eliminate natural gas in new construction (CAAP Measure E2). ► Support infill growth to ensure that 90% of growth is in the established and center/corridor communities and 90% small-lot and attached homes by 2040, consistent with the regional Sustainable Communities Strategy Project-level VMT should be 15% below (or 85% of) the regional average. (CAAP Policy E-5) ► Improve active transportation infrastructure to achieve 6% active transportation mode share by 2030 and 12% by 2045. (CAAP Policy TR-1) ► Support public transit improvements to achieve 11% public transit mode share by 2030 and maintain through 2045. (CAAP Policy TR-2) ► Achieve zero-emission vehicle adoption rates of 28% for passenger vehicles and 22% for commercial vehicles by 2030 and 100% for all vehicles by 2045. (CAAP Policy TR-3) ► Work to reduce organic waste disposal 75% below 2014 levels by 2025. (CAAP Policy W-1) ► Reduce water utility emissions (in MT CO2e per million gallon) delivered by 100% by 2030 and maintain that through 2045. (CAAP Policy WW-1) ► Reduce wastewater emissions by 22% by 2030 and 40% by 2045. (CAAP Policy WW-2) ► Increase urban tree canopy cover to 25% by 2030 and 35% by 2045. (CAAP Policy CS-1)	City of Sacramento, Project Applicant	City of Sacramento and project applicants to implement Climate Action & Adaptation Plan Measure E2, Policy E-5, Policies TR-1 to TR-3, Policy W-1, Policy WW-1, Policy WW-2, and CS-1.	On-going during implementation of the Stockton Boulevard Plan	City of Sacramento
Hazards and Hazardous Materials					
Impact 3.6-1: Create a Significant Hazard to the Public or the Environment through the Routine Transport, Use, or Disposal of Hazardous Materials or through the Reasonably Foreseeable Upset and Accident Conditions Involving the Release of Hazardous Materials into the Environment	**Mitigation Measure 3.6-1: Conduct a Phase I ESA** Prior to the issuance of a grading permit, project applicants for all future development projects within the Specific Plan Area shall complete a Phase I ESA (performed in accordance with the current ASTM Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process [E 1527]) for each individual property prior to development or redevelopment to ascertain the presence or absence of Recognized Environmental Conditions (RECs), Historical Recognized Environmental Condition (HRECs), and Potential Environmental Concerns (PECs). The findings and conclusions of the Phase I ESA shall become the basis for potential recommendations for follow-up investigation, if found to be warranted.	Project Applicant	Project applicants to conduct Phase I environmental site assessment	Prior to construction	City of Sacramento

Impact	Mitigation Measure	Implementing Party	Action(s)	Timing	Monitoring and Enforcement
Impact 3.6-2: Emit Hazardous Emissions or Handle Hazardous or Acutely Hazardous Materials, Substances, or Waste within 0.25 Mile of an Existing or Proposed School	**Implementation of Mitigation Measure 3.6-1 described above**	See Mitigation Measure 3.6-1 above	See Mitigation Measure 3.6-1 above	See Mitigation Measure 3.6-1 above	See Mitigation Measure 3.6-1 above
Impact 3.6-4: Impair Implementation of or Physically Interfere with an Emergency Response Plan or Emergency Evacuation Area	**Mitigation Measure 3.6-4: Prepare and enforce a Construction Traffic Management Plan** Prior to issuance of grading permits, the applicant shall submit to the City for review and approval a Construction Traffic Management Plan to minimize traffic impacts on all roadways at and near the work site affected by construction activities. The plan shall include construction and public (if applicable) access points, procedures for notification of road closures, construction materials delivery plan, a description of emergency personnel access routes during road closures, this plan shall ensure adequate access for emergency responders.	City of Sacramento, Project Applicant	Project applicants to prepare and City of Sacramento to review Construction Traffic Management Plans	Prior to construction	City of Sacramento
Impact 3.6-5: Potential for the Implementation of the Stockton Boulevard Specific Plan, in Combination with Other Development, to Contribute to a Significant Cumulative Impact to Hazards and Hazardous Materials	**Implementation of Mitigation Measures 3.6-1 and Mitigation Measure 3.6-4 described above**	See Mitigation Measures 3.6-1 and 3.6-4 above	See Mitigation Measures 3.6-1 and 3.6-4 above	See Mitigation Measures 3.6-1 and 3.6-4 above	See Mitigation Measures 3.6-1 and 3.6-4 above
Noise and Vibration					
Impact 3.7-1: Generate a Substantial Temporary Increase in Noise Levels at Noise-Sensitive Land Uses in Excess of Standards Established by the City Code	**Mitigation Measure 3.7-1a: Implement 2040 General Plan Policies** ► Project Design. The City shall promote the incorporation of new technologies, materials, and design and construction techniques in private development projects that minimize air pollution, noise, excess heat, and other forms of pollution and its impacts (2040 General Plan Policy ERC-4.3). ► Construction Noise Controls. The City shall limit the potential noise impacts of construction activities on surrounding land uses through noise regulations in the City Code that address permitted days and hours of construction, types of work, construction equipment, and sound attenuation devices. (2040 General Plan Policy ERC-10.9)	City of Sacramento	City of Sacramento to implement General Plan Polices ERC-4.3 and ERC-10.9	On-going during implementation of the Stockton Boulevard Plan	City of Sacramento
	Mitigation Measure 3.7-1b: New Policy for Goal E-1: Environment, Public Health, and Safety The City shall include the following new policy in the Specific Plan: ► **Policy NV-1: Reduce Construction Related Noise.** Implement additional measures to reduce construction-related noise. For all projects in the Specific Plan Area that require a building permit, the City shall require that the contractor implement the following measures during all phases of construction: ▪ Construction hours shall be limited to 7:00 a.m. to 6:00 p.m. Monday through Saturday and between 9:00 a.m. and 6:00 p.m. on Sunday. Construction outside of these hours may be approved through a development permit based on a site specific "construction noise mitigation plan" and a finding by the Director of Community Development or their designee that the construction noise mitigation plan is adequate to prevent excessive noise disturbance of affected residential uses. The site-specific development permit would allow for work outside normally permitted hours (e.g., overnight) subject to conditions of approval, including performance standards, imposed by the City to limit noise impacts. ▪ All heavy construction equipment and all stationary noise sources shall have manufacturer-installed mufflers. Mufflers and noise suppressors shall be properly maintained and tuned to ensure proper fit, function, and minimization of noise. ▪ Heavy-duty equipment shall be operated at the lowest operating power possible and shall be restricted in close proximity to sensitive receptors. ▪ For construction activity that occurs during nighttime hours, where available and feasible, equipment with back-up alarms shall be equipped with either audible self-adjusting backup alarms or alarms that only sound when an object is detected. Self-adjusting backup alarms shall automatically adjust to 5 dB over the surrounding background levels. All non-self-adjusting backup alarms shall be set to the lowest setting required to be audible above the surrounding noise levels. ▪ To the extent that noise-generating outdoor construction activity needs to occur at night as part of a continuous construction activity, the activity shall be planned such that the portion that needs to take place closest to sensitive receptors takes place during less noise-sensitive daytime hours. Temporary noise barriers shall be constructed, if needed, to screen noise-generating equipment when located near noise-sensitive land uses. ▪ If impact pile driving is required, sonic pile drivers shall be used, unless engineering studies are submitted to the City that show this is not feasible, based on geotechnical considerations.	City of Sacramento	City of Sacramento to incorporate additional construction noise reduction measures policy into the Stockton Boulevard Plan	Prior to approval of the Stockton Boulevard Plan	City of Sacramento

Impact	Mitigation Measure	Implementing Party	Action(s)	Timing	Monitoring and Enforcement
Impact 3.7-2: Generation of Excessive Groundborne Vibration or Groundborne Noise Levels	**Mitigation Measure 3.7-2a: Implement 2040 General Plan Policies** ► Interior Vibration Standards. The City shall require construction projects that are anticipated to generate significant vibration levels to use appropriate methods (i.e., type of equipment, low-impact tools, modifying operations, increasing setback distance, vibration monitoring) to ensure acceptable interior vibration levels at nearby residential and commercial uses based on the current City or Federal Transit Administration (FTA) criteria. (2040 General Plan Policy ERC-10.5) ► Vibration. The City shall consider the potential for vibration-induced damage associated with construction activities, highways, and rail lines in close proximity to historic buildings and archaeological sites. Where there is potential for substantial vibration-induced damage, the City shall require preparation of a Pre-Construction Survey and Vibration Management and Monitoring Plan, prepared by a qualified historic preservation specialist or structural engineer to document existing conditions, present appropriate methods to avoid or reduce potential vibration damage, monitor for excessive vibration, and ensure any damage is documented and repaired. (2040 General Plan Policy ERC-10.7)	City of Sacramento	City of Sacramento to implement General Plan Polices ERC-10.5 and ERC-10.7	During construction	City of Sacramento
	Mitigation Measure 3.7-2b: New Policy for Goal E-1: Environment, Public Health, and Safety The City shall include the following new policy in the Specific Plan: ► **Policy NV-2: Reduce Construction-Related Vibration.** Implement additional measures to reduce construction-related vibration. ► The following vibration control measures (or other equally effective measures approved by the City) shall be included in the plan: ▪ To prevent structural damage, minimum setback requirements for different types of ground vibration-producing activities (e.g., pile driving) for the purpose of preventing damage to nearby structures shall be established based on the proposed activities and locations, once determined. Factors to be considered include the specific nature of the vibration producing activity (e.g., type and duration of pile driving), local soil conditions, and the fragility/resiliency of nearby structures. Established setback requirements can be breached if a project-specific site-specific vibration analysis is conducted by a qualified geotechnical engineer or ground vibration specialist that indicates that no structural damage would occur at nearby buildings or structures. ▪ To prevent disturbance to sensitive land uses, minimum setback requirements for different types of ground vibration producing activities (e.g., pile driving) shall be established based on the proposed activities and locations, once determined. ▪ Alternatives to traditional pile driving (e.g., sonic pile driving, jetting, cast-in-place or auger cast piles, etc.,) shall be considered and implemented where feasible to reduce vibration levels. ▪ Phase pile-driving and high-impact activities so as not to occur simultaneously with other construction activities, to the extent feasible. The total vibration level produced could be significantly less when each vibration source is operated at separate times.	City of Sacramento	City of Sacramento to incorporate additional construction vibration reduction measures policy into the Stockton Boulevard Plan	Prior to approval of the Stockton Boulevard Plan	City of Sacramento
Impact 3.7-3: Exposure of Existing Sensitive Receptors to Project-Generated Traffic Noise	**Mitigation Measure 3.7-3: Implement 2040 General Plan Policies** ► Exterior Noise Standards. The City shall require noise mitigation for all development where the projected exterior noise levels exceed those shown in Table ERC-1 [shown as Table 3.7-2 in this EIR], to the extent feasible. (2040 General Plan Policy ERC-10.1) ► Interior Noise Standards. The City shall require new development to include noise attenuation to assure acceptable interior noise levels appropriate to the land use, as follows: ▪ 45 dB L_{dn} for residential, transient lodgings, hospitals, nursing homes, and other uses where people normally sleep; and ▪ 45 dB L_{eq} (peak hour with windows closed) for office buildings and similar uses. (2040 General Plan Policy ERC-10.3) ► Alternative Paving Materials. The City shall continue to explore opportunities to use alternative pavement materials such as rubberized asphalt and porous pavement on residential roadways in order to reduce noise generation, extend maintenance cycles, and improve air quality and stormwater management. (2040 General Plan Policy ERC-10.8)	City of Sacramento	City of Sacramento to implement General Plan Policies ERC-10.1, ERC-10.3, and ERC-10.8	On-going during implementation of the Stockton Boulevard Plan	City of Sacramento
Impact 3.7-4: Expose Noise-Sensitive Land Uses to Operational Stationary Noise that Exceeds Applicable Standards	**Implement Mitigation Measures 3.7-1a and 3.7-3 described above**	See Mitigation Measures 3.7-1a and 3.7-3 above	See Mitigation Measures 3.7-1a and 3.7-3 above	See Mitigation Measures 3.7-1a and 3.7-3 above	See Mitigation Measures 3.7-1a and 3.7-3 above
Impact 3.7-5: Potential for Implementation of the Specific Plan, in Combination with Other Development, to Contribute to a Significant Cumulative Noise Impact	**Implement Mitigation Measure 3.7-3 described above**	See Mitigation Measure 3.7-3 above	See Mitigation Measure 3.7-3 above	See Mitigation Measure 3.7-3 above	See Mitigation Measure 3.7-3 above
Public Services and Recreation					
Impact 3.8 -5: Result in Substantial Adverse Physical Impacts Associated with the Demand for or Provision of New Parks and Other Recreational Facilities	**Mitigation Measure 3.8 -5a: Implement 2040 General Plan Policies** ► Parkland Dedication Requirements. The City shall continue to require that new residential development projects contribute toward the provision of adequate parks and recreational facilities to serve the new residents, either through the dedication of parkland, the construction of public and/or private recreation facilities, or the payment of parkland in-lieu fees, consistent with the Quimby	City of Sacramento	City of Sacramento to implement General Plan Policies YPRO-1.4, YPRO-1.5, and YPRO-1.8	On-going during implementation of the Stockton Boulevard Plan	City of Sacramento

<table>
<tr><th>Impact</th><th>Mitigation Measure</th><th>Implementing Party</th><th>Action(s)</th><th>Timing</th><th>Monitoring and Enforcement</th></tr>
<tr><td></td><td>Ordinance. To achieve the level of service for all parkland in all areas of the city, the City shall seek other funding resources to prioritize park needs in park deficit areas. (2040 General Plan Policy YPRO-1.4)
▸ Incentivizing Onsite Public Facilities. The City shall continue to provide Park Impact Fee (PIF) credit for development projects that provide publicly accessible parks, plazas, and parkways onsite that promote active or passive recreational opportunities and serve as neighborhood gathering points. (2040 General Plan Policy YPRO-1.5)
▸ Non-Conventional Park Solutions. In densely built out urban areas of the city where the provision of large park spaces is not feasible, the City shall explore creative solutions to provide neighborhood park and recreation facilities that serve the needs of local residents and employees. Such solutions may include the following:
▪ Publicly accessible, privately-owned open spaces and plazas;
▪ Rooftop play courts and gardens;
▪ Freeway underpass, utility corridor, and wide landscape medians;
▪ Conversion of rails to rails with trails;
▪ Pocket parks and pedestrian areas in the public right-of-way; and
▪ The provision of neighborhood and community-serving recreational facilities in regional parks. (2040 General Plan Policy YPRO-1.8)</td><td></td><td></td><td></td><td></td></tr>
<tr><td></td><td>Mitigation Measure 3.8 -5b: Identify Park and Recreation Facilities
Through implementation of the 2040 Parks Plan, the City shall evaluate the equitable increase in public parkland and recreation facilities to serve the needs of the current and new residents within the Stockton Boulevard Specific Plan Area, that shall be developed as neighborhood parks or other nonconventional park solutions to be accessible within a 10-minute walk of residential land uses.</td><td>City of Sacramento</td><td>City of Sacramento to evaluate and develop public parkland and recreation facilities</td><td>On-going during implementation of the Stockton Boulevard Plan</td><td>City of Sacramento</td></tr>

<tr><td>Transportation and Circulation</td><td></td><td></td><td></td><td></td><td></td></tr>
<tr><td>Impact 3.9-1: Result in VMT Impacts on the Roadway System</td><td>Mitigation Measure 3.9-1a: Project applicants shall prepare and implement a Transportation Demand Management (TDM) Plan to guide implementation of TDM strategies for development, as outlined below.
Prior to issuance of building permits, future projects shall submit to the City either a project-specific transportation analysis that demonstrates that the project would obtain the City's VMT reduction target or a TDM Plan. Both documents shall be subject to review and approval by the City of Sacramento Department of Public Works. The TDM Plan shall be designed to reduce passenger vehicle VMT per capita to 34.22 (a 16.8-percent reduction from baseline passenger vehicle VMT per capita) or as close as deemed feasible by the City. The TDM Plan shall contain VMT reduction strategies identified in the Handbook for Analyzing Greenhouse Gas Emission Reductions, Assessing Climate Vulnerabilities, and Advancing Health and Equity (California Air Pollution Control Officers Association [CAPCOA] 2021) or an equivalent reference where the effectiveness of strategies is supported by substantial evidence.
The TDM Plan may include, but would not be limited to, the CAPCOA strategies listed in Table 3.9-3.

Impact 3.9-5: Potential for the Implementation of the Specific Plan, in Combination with Other Development, to Contribute to a Significant Cumulative Impacts to Transportation and Circulation System	**Implement Mitigation Measures 3.9-1a, 3.9-1b, 3.9-2a, and 3.9-2b described above.**	See Mitigation Measures 3.9-1a, 3.9-1b, 3.9-2a, and 3.9-2b described above	See Mitigation Measures 3.9-1a, 3.9-1b, 3.9-2a, and 3.9-2b described above See Mitigation Measures 3.9-1a, 3.9-1b, 3.9-2a, and 3.9-2b described above	See Mitigation Measures 3.9-1a, 3.9-1b, 3.9-2a, and 3.9-2b described above	See Mitigation Measures 3.9-1a, 3.9-1b, 3.9-2a, and 3.9-2b described above
Tribal Cultural Resources					
Impact 3.10-1: Cause a Substantial Adverse Change in the Significance of a TCR	**Mitigation Measure 3.10-1a: Protect Discovered Tribal Cultural Resources** If any suspected tribal cultural resources (such as unusual amounts of bone or shell, artifacts, or human remains) are encountered at the project site during construction, work shall be suspended within 100 feet of the find (based on the apparent distribution of cultural materials), and the construction contractor shall immediately notify the project's City representative. Avoidance and preservation in place is the preferred manner of mitigating impacts to tribal cultural resources. This will be accomplished, if feasible, by several alternative means, including: ► Planning construction to avoid tribal cultural resources and/or archaeological sites; incorporating these resources within parks, green-space or other open space; covering archaeological resources; deeding a tribal cultural resource to a permanent conservation easement; or other preservation and protection methods agreeable to consulting parties and regulatory authorities with jurisdiction over the activity. ► Recommendations for avoidance of tribal cultural resources will be reviewed by the City representative, interested culturally affiliated Native American tribes, and other appropriate agencies, in light of factors such as costs, logistics, feasibility, design, technology and social, cultural and environmental considerations, and the extent to which avoidance is consistent with project objectives. Avoidance and design alternatives may include realignment within the project site to avoid cultural resources, modification of the design to eliminate or reduce impacts to tribal cultural resources or modification or realignment to avoid highly significant features within a tribal cultural resource. ► Native American representatives from interested culturally affiliated Native American tribes will be invited to review and comment on these analyses and shall have the opportunity to meet with the City representative and its representatives who have technical expertise to identify and recommend feasible avoidance and design alternatives, so that appropriate and feasible avoidance and design alternatives can be identified. ► If the discovered tribal cultural resource can be avoided, the construction contractor(s), will install protective fencing outside the site boundary, including a 100-foot buffer area, before construction restarts. The boundary of a tribal cultural resource will be determined in consultation with interested culturally affiliated Native American tribes and tribes will be invited to monitor the installation of fencing. Use of temporary and permanent forms of protective fencing will be determined in consultation with Native American representatives from interested culturally affiliated Native American tribes. ► The construction contractor(s) will maintain the protective fencing throughout construction to avoid the site during all remaining phases of construction. The area will be demarcated as an "Environmentally Sensitive Area." If a tribal cultural resource cannot be avoided, the following performance standard shall be met prior to continuance of construction and associated activities that may result in damage to or destruction of tribal cultural resources: ► Each resource will be evaluated for California Register of Historical Resources (CRHR) eligibility through application of established eligibility criteria (California Code of Regulations 15064.636), in consultation with consulting Native American Tribes, as applicable. If a cultural resource or a tribal cultural resource is determined to be eligible for listing in the CRHR, the City will avoid damaging effects to the resource in accordance with California PRC Section 21084.3, if feasible. The City will coordinate the investigation of the find with a qualified archaeologist (meeting the Secretary of the Interior's Professional Qualifications Standards for Archeology) approved by the City and with interested culturally affiliated Native American tribes that respond to the City's invitation. As part of the site investigation and resource assessment, the City and the archaeologist shall consult with interested culturally affiliated Native American tribes to assess the significance of the find, make recommendations for further evaluation and treatment as necessary and provide proper management recommendations should potential impacts to the resources be determined by the City to be significant. A written report detailing the site assessment, coordination activities, and management recommendations will be provided to the City representative by the qualified archaeologist. These recommendations will be documented in the project record. For any recommendations made by interested culturally affiliated Native American tribes that are not implemented, a justification for why the recommendation was not followed will be provided in the project record. Native American representatives from interested culturally affiliated Native American Tribes and the City representative will also consult to develop measures for long-term management of any discovered tribal cultural resources. Consultation will be limited to actions consistent with the jurisdiction of the City and taking into account ownership of the subject property. To the extent that the City has	City of Sacramento, construction contractors, and Native American representative	Construction contractors to implement discovered tribal cultural resources protection measures City of Sacramento and Native American representatives to review avoidance recommendation	Prior to and during construction Prior to and during construction	City of Sacramento

Impact	Mitigation Measure	Implementing Party	Action(s)	Timing	Monitoring and Enforcement
	jurisdiction, routine operation and maintenance within tribal cultural resources retaining tribal cultural integrity shall be consistent with the avoidance and minimization standards identified in this mitigation measure. If the City determines that the project may cause a significant impact to a tribal cultural resource, and measures are not otherwise identified in the consultation process, the following are examples of mitigation capable of avoiding or substantially lessening potential significant impacts to a tribal cultural resource or alternatives that would avoid significant impacts to the resource. These measures may be considered to avoid or minimize significant adverse impacts and constitute the standard by which an impact conclusion of less-than significant may be reached: ► Avoid and preserve resources in place, including, but not limited to, planning construction to avoid the resources and protect the cultural and natural context to incorporate the resources with culturally appropriate protection and management criteria. ► Treat the resource with culturally appropriate dignity taking into account the Tribal cultural values and meaning of the resource, including, but not limited to, the following: ▪ Protect the cultural character and integrity of the resource. ▪ Protect the traditional use of the resource. ▪ Protect the confidentiality of the resource. ▪ Establish permanent conservation easements or other interests in real property, with culturally appropriate management criteria for the purpose of preserving or using the resources or places. ▪ Protect the resource.				
	Mitigation Measure 3.10-1b: Protect Discovered Human Remains If an inadvertent discovery of human remains is made at any time during project-related construction activities or project planning, the City the following performance standards shall be met prior to implementing or continuing actions such as construction, which may result in damage to or destruction of human remains. In accordance with the California Health and Safety Code (HSC), if human remains are encountered during ground-disturbing activities, the City shall immediately halt potentially damaging excavation in the area of the remains and notify the Sacramento County Coroner and a professional archaeologist to determine the nature of the remains. The Coroner is required to examine all discoveries of human remains within 48 hours of receiving notice of a discovery on private or State lands (HSC Section 7050.5[b]). If the human remains are of historic age and are determined to be not of Native American origin, the City will follow the provisions of the HSC Section 7000 (et seq.) regarding the disinterment and removal of non-Native American human remains. If the Coroner determines that the remains are those of a Native American, he or she must contact the Native American Heritage Commission (NAHC) by phone within 24 hours of making that determination (HSC Section 7050[c]). After the Coroner's findings have been made, the archaeologist and the NAHC-designated Most Likely Descendant (MLD), in consultation with the landowner, shall determine the ultimate treatment and disposition of the remains. The responsibilities of the City for acting upon notification of a discovery of Native American human remains are identified in California PRC Section 5097.9 et seq.	City of Sacramento, Sacramento County Corner, archaeologist, NAHC-designated MLD, and constructure contractor	Construction contractor to halt work if an inadvertent discover of human remains is made City of Sacramento to notify the Sacramento County Coroner and a professional archaeologist to determine the nature of the remains The Corner to examine all discoveries of human remains and to contact NAHC as needed The archaeologist and NAHC-designated MLD to determine treatment and disposition of the remains	During construction	City of Sacramento
	Mitigation Measure 3.10-1c: Implement 2040 General Plan Policies ► Early Project Consultation. The City will continue to strive to minimize impacts to historic and cultural resources by consulting with property owners, land developers, tribal representatives, and the building industry early in the development review process as needed. (2040 General Plan Policy HCR-1.6) ► Indigenous Cultures. The City shall seek ways to recognize the peoples who first lived in, traveled, and traded in what is now the Sacramento area, by working with tribal representatives to preserve their identity, culture, and artifacts. Methods for recognizing tribal history and imagery may include, but are not limited to, the following: ▪ Public art that provides a Native American perspective including works by Native artists; ▪ Naming of parks and places that reflects local Native American heritage and/or restores tribal names; ▪ Parks and recreation programming that increases awareness of tribal heritage and culture (including through interpretive displays) and allows opportunities for craft sharing; ▪ Incorporation of traditional native plants into landscape design palettes. (2040 General Plan Policy HCR-1.13)	City of Sacramento	City of Sacramento to implement General Plan Policies HCR-1.6, HCR-1.13 through HCR-1.17	Prior to and during construction	City of Sacramento

Impact	Mitigation Measure	Implementing Party	Action(s)	Timing	Monitoring and Enforcement
	► Archaeological, Tribal, and Cultural Resources. The City shall continue to comply with federal and State regulations and best practices aimed at protecting and mitigating impacts to archaeological resources and the broader range of cultural resources as well as tribal cultural resources. (2040 General Plan Policy HCR-1.14) ► Treatment of Native American Human Remains. The City shall treat Native American human remains with sensitivity and dignity and ensure compliance with the associated provisions of California Health and Safety Code and the California Public Resources Code. The City shall collaborate with the most likely descendants identified by the Native American Heritage Commission. (2040 General Plan Policy HCR-1.15) ► Endemic Traditions. The City shall seek ways to recognize the endemic traditions of various communities in Sacramento, including African American, Hispanic, Native, and Asian American communities, to promote the retention of Sacramento's intangible cultural heritage, which may include oral traditions, performing arts, social practices and festive events, legacy businesses, knowledge and practices concerning nature and the universe, and traditional craftsmanship. (2040 General Plan Policy HCR-1.16) ► Evaluation of Archeological Resources. The City shall work in good faith with interested communities to evaluate proposed development sites for the presence of sub-surface historic, archaeological, and tribal cultural resources that may be present at the site. These efforts may include the following: ▪ Consideration of existing reports and studies, ▪ Consultation with Native American tribes as required by State law, ▪ Appropriate site-specific investigative actions, and ▪ Onsite monitoring during excavation if appropriate. (2040 General Plan Policy HCR-1.17)				
Impact 3.10-2: Potential for the Project, in Combination with Other Development, to Contribute to a Significant Cumulative Impact to Tribal Cultural Resources	**Implement Mitigation Measures 3.10-1a through 3.10-1c described above**	See Mitigation Measures 3.10-1a through 3.10-1c above	See Mitigation Measures 3.10-1a through 3.10-1c above	See Mitigation Measures 3.10-1a through 3.10-1c above	See Mitigation Measures 3.10-1a through 3.10-1c above
Visual Resources					
Impact 3.12-1: Conflict with Applicable Zoning and Other Regulations Governing Scenic Quality	**Mitigation Measure 3.12-1: Implement 2040 General Plan Policies** ► Compatibility with Adjoining Uses. The City shall ensure that the introduction of higher-intensity mixed-use development along major arterial corridors is compatible with adjacent land uses, particularly residential uses, by requiring features such as the following: ▪ Buildings set back from rear or side yard property lines adjoining single-unit dwelling residential uses; ▪ Building heights stepped back from sensitive adjoining uses to maintain appropriate transitions in scale and to minimize impacts to privacy and solar access; ▪ Landscaped off-street parking areas, loading areas, and service areas screened from adjacent residential areas to the degree feasible; or ▪ Lighting shielded from view and directed downward to minimize impacts on adjacent residential uses. (2040 General Plan Policy LUP-4.6) ► Compatibility with Historic Context. The City shall continue to review new development, alterations, and rehabilitation/remodels for compatibility with the surrounding historic context and consistency with adopted design guidelines/standards, including the Historic District Plans. The City shall pay special attention to the scale, massing, and relationship of proposed new development to complement surrounding historic environments. (2040 General Plan Policy HCR-1.3) ► Responsiveness to Context. The City shall require building and site design that respects and responds to the local context, including use of local materials and plant species where feasible, responsiveness to Sacramento's climate, and consideration of cultural and historic context of Sacramento's neighborhoods, corridors, and centers. (2040 General Plan Policy LUP-8.10)	City of Sacramento	City of Sacramento to implement General Plan Policies LUP-4.6, HCR-1.3, and LUP-8.10	Prior to individual project approval	City of Sacramento
Impact 3.12-2: Create a New Source of Substantial Light or Glare which Would Adversely Affect Day or Nighttime Views in the Area	**Implement Mitigation Measure 3.12-1 described above**	See Mitigation Measure 3.12-1 above	See Mitigation Measure 3.12-1 above	See Mitigation Measure 3.12-1 above	See Mitigation Measure 3.12-1 above

Appendix A:

Detailed Community Engagement Summary

A.1. Summary of Engagement Activities

Collaboration and engagement began early in the planning process and will continue through plan adoption. Engagement activities have prioritized outreach in identified underserved communities, while also including all the elements to ensure broad public participation in the planning process. This section summarizes outreach activities to date and includes pertinent outreach materials and summaries.

Resident Planning Team Meetings

In developing the engagement strategy for this plan, the Engagement Team put together a Resident Planning Team (RPT) to act as consultants and collaborators to help build and inform the development of the Stockton Blvd Plan. The RPT consists of residents from the surrounding neighborhoods in the Neighborhood Study Area who will lead their community and help carry this plan to adoption and through implementation. Meetings began in the Fall of 2020 and have occurred on a mostly monthly basis through 2021, for a total of 11 meetings and five working group meetings. More meetings are planned for 2022. Each RPT member was offered a stipend to cover time and expenses for participation in the process. Figure A-1 shows a screenshot of the October 2021 virtual RPT meeting.

ROLE OF THE RPT

- ***Operate*** as the collaborative consulting team of community residents of Stockton Blvd to build and inform the development of the Stockton Blvd Plan.
- ***Commit*** to attending all scheduled RPT meetings and/or working with the rest of the RPT to make arrangements for unforeseen absences.
- ***Participate*** in discussions about how we support and connect with residents along the corridor.
- ***Inform*** discussions about how we share and receive information with residents along the corridor.

RPT PURPOSE STATEMENT

We are looking to do something different. The RPT will be composed of community residents from the surrounding neighborhoods along Stockton Blvd from Alhambra to Florin. The RPT will help identify underserved, marginalized, and multilingual communities along the corridor for us to prioritize and collaborate with as we begin to shape plans for Stockton Blvd. Our aim is to strengthen the corridor for the residents and businesses who currently live and operate there. We will be developing strategies to increase local ownership of housing, land, businesses, and investments, as well as exploring anti-displacement measures to allow our communities to enjoy these improvements as they come.

The Engagement Team also coordinated community engagement events with the RPT to ensure engagement activities were planned and implemented in a way that was most effective and culturally appropriate, with a goal of reaching traditionally underrepresented groups. The RPT played a large role in the first Community Workshop. Figures A-2 and A-3 show the results of the visioning and favorite memories and palces exercises done with the RPT in advance of the first Community Workshop.

Figure A-1. Screenshot of October 2021 RPT Meeting

Figure A-2. Results of the Visioning Exercise Done with the RPT in January 2021

Figure A-3. RPT Memories and Favorite Places

Working Group Meetings

The RPT met with City staff and the Engagement Team for a series of working group meetings in April and May of 2021 on the following topics: Environment and Public Health; Placemaking, Arts and Culture; Inclusive Economic Development; Housing and Anti-Displacement; and Mobility and Transportation.

The working group meetings were held to collectively learn more about a topic, share resources and initiatives, and begin thinking through strategies and actions for the plan. These topics would become the main areas of focus for the Neighborhood Action Plan.

Recap of 2021 Working Group Meetings

1. **Environment & Public Health (April 22nd)** We had an open dialogue about community-owned grocery stores, food deserts, the City's Climate Action and Adaptation Plan (CAAP), funding from public health institutions, community gardens, and much more.
2. **Placemaking, Arts, & Culture (May 3rd)**. We had a great discussion about the cultural landmarks of Stockton Boulevard, local storytelling, night markets, projects for local artists, and community events and festivals.
3. **Inclusive Economic Development (April 27th)**. We had a diverse range of topics brought forth that included: wealth-building strategies, increasing Wi-Fi access, utilizing vacant properties, signage for Little Saigon, local hiring, language barriers, and frustration over the lack of communication from the City.
4. **Housing & Anti-Displacement (May 6th)**. We had an eye-opening dialogue about community-ownership models, Accessory-Dwelling Units (ADUs), community canvassing, making community land trusts more accessible, and a Resale Inspection Program.
5. **Mobility & Transportation (April 28th & May 6th)**. We recommended RPT attendance at the Transportation Prioritization meetings hosted by the City of Sacramento Transportation Department.

Stockton Blvd Plan: Connect, Reflect, Affect Community Workshop

The City hosted a virtual workshop in English on February 10, 2021, that over 100 people attended. This event, which was also streamed on Facebook Live, was designed to help inform community members about the Stockton Blvd Plan and to start gathering community input to help guide next steps in developing the plan. Figure A-4 shows screenshots of the virtual event.

The workshop, title "Connect, Reflect, Affect," started out with an introduction from Councilmember Eric Guerra of District 6 and an overview of the plan process and the purpose of the Stockton Blvd Plan (aka "Connect").

Online Companion Survey for Community Workshop

After Community Workshop #1, an online companion survey was posted on the City's project website to allow residents an additional opportunity to submit feedback. All questions on the companion survey were the same questions asked during the Community Workshop. The survey was posted from February to May of 2021 and had a total of 39 respondents

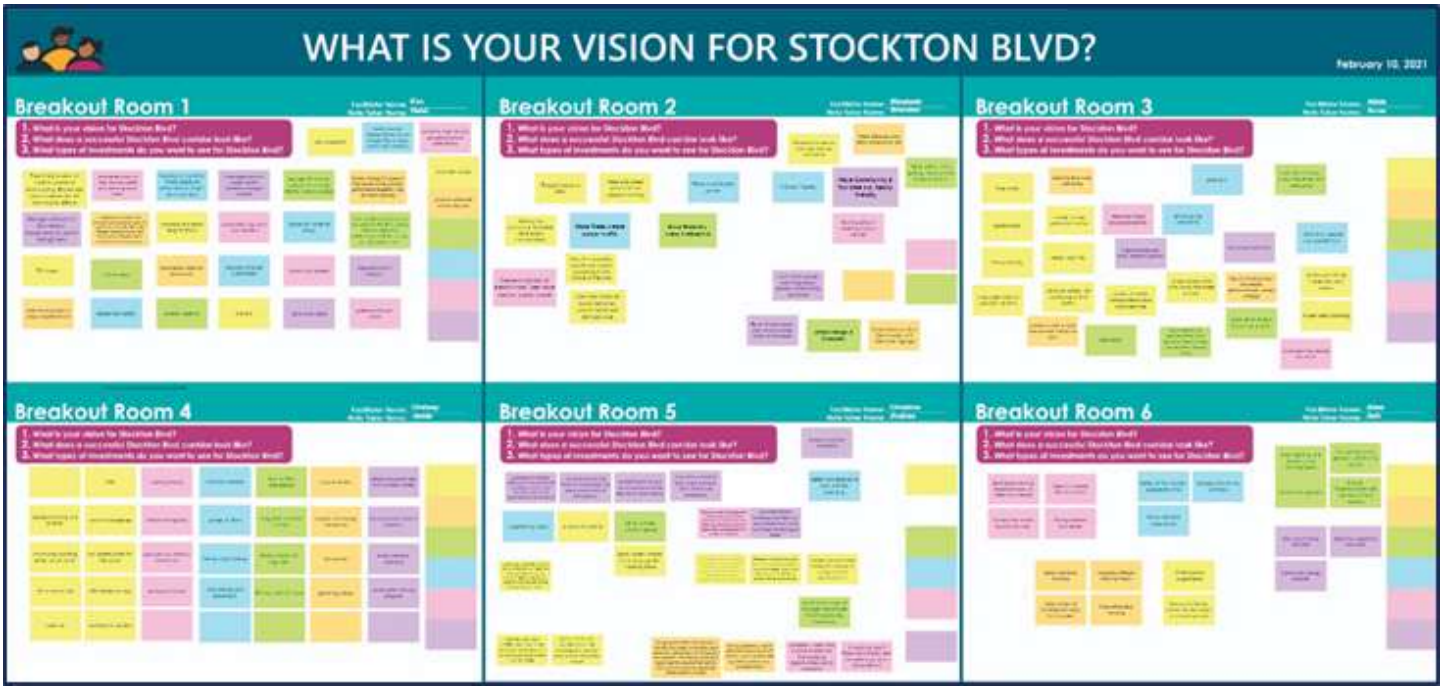
The next segment, "Reflect," included a spoken word performance from local artist Fong Tran and a brief oral history of the Neighborhood Study Area, where three RPT members shared their personal stories and connection to the area. Attendees were then put into breakout rooms and asked to share their favorite places along the corridor and their favorite memories. Figure A-5 shows the results from the memories and favorite places breakout room exercise in a word cloud and Figure A-7 shows the responses on a map.

The third part of the workshop, "Affect," focused on visioning and the effect the Stockton Blvd Plan could have. The RPT's vision was shared with attendees who were then asked to share their vision for the Stockton Boulevard corridor, along with ideas for what a successful corridor would look like and the types of investments they would want to see occur. Figure A-5 shows the breakout room visioning exercise that was done on an online platform called Mural. The workshop ended with next steps, Q&As, and closing remarks and reflections from Vice Mayor Jay Schenirer of District 5.

Figure A-4. Screenshots from the Stockton Blvd Plan: Connect, Reflect , Affect Event in February 2021

Figure A-5. Word Cloud Results from the Memories and Favorite Places Breakout Room Exercise

Figure A-6. Mural Board of Visioning Breakout Room Exercise



RESULTS FROM THE STOCKTON BLVD PLAN: CONNECT, REFLECT, AFFECT VISIONING BREAKOUT ROOM EXERCISE

Placemaking, Arts, & Culture

- Community Centers
- Arts district
- Space for open air/pop up space/festival/ celebrations
- Better Streetscapes, and more buildings closer to the street
- Family Friendly
- Little Saigon as a destination

Mobility & Transportation

- More walkable experience
- Pedestrian safety
- Complete streets treatment (wide sidewalks, trees, etc)
- Access to public transportation (bus stops/service)
- More bike lanes on the corridor
- Enough places to park

Environment & Public Health

- More green space
- Street canopy that arcs along the street corridor
- Health and wellness
- community gardens
- More people on foot/ability to walk corridor

Inclusive Economic Development

- Focus on existing small businesses
- Job training and placement
- More affordable housing
- Locally owned businesses/cafes

Other / Multi-Issue

- Open air restaurants
- More lighting and infrastructure improvements
- Infrastructure investments
- Safer environment
- Clean up corridor
- Sense of longevity
- Mixed-use buildings
- Supportive land uses
- Fill in vacant lots
- Add math and STEM in community

s

Community Conversations

City staff hosted three online community conversations in June and July 2021 and September 2022, to dig deeper into two topics: anti-displacement strategies and community ownership models. The meetings were held on Zoom and were also streamed on Facebook Live. These two meetings included local organizations working on these topics, RPT members, and interested residents and stakeholders. Summaries of both events are described below:

1. ***Community Conversation on Anti-Displacement Strategies (June 23, 2021).*** Many helpful resources were shared during the June 23 community conversation on anti-displacement strategies. The purpose of the community conversation was to:
   - Create a foundation for anti-displacement solutions along Stockton Boulevard;
   - Showcase what has come out of our Stockton Blvd Plan RPT discussions;
   - Highlight current programs and upcoming programs that seek to mitigate displacement;
   - Identify the gaps and needs of current housing and anti-displacement programs; and
   - Have an open dialogue to brainstorm new strategies to prevent displacement.
2. ***Community Conversation on Community Ownership Models (July 1, 2021).*** This community conversation focused on ways to increase community ownership of land, businesses, homes, and participate in a discussion with those who are working in the field. Some of the topics discussed included:
   - The community land trust model: owning land to make housing more affordable.
   - Community investment model: allowing community members to make investments together and increase wealth.
   - Community owned grocery store: providing more stability for food access in the community and allowing community members make decisions about the food they need.
   - Resident buyouts: aiding tenants in buying the homes they currently rent.

Flyer for the Community Conversation on Anti-Displacement Strategies

Land Use and Development Meeting

City staff held an online conversation in August 2021 to address questions about the City's development process and obtain input on how the Stockton Blvd Plan could address land use or development refinements. During the meeting, City staff provided an overview of the Stockton Blvd Plan, the existing tools that regulate land use (including the Broadway-Stockton Special Planning District (SPD), and explained how the City reviews development applications. Attendees and City staff discussed types of land uses the community would like to see more of on the corridor, how the City can partner with the community to guide future development, and City staff answered questions about the development process.

- Rent-to-own development: providing homeownership models in a more affordable way.

3. ***Community Conversation on Anti-Displacement (September 23, 2022). Community members gathered to:***
   - Review how anti-displacement framework and actions were reflected in the Community Working Draft of the Stockton Blvd Plan.
   - See how to review and comment on the Community Working Version of the Stockton Blvd Plan (https://stocktonblvdplan.konveio.com/)
   - Hear an update on the anti-displacement programs coming from the Aggie Square Community Benefits and Partnership Agreement.
   - Provide a venue for organizations and individuals working on anti-displacement to share what they're doing and invite others to join them.

Outreach Efforts on Neighborhood Action Plan Strategies

Over the course of two months in September and October 2021, the Engagement Team put together eight events to get feedback on potential strategies for the Neighborhood Action Plan. The events varied in size and scale, to try and reach a broader range of residents, particularly those who are not often heard or given access to meaningfully participate. Below is a summary of the various outreach events on strategies.

2021 Strategy Pop-Up Events

The engagement team hosted a series of three community pop-up events in September and October 2021. The pop-up events were held in person, following standard COVID-19 safety protocols, with the intention of reaching a broader range of residents and to make it as easy and fun to participate in the process. Participants were asked through various exercises to vote on the potential strategies and actions that they would want to see implemented through the Stockton Blvd Plan. Large format boards were available for participants to use dot-voting to vote for their top three strategies per board. Below are summaries of the three events:

Pop-Up at the Colonial Heights Library

Pop-Up at the Greenway Mutual Housing Apartments

1. *Pop-Up at the Colonial Heights Library (September 11th).* Boards were placed outside the library and several representatives from the engagement team were there to facilitate. Over 30 people participated in the strategy board exercises.

2. *Movie Night and Community BBQ at the Greenway Mutual Housing Apartments (September 23rd).* The engagement team hosted a movie night and BBQ for residents at the Greenway Mutual Housing Apartments, where attendees were able to learn more about the Stockton Blvd Plan and participate in the strategy

board exercises. Raffle prizes were also handed out to participants. Twenty-eight people attended the pop-up event.

3. *Pop-Up at Lemon Hill Mutual Housing Apartments (October 21st).* The engagement team hosted the final pop-up event at the Lemon Hill Mutual Housing Apartments where 21 people attended. Strategy exercises were translated and provided in Mandarin, Cantonese, and Vietnamese. Dinner was provided and raffle prizes were available for those who participated in the strategy board exercises.

Pop-Up at Lemon Hill Mutual Housing Apartments

2022 Strategy Pop-Up Events

During the fall of 2022, the engagement team held four community pop-up events, reaching approximately 135 residents at a multicultural festival and local grocery stores in the plan area. The four pop-up events were:

1. *Mid-Autumn Multicultural Festival, presented by NorCal Vietnamese Chamber of Commerce at Little Saigon Plaza (September 10th)*
2. *Pop-Up at La Superior Mercados (September 17th).*
3. *Pop-Up at A & A Market (September 24th)*
4. *Pop-Up at SF Market (October 13th)*

Community members discuss the plan at a grocery store pop-up.

At the pop-up events, the engagement team, including Spanish, Chinese/Mandarin, Vietnamese interpreters, facilitated informal conversations around storytelling, placemaking, and anti-displacement. A diverse range of in participants, terms of age (children to older adults), race, language, housing status, geographic location (e.g., residents who live adjacent to Stockton Boulevard vs. residents who live elsewhere but frequently come to Stockton Boulevard for school, shopping, work, etc.), and time spent living in the area, engaged in conversations. Participants shared their stories, and how they came to live and work along the corridor, citing its affordability and ethnic diversity. Expressed concerns included crime and safety issues, an increase in homelessness, and an increase in cost-of-living expenses. They also shared solutions, such as bringing more family-serving businesses to the area, supporting residents with rental costs, increasing the variety of restaurants, enhancing the cultural events, improving the transportation network, and creating stronger relationships with the City.

Community members celebrating at Little Saigon Plaza.

Spotlight on Stockton: A Celebration of History, Food, and Culture on Stockton Boulevard

On October 8th, the engagement team and community partners hosted an event celebrating the history, food, and culture in the Stockton Boulevard. We heard from residents, businesses, and community members on what they love about the area and what matters most to them for the Stockton Blvd Plan.

Donner Field (Behind William Lee Prep)
October 8, 2022
9:00am - 2:00pm

The community partners—Sacramento Regional Transit, Sacramento Building Healthy Communities (The HUB), Sacramento Urban Learning Academy, Oak Park Neighborhood Association, Veritable Good, Civic Thread, and Ascent—Resident Planning Team members, Community Ambassadors, and Councilmembers Eric Guerra and Jay Schenirer helped organize and carry out the successful event.

A few highlights from the day included:

- Participants engaged in a variety of community building activities and games for kids and adults alike.
- Free prizes and giveaways included a Schwinn bike, gift cards, pumpkins, and kids' toys.
- Delicious food and drinks prepared by Toucha' Class and Butterfly Beverages.
- Music and spoken word performances.

What we hear from the community:

- Stories and favorite places along Stockton Boulevard and the surrounding area.
- How to prioritize housing and business anti-displacement strategies.
- Prioritizing Plan actions.
- How to retain and support small businesses.
- Input on transit stops with Sacramento Regional Transit.

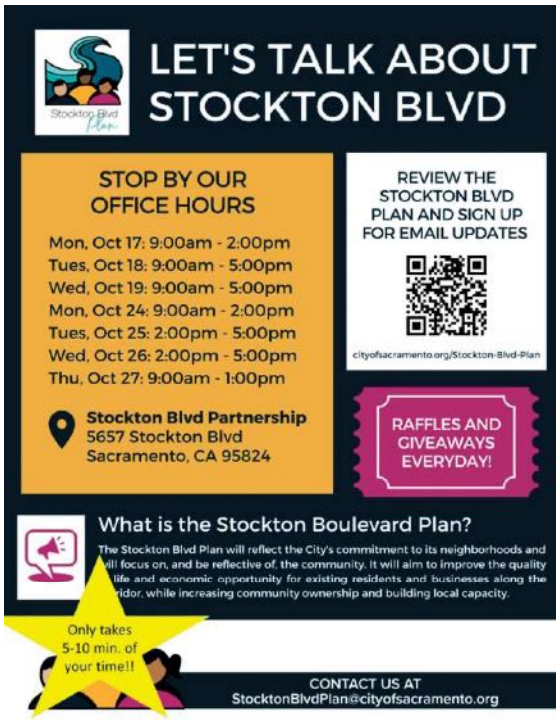
Spotlight on Stockton at Donner Field.

Spotlight on Stockton at Donner Field.

Residents point out their favorite places along the corridor.

Office Hours

Seven times between October 17-27, City staff conducted open office hours, hosted by the Stockton Boulevard Partnership. While the office hours were open to all, the City focused on reaching local business owners and property owners, especially Black, Hmong, and Chinese community members, to discuss and provide input on the Community Working Version of the Stockton Blvd Plan. Participants discussed strategies to achieve clean and safe streets, enhance outreach and marketing strategies, build business development tactics, organize capacity building and inclusive outreach, and bolster workforce development.



Stockton Blvd Office Hour flier.

Community Ambassadors (Aces) Monthly Check-ins

Between June and November 2022, the Aces and engagement team met on a monthly basis to engage with historically unrepresented and underrepresented communities. The Aces, a group of five residents from Black, Latino, Chinese, Vietnamese, and Hmong communities, were tasked with building community capacity while also identifying opportunities for collaboration on City-aligned projects that center inclusion, equity, and a focus on measurable outcomes. Each Ace received a stipend for their commitments and each meeting they attended.

Key contributions from the Aces include:

- The production of multilingual videos in Cantonese, English, Spanish, Vietnamese, Hmong, and Mandarin that introduce the Plan to community members and ask for their input.
- Improving the outreach process by suggesting culturally relevant methods that emphasize storytelling and uplift peoples' histories, especially within communities of color, and meet people where they live and work.
- Collaborating with the engagement team on the 2022 planning and implementation of the outreach strategies including at pop-up events, Spotlight on Stockton, and the office hours.
- Spreading information to their respective communities and bringing folks to engage in the outreach events and provide feedback on the draft Plan.
- Emphasizing the need to simplify and shorten the Plan, as well making the goals and outcomes clearer.
- Suggesting the inclusion of an Executive Summary in the Plan.
- Connecting the City with small businesses to cater engagement strategies to and solicit feedback from this group.
- Echoing the importance of capacity building and support, meaning offering ways the City could support the empowerment of communities in the Neighborhood Study Area.

Virtual Workshop/RPT Meeting on Strategies

The Engagement Team put together a virtual workshop on strategies during the September 2021 RPT meeting to provide RPT members and the public an additional opportunity to receive feedback on potential strategies for the plan. Attendees were given an overview of the project and given the same strategy exercise. Approximately 20 people attended the virtual workshop.

Multilingual Night & Harvest Festival

The engagement team hosted two events in September and October 2021 to further engage multilingual communities in the strategy development process. For both events the strategy board exercises were translated into Spanish, Mandarin, Cantonese, and Vietnamese as handouts for multilingual community members to read through and circle their top three priority strategies on each page. Spanish, Mandarin, Cantonese, Vietnamese, and Hmong interpretation were also provided. Below are summaries of the two events:

Multilingual Night at Will C. Wood Middle School (September 22nd). The engagement team hosted a multilingual night at Will C. Wood Middle School. Food and raffle prizes were provided at the event, which was attended by 13 community members.

Harvest Festival at the Fruitridge Community Collaborative (October 28th). The engagement team hosted a Harvest Festival for community members with crafts, food, raffle prizes, and a discussion about the future of Stockton Blvd. Six people attended the event at the Fruitridge Community Collaborative.

Celebrate Stockton Blvd Event (October 23)

On Saturday, October 23, 2021, the City hosted a community celebration and resource fair at the Colonial Heights Library. The celebration began with a Sacramento land acknowledgement from RPT member Marianne Gonzales, followed by welcome and opening remarks by Vice Mayor Jay Schenirer and Councilmember Eric Guerra. Fenix Drum and Dance Company performed a drumming and dance piece and there was a spoken word performance by Fong Tran. Live music was provided by local radio station 97.5 and several local restaurants were on hand to provide food and refreshments.

The resource fair had 31 different booths to visit, with one booth dedicated to the Stockton Blvd Plan. At the booth residents were encouraged to participate in the strategy board exercises. Materials were translated into Spanish, Mandarin, Cantonese, and Vietnamese.

TOP 3 STRATEGIES, VOTED BY THE COMMUNITY, BY THEME (2021)

Housing & Anti-Displacement

1. Provide buying assistance for first-time homebuyers.
2. Expand homelessness prevention programs.
3. Develop a housing help center.

Inclusive Economic Development

1. Connect low-income residents in the Plan Area with job opportunities and workforce training.
2. Support an anti-displacement pilot program for a focused number of households with job training, housing, and other wealth building support.
3. Commit to hiring a certain percentage of employees from the Plan Area.

Placemaking, Arts, & Culture

1. Invest in property maintenance and streetscape improvements.
2. Establish regular events.
3. Design drive-throughs intentionally to preserve bike/pedestrian/ADA access along the street and provide sit down space.

Environment & Public Health

1. Support food recovery programs.
2. Build and maintain parks, plazas, or other public gathering spaces.
3. Organize community beautification events.

Engagement & Capacity Building

1. Increase opportunities for youth to engage with and lead civic processes.
2. Connect residents to relevant resources and services.
3. Facilitate volunteerism.

The costs for police are extremely high when trying to get a permit. Can we get a community policing option? It is a requirement if we want to do some type of street closures or events. Its these fees that are a huge barrier for us when trying to get permits for community events.	Placemaking, Arts, and Culture Working Group	5/3/2021	Environment, Public Health, and Safety
Regular maintenance, such as fixing broken park equipment, providing adequate lighting and street trees, providing consistent trash collection, addressing illegal dumping, fixing broken water fountains, etc.	Placemaking, Arts, and Culture Working Group	5/3/2021	Environment, Public Health, and Safety
Use of coops and Community Land Trusts to acquire key properties, like Fruitridge Elementary School.	Placemaking, Arts, and Culture Working Group	5/3/2021	Housing
Night market in Little Saigon, accented by night time lighting and video projections on buildings	Placemaking, Arts, and Culture Working Group	5/3/2021	Land Use
Need community to drive the missions. Community should hold non profits accountable. City and County is siloed. No wrong door approach	Anti-Displacement Community Discussion	6/23/2021	Community Engagement and Capacity Building
Bringing expectations down to a standard level – stop using acronyms and break it down to people's level. Keep it real for people. Look at all of the great things going on in other communities that we can replicate (one example is a community banking option)	Anti-Displacement Community Discussion	6/23/2021	Community Engagement and Capacity Building
Challenge all non-profits to walk the community. That would be powerful. If we really want to get true story of community needs, then need to be active in reaching out to people. Stop hiding behind creating services and expecting people to know and flock to these services. Need to be active.	Anti-Displacement Community Discussion	6/23/2021	Community Engagement and Capacity Building
Need to get folks out in the community. Struggle to proactively educate people on renters helpline. Create partnerships between City/County/Nonprofit with people who are in the community. Missing that true connection to people living in the neighborhood.	Anti-Displacement Community Discussion	6/23/2021	Community Engagement and Capacity Building
Want to update 211 to make sure information is accurate and up to date. Biggest thing Human Services Coordination Council is working on	Anti-Displacement Community Discussion	6/23/2021	Community Engagement and Capacity Building
Besides money which we all need to do these services, we need access to individuals who live in those communities. Want to be able to provide services but not make promises we can't keep. Need access to individuals to coordinate efforts	Anti-Displacement Community Discussion	6/23/2021	Environment, Public Health, and Safety
ADUs are a great option but homes that have the space/land for an ADU, the cost is skyrocketing.	Anti-Displacement Community Discussion	6/23/2021	Housing
Black Homeowners Alliance	Anti-Displacement Community Discussion	6/23/2021	Housing
Community Land Trust – ensure affordability for generations to come. Separates the land from the use and keeps the land in community ownership.	Anti-Displacement Community Discussion	6/23/2021	Housing
Community/Tenant Opportunity to Purchase Act (COPA/TOPA) – it would be great to see some legislation saying that if you're going to sell your house, then you have to sell to the person living there. (San Francisco) recently did this.	Anti-Displacement Community Discussion	6/23/2021	Housing

Comments	Source	Date	Topic
Critical from an SHRA and housing perspective. Need to understand the history of segregated housing. Problem with redlined communities is the generational turnover. Market consolidation is happening in a big way. With the eviction moratoriums almost up, the pressure may make small local businesses want to sell. Together we need to figure out what resources we can pull together. How can we think out of the box – help renters, people with disabilities, existing homeowners?	Anti-Displacement Community Discussion	6/23/2021	Housing
Disability Rights Commissioner – once they (people with disabilities) get their home, want to make sure they can keep their home whether they own or rent. Program we are trying to set up is connecting residents with service providers. Find a way to allow the families of people who are on social security who die, to stay in their home.	Anti-Displacement Community Discussion	6/23/2021	Housing
Pay attention to what redistricting commission is doing. Do not want south Sacramento to be gerrymandered as has historically been done. Concern about impact of homeshare program on resources in the neighbrohood (parking, green space, other resources). Excited about home repair program; helps people buy homes but also maintain them	Anti-Displacement Community Discussion	6/23/2021	Housing
PROP 19. Policy link resource Our Homes, Our Communities: How Housing Acquisition Strategies Can Create Affordable Housing, Stabilize Neighborhoods, and Prevent Displacement | PolicyLink. For a community like Stockton – find ways to acquire and keep rents affordable	Anti-Displacement Community Discussion	6/23/2021	Housing
Really difficult to open up your home and share a space. What really helps is having a third party to manage that. Small scale landlords. Folks are resistant to open up their homes even when they have a home. Need third party to match people with shared housing options. This will be helpful to pave the way for ADU program. *Homeshare American River. Third party homeshare program	Anti-Displacement Community Discussion	6/23/2021	Housing
Resource Directory. No one really knows where all of these resources are and they are hard to find. Renters now need to pay sewer, garbage, and water and this is a barrier as far as affordable rental options. There is also an issue with racial discrimination – and no one knows where to find fair housing resources. Low income residents do not have enough help. Once residents can get help than they don't get off and this is another barrier. Tried to direct people with these instances to HUD/HCD and this has not worked; growing concern.	Anti-Displacement Community Discussion	6/23/2021	Housing
Something effective from the Tentants Union side. Org needs to be able to write letters that have a legal backing	Anti-Displacement Community Discussion	6/23/2021	Housing
Two things to bring up. ADUs and generally making sure that people can age in place in a housing stock that wasn't built to be accessible. City should be working with community partners to leverage dollars and resources. More education around ADUs to landlords to rent to a person with a disability. Make sure that landlords have funding available to address accessibility modifications	Anti-Displacement Community Discussion	6/23/2021	Housing
Much more than just commitment to affordable housing. So many other pressures that community members are facing including low-incomes, health care availability, transportaition, workforce development. Boils down to education on all sides. People may not know that they have access to a renter's helpline or many of the other opportunities available to them. There also needs to be some type of education around the history of the community and the resources put into the community. There needs to be a commitment that can last long-term so low-income folks can feel secure. A lot of other factors at play but we need to have conversations about all of the other dynamics. Need an ongoing commitment to address the issue.	Anti-Displacement Community Discussion	6/23/2021	Housing
Need to be thinking about short term, med term, long term solutions. Need to think about how this fits in to the SBP.	Anti-Displacement Community Discussion	6/23/2021	Other
Collaboration between groups to maximize resources, and push the needle towards progressive ideas and reimagining our entire system	Community Ownership Strategies Community Discussion	7/1/2021	Community Engagement and Capacity Building
Continue to have those conversations with them across all levels, not just our city, but our county and state elected officials	Community Ownership Strategies Community Discussion	7/1/2021	Community Engagement and Capacity Building
Need to hold our leaders. Basically, the elected officials to account to come up with more innovative policies	Community Ownership Strategies Community Discussion	7/1/2021	Community Engagement and Capacity Building
Systemic issues require systemic solutions it seems; addressing the whole 9 yards might be worthwhile for real transformation	Community Ownership Strategies Community Discussion	7/1/2021	Community Engagement and Capacity Building
Intentional commitment to ensuring that people are made aware (or at least the attempt was made) and I mean like a real attempt not just a flyer or something on social media, but like an actual really face to face conversation with Community residents.	Community Ownership Strategies Community Discussion	7/1/2021	Community Engagement and Capacity Building
I for one would like to know more about the current and near-future plans and projects that are under way along the Boulevard!	Community Ownership Strategies Community Discussion	7/1/2021	Community Engagement and Capacity Building

In the past our neighborhoods were actually inhabited by folks in the "middle income" and Oak Park was categorize as affluent and prosperous. So to use the term historical and low income in the same sentence as a way to describe the history of our neighborhoods is not accurate and does not tell the whole story. It also does not adequately illustrate or describe the economic history of the area especially due to the fact that the government sanctioned policies of "redlining" and "gerrymandering" played a huge part in the historical socioeconomic trends of this part of Sacramento and are not mentioned at all. Here's a suggestion: "Historically the neighborhoods in the Neighborhood Study Area have been home to a richly diverse group of residents. The cultural, ethnic and socioeconomic make up of this area has changed a lot throughout its history due to several factors including the Great Depression, and the government sanctioned policies of redlining and gerrymandering." Or something like that.	Konveio (Working Draft Version)	7/25/2022	Other
Please list neighborhood not just Colonial or Tahoe. There is Colonial Heights, Colonial Manor, Colonial Village, Tahoe Park, Tallac Village.	Konveio (Working Draft Version)	7/25/2022	Other
So sorry, I see that a map is included after the data, which is helpful.	Konveio (Working Draft Version)	7/25/2022	Other
Thank you for including Fong Tran's contribution.	Konveio (Working Draft Version)	7/25/2022	Other
This is very hard to read in this format (the headings do not "freeze"). Also, the earlier map that shows the numbers for each Census Tract should proceed it.	Konveio (Working Draft Version)	7/25/2022	Other
Within the Neighborhood Actions and other areas in the report pertaining to Placemaking, Arts and Culture should include priority being given to hiring artist living and practicing in the neighborhoods. Similar to how priority is given to locally owned business and hiring local folks for jobs and job training. This could be done by giving extra points in the grant making process or opening "call for artists" with one of the requirements being that the responding artist must work and or live in one of the neighborhoods.	Konveio (Working Draft Version)	7/26/2022	Culture, Arts, and Community Character
How many is "many"?	Konveio (Working Draft Version)	7/26/2022	Environment, Public Health, and Safety
In comparison to other areas?	Konveio (Working Draft Version)	7/26/2022	Environment, Public Health, and Safety
More specifics please? Where? [comment referring to leaking underground storage tanks]	Konveio (Working Draft Version)	7/26/2022	Environment, Public Health, and Safety
Part 2.7 Environmental Justice should include a section identifying South Sacramento's lack of sufficient and equitable tree canopy (healthy/thriving trees) and a survey of parks and green spaces in the area.	Konveio (Working Draft Version)	7/26/2022	Environment, Public Health, and Safety
There are farmers markets? Only 2 that I know of. Where are the community gardens? More specifics would be helpful.	Konveio (Working Draft Version)	7/26/2022	Environment, Public Health, and Safety
What is the rate?	Konveio (Working Draft Version)	7/26/2022	Environment, Public Health, and Safety
and parks?	Konveio (Working Draft Version)	7/26/2022	Environment, Public Health, and Safety
Are they all low-income units? My understanding was that there was a mix?	Konveio (Working Draft Version)	7/26/2022	Housing
Here are a couple of other things our neighborhoods value that have an impact on Anti-Displacement efforts. The wording below is just "draft" and could be edited to be more succinct. 7. We value both the physical and mental health and wellbeing of our community's residents and support systems that provide resources and options that allow residents to maintain a healthy lifestyle. 8. We support commercial ventures and businesses that put a value on and prioritize our neighborhood's efforts for clean air and water and are committed to the preservation on our neighborhood's healthy environments.	Konveio (Working Draft Version)	7/26/2022	Housing
Are parks and/or other green spaces included? If not why? If so where and how?	Konveio (Working Draft Version)	7/26/2022	Inclusive Economic Development

Comments	Source	Date	Topic
While I am pleased that there will be housing options on the Blvd. It's very disappointing and disturbing that there is no mention of or plan in place to provide recreational spaces for people to get outside and enjoy. With 400 units of affordable housing coming and the potential for triple that in the increase of people, the impact on our to few neighborhood and 2 (3?) regional parks is going to be huge and potentially very negative. Please! We need more green space for people to get out and move around, recreate and enjoy! This issue will greatly impact both the physical and mental health of our residents.	Konveio (Working Draft Version)	7/26/2022	Land Use
Instead of saying that it's "only" 46 percent how about wording it such as "...and the average rate of homeownership in the study area is 46 percent.	Konveio (Working Draft Version)	7/26/2022	Other
Is there more up to date data available? 2018 seems like a long time ago.	Konveio (Working Draft Version)	7/26/2022	Other
This is not completely accurate from a historical perspective. It is my understanding that the NSA area in it's long history was at one time occupied by middle income and in the case of Oak Park upper income residents. The change in income make up of the area changed over the years due to the Great Depression and government supported racist policies such as redlining and gerrymandering. These events and policies played a huge roll in where we find ourselves today and should be acknowledged in this important document.	Konveio (Working Draft Version)	7/26/2022	Other
and natural resources	Konveio (Working Draft Version)	7/26/2022	Other
A bus shelter is an improvement yes, but it is facetious to pretend that running buses in mixed traffic will be an improvement to the overall trip on transit.	Konveio (Working Draft Version)	8/7/2022	Mobility and Transportation
Buses should not be running in mixed traffic. Cut off one lane of traffic each side and convert it to a transit lane	Konveio (Working Draft Version)	8/7/2022	Mobility and Transportation
This is a bad idea and pushes forward the status quo. Stockton Blvd should not be utilized as a commuter corridor with SR-99 paralleling the street for most of its length	Konveio (Working Draft Version)	8/7/2022	Mobility and Transportation
This is the highest bus ridership corridor in the SacRT network. Buses NEED to have their own dedicated lanes, especially given regional commitments to reducing greenhouse gas emissions and VMT. Eliminate a lane of traffic per each direction.	Konveio (Working Draft Version)	8/7/2022	Mobility and Transportation
Why just a painted buffer? Why not include curb cuts or some sort of protections from motorists?	Konveio (Working Draft Version)	8/7/2022	Mobility and Transportation
Colonial Theatre just sent out a letter to neighboring residents that they're intending to increase their entertainment options. I live 7 houses away and have to hear the screaming Punk concerts that they book now. I can't imagine how the poor people who move into the Gateway complexes are going to sleep when they buy their brand new units and hear this horrible screaming noise on week days until midnight, when most people have to go to work the next day. Buyer beware! Perhaps the concerts can be limited to weekends and a more melodious type of music?	Konveio (Working Draft Version)	8/16/2022	Culture, Arts, and Community Character
Please put in protected bike lanes. The safety report that came out last year, stated that the Stockton Blvd. corridor had some of the most fatalities of pedestrians and bike riders. West Sacramento put in protected bike lanes. Let's do it here too, especially on Stockton Blvd.	Konveio (Working Draft Version)	8/16/2022	Mobility and Transportation
Hmong and Lao businesses tends to be very generational; it would be valuable to reach out with a generational approach that taps into a more trustworthy and accountable network	Multilingual Partners Meeting	8/18/2022	Community Engagement and Capacity Building
In Little Saigon, they have really been able to provide support, guidance, mentorship - trying to close that gap to those who are interested in trying to start a business; helping those business get the grants to apply to for them to stay afloat	Multilingual Partners Meeting	8/18/2022	Inclusive Economic Development
Let small businesses and relevant folks who will be impacted know the future plan for the area. Inform them that there is a plan being conceived, and let them know which components concern them and where they can participate	Multilingual Partners Meeting	8/18/2022	Community Engagement and Capacity Building
Look at creating more opporunity for Black folks who don't normally have that access and power	Multilingual Partners Meeting	8/18/2022	Community Engagement and Capacity Building
The Latine community would appreciate the city coming to them where they are at and gathering resources together because it can be confusing/overwhelming	Multilingual Partners Meeting	8/18/2022	Community Engagement and Capacity Building
A lot of businesses don't know how to apply for grants; create a resource hub to help businesses	Multilingual Partners Meeting	8/18/2022	Inclusive Economic Development
Currently, there's no shade in the surrounding areas and this makes being outside on Stockton Blvd very undesirable. This section should also include increasing our tree canopy to ensure people *want* to bike, walk, and explore locations with art. The location needs to be inviting so people leave their homes and interact with the local community. This will also support local businesses as more people will be out in the streets.	Konveio (Working Draft Version)	9/3/2022	Environment, Public Health, and Safety

Comments	Source	Date	Topic
Allow for more density by increasing the FAR along the corridor. This will allow more housing, more available transit, and more foot traffic to small businesses.	Konveio (Working Draft Version)	9/3/2022	Land Use
1. What intersections are we looking at consolidating? Will this include more transit (which would also assist in meeting our CAAP goals). 2. How will we incentivize improvements and activities? Will more housing be built nearby? Are there plans to increase foot traffic by making the corridor more walkable? 5. How will the meetings on development proposals be advertised to the neighborhood? Historically, Fruitridge Manor doesn't receive much news about upcoming changes to the area.	Konveio (Working Draft Version)	9/3/2022	Mobility and Transportation
Consider removing the center lane and making this into a segment with trees.	Konveio (Working Draft Version)	9/3/2022	Mobility and Transportation
Has the City considered partnering with SacRT to create a light rail line down Stockton Blvd in place of the bus line? Stockton Blvd is the major street that connects to many neighborhoods, and it leads into the heart of downtown. Additionally, the 51 is the most used bus line, and it may get used more if it's a light rail line.	Konveio (Working Draft Version)	9/3/2022	Mobility and Transportation
It should be a commuter corridor for transit and bikes, not cars.	Konveio (Working Draft Version)	9/3/2022	Mobility and Transportation
Neither option reduces the street area. Consider a road diet and have a two lane street only, and include a medium between the street and bikes with shade trees.	Konveio (Working Draft Version)	9/3/2022	Mobility and Transportation
Please dedicate lanes to bus/transit only in this segment instead of keeping it 5 lanes. People drive very fast because there are many lanes on this street. Even with shade trees, there may still be many accidents.	Konveio (Working Draft Version)	9/3/2022	Mobility and Transportation
Please protect bike lanes from car traffic and use design tactics to significantly reduce car speeds. Stockton Blvd should be a major bike path, but it's too dangerous to ride on. Fruitridge and Stockton Blvd must be protected if the bikes end up near the street.	Konveio (Working Draft Version)	9/3/2022	Mobility and Transportation
Please study where people regularly cross, not just where there are intersections.	Konveio (Working Draft Version)	9/3/2022	Mobility and Transportation
Slow traffic and increase safety by reducing the amount of lanes for personal vehicles to 2 only.	Konveio (Working Draft Version)	9/3/2022	Mobility and Transportation
The neighborhood "South of Fruitridge" is referred to as Fruitridge Manor.	Konveio (Working Draft Version)	9/5/2022	Other

We see a neglect of the trees in the median, many of which look stressed to the naked eye - often branches breaking and fraying due to neglect. The grass is mowed to the extreme - way too short - every week, at a time when leaving it longer would act as a natural mulch and help keep what little water that area gets in the soil, not evaporating. It's cut way too short - even a City arborist confirmed that for me. Somehow the city is just on autopilot - paying whoever it is they have a contract with to keep mowing a lawn weekly that can probably be mowed once a month or every six weeks.	Email	9/13/2022	Environment, Public Health, and Safety
The litter, used condoms and assorted drug paraphernalia left on the street and in the median?	Email	9/13/2022	Environment, Public Health, and Safety
I'm unclear on this "anti-displacement conversation". As a resident who lives just a few houses off Stockton Blvd on 21st Avenue, is this where I might come to discuss any of the following?	Email	9/13/2022	Housing
The drivers who run red lights and behave poorly along Stockton?	Email	9/13/2022	Mobility and Transportation
The incessant speeding and "stunts" of cars, flying by our house doing 60+ MPH?	Email	9/13/2022	Mobility and Transportation
Are any of the above subjects that we might be able to have a discussion about? I realize this isn't me having a story about "what makes Stockton Blvd important" - but *is* it about the decline of our neighborhood - which is only getting worse.	Email	9/13/2022	Other
The car lot on the corner that uses (and abuses) two german shepherd puppies as their full time alarms, barking throughout the night, every night and disrupting our sleep? With the city and animal control unwilling to do anything about it?	Email	9/13/2022	Other
The homeless and mentally ill that often show up on my porch and front lawn to use my garden hose to take a shower?	Email	9/13/2022	Other
The hookers using the Colonial Heights library parking lot for who knows what?	Email	9/13/2022	Other
We see and hear all of this, just trying to live here. We get up most mornings and watch people piss and shit in the library parking lot. Cars pull in to eat their fast food then blatantly toss trash onto the street. They do this right in front of our house!	Email	9/13/2022	Other

Does the plan include clean-up activities for leaking underground storage tanks?	Konveio (Working Draft Version)	9/28/2022	Environment, Public Health, and Safety
Please add/preserve these buildings (architecture/façade): - 3022 Stockton Blvd, Sacramento, CA 95820 (former Boon Boon Café). Preserving the entire complex would be dieals. - 3000 Stockton Blvd, Sacramento, 95820 (former Subway locaiton).	Konveio (Working Draft Version)	10/5/2022	Land Use
See comment above regarding preserving buildings located at 3000 & 3022 Stockton Blvd.	Konveio (Working Draft Version)	10/5/2022	Land Use
Hopeful the city does its best to ensure this comes to fruition. Housing is better than vacant lots.	Konveio (Working Draft Version)	10/7/2022	Housing
I appreciate the call for paved lots to support businesses, especially in the commercial corridor around 14th. Safe, clean lots on both sides of Stockton Blvd, accompanied by well-marked crosswalks, would allow drivers to stop and shop and Stockton. The only Stockton Blvd businesses I patronize have lots.	Konveio (Working Draft Version)	10/7/2022	Land Use
Close commutes, historically rich/black/diverse/young families	Spotlight on Stockton	10/8/2022	Culture, Arts, and Community Character
I've lived a block from Stockton Blvd for 35 years. I've seen good and not so good but overall I'm proud.They used to have an active neighborhood watch which is how we met so many good friends.	Spotlight on Stockton	10/8/2022	Culture, Arts, and Community Character

Need something like the Triangle District on Broadway	Spotlight on Stockton	10/8/2022	Land Use
Has the City contacted all property owners of vacant parcels inside the plan area?	Konveio (Working Draft Version)	10/10/2022	Community Engagement and Capacity Building
A few studies have identified portions of the study area as food deserts. I think it would be helpful to map food access points to see if food access has changed.	Konveio (Working Draft Version)	10/10/2022	Environment, Public Health, and Safety
Big portions of the study area - until this past year (contact Valley Vision for more information) - did not have air quality monitors. The monitors that have been installed, do not measure all criteria pollutants. This should be revised to address this point and the need for better and more air quality monitoring as an environmental justice strategy.	Konveio (Working Draft Version)	10/10/2022	Environment, Public Health, and Safety
Isolated locations deficient in tree canopy? By whose standard? The Sacramento Bee has data about tree canopy coverage, as does Sac Tree. I think "isolated locations" is incorrect, and should be revised. I think those with canopy are "isolated locations." Also, what is a community facility? What is the source of "no identified deficiencies?"	Konveio (Working Draft Version)	10/10/2022	Environment, Public Health, and Safety

Comments	Source	Date	Topic
This a correlation to poverty - see my previous comment about household income not being a clear data poverty data point.	Konveio (Working Draft Version)	10/10/2022	Environment, Public Health, and Safety
Suggest adding a value about reducing poverty through inclusive prosperity, and increasing affordable housing (rental and home ownership). Supporting community organizations is a good add too.	Konveio (Working Draft Version)	10/10/2022	Housing
Will this plan's priorities be updated to target those specific parcels that qualify for by-right development under newly signed AB 2011?	Konveio (Working Draft Version)	10/10/2022	Land Use
Poverty is a factor in gentrification. I think it would be helpful if this sections builds on this data to help the reader (and policy makers) understand how this correlates to people living in poverty - perhaps by providing a census level analysis of the percent of resident who live in poor households. I think the household income data masks this important data point for understanding displacement risks.	Konveio (Working Draft Version)	10/10/2022	Other
At the very least, name the tribes whose land we occupy. Hmong also resettled here due to the Vietnam war, in fact, there are very distinct waves of immigration glossed over in this summary. Please replace all occurrences of the word minority. The highways had a huge impact beyond isolation, and cutting off community.This is a white washed history.	Konveio (Working Draft Version)	10/10/2022	Other
I think you need to go further back than 2010 to account for the Great Recession. Black and Latinx populations were disproportionately affected by home foreclosures and subprime lending during the Great Recession. 2010 masks this huge economic impact to and decline in homeownership.	Konveio (Working Draft Version)	10/10/2022	Other
I would delete "minority" and add people of color. Asians and Indigenous folks were also impacted by racial covenants and redlining. I suggest expanding your list beyond "Black" and "Hispanic or Latinx" to include other race/ethnicities with a prominent presence and culture on the Stockton Corridor.	Konveio (Working Draft Version)	10/10/2022	Other
Racism is the root of income disparities too.	Konveio (Working Draft Version)	10/10/2022	Other
Simplify the legends for the map, focusing on those items that help to orient and bring meaning. For example, is there a stream or creek on this map or a rail line?	Konveio (Working Draft Version)	10/10/2022	Other
What about the Hmong, Iu Mien, Filipino, and Pacific Islander folks?	Konveio (Working Draft Version)	10/10/2022	Other
Areas "like this?" I am unclear that "like this" means.	Konveio (Working Draft Version)	10/10/2022	Other
I think it is important to note that this redevelopment history includes the redevelopment of the once culturally vibrant West End, and forced relocation of people of color.	Konveio (Working Draft Version)	10/10/2022	Other
9th Ave and Stockton Blvd designated Ministerial Infill Housing: IR$20-348 neighbors concerns on 9th ave 1. hazardous waste documented in Geo Tracker report dated 2004; please provide an update 2. compromised infrastructure as documented in email from the city of Sacramento dated 2012 citing sewer lines in need of replacement; please provide an update 3. traffic congestion to be generated by the alley connecting 9th ave and 10th ave as the source of access and exit to IR20-348 NOTE: the neighbors are NOT objecting to the development and construction - they are asking for responsible development and construction with respect to hazardous waste and compromised infrastructure in a well-established neighborhood	Konveio (Working Draft Version)	10/11/2022	Environment, Public Health, and Safety
To be able to say this area has good access I believe every residence should be able to walk/bike or take transit to an affordable grocery store	Konveio (Working Draft Version)	10/12/2022	Environment, Public Health, and Safety
Maybe remove the center lane and add real bike lanes instead of combined bike bus lanes	Konveio (Working Draft Version)	10/12/2022	Mobility and Transportation
Protected bike lanes are crucial here especially if two of the 5 lanes are not converted to bus lanes	Konveio (Working Draft Version)	10/12/2022	Mobility and Transportation

Playground and parks for neighborhood	Pop-Up Event (SF Market)	10/13/2022	Land Use
Scratch this, I just reread the paragraph and figured out what you lumped into misc.	Konveio (Working Draft Version)	10/13/2022	Land Use
This is counter to what residents discussed and desired. Many conversations that I was part of, folks lifted up that the infill on this corridor is not consistent with the existing architecture, nor what folks want to see on Stockton. Folks want urban form that is specific to this area, not a vanilla set of standards in place for the entire city.	Konveio (Working Draft Version)	10/13/2022	Land Use
Would be helpful to have some details here given that 8% misc is larger than the industrial and care/healthcare. What type of uses did you lump into "misc.?"	Konveio (Working Draft Version)	10/13/2022	Land Use
Would like an indoor mall/food court, a place with lots of food inside	Pop-Up Event (SF Market)	10/13/2022	Land Use
I only go to places that are near the bus stops because that's what I'm familiar with	Pop-Up Event (SF Market)	10/13/2022	Mobility and Transportation
Neighborhood shuttle would be convenient to shoppers	Pop-Up Event (SF Market)	10/13/2022	Mobility and Transportation
Street repairs and better traffic safety and movement	Pop-Up Event (SF Market)	10/13/2022	Mobility and Transportation
I think a word is missing here.	Konveio (Working Draft Version)	10/13/2022	Other
I wish the attention given to the race and ethnicity of the corridor throughout this plan was consistent. I am also curious why you do not mention the peoples that you provided translated materials for as part of your outreach (e.g., Chinese) in your summaries. It reads inauthentic and counter to the professed values of this plan.	Konveio (Working Draft Version)	10/13/2022	Other
Should this be bold?	Konveio (Working Draft Version)	10/13/2022	Other
Smaller communities? Smaller in comparison to what? The dominant white culture? Please take out smaller.	Konveio (Working Draft Version)	10/13/2022	Other
Typo	Konveio (Working Draft Version)	10/13/2022	Other
More than just guides, we need standards (i.e., number of meetings, language translation service, hiring of culturally sensitive facilitator).	Konveio (Working Draft Version)	10/14/2022	Community Engagement and Capacity Building
The appendix should include a survey summary, a summary of the data collected via the outreach meetings, and a summary of the data provided via the RPT.	Konveio (Working Draft Version)	10/14/2022	Community Engagement and Capacity Building
AB 617 Community Air Protection Program: The Plan area south of Elder Creek Road / 47th Avenue is located in Sacramento's AB 617 Community Air Protection Program community. Pursuant to AB 617, the California Air Resources Board has identified this community as disproportionally impacted by air pollution and has selected it for the development and implementation of an air monitoring plan.	Letter (SMAQMD)	10/14/2022	Environment, Public Health, and Safety

Comments	Source	Date	Topic
Plant new trees to shade new and existing pavements to the full extent feasible, with air-quality supportive trees such as those identified in the Sacramento Tree Foundation's Shady Eighty guide. The air quality benefits of shade trees include removing particulate matter from the atmosphere and reducing the urban heat island effect, which in turn lowers summertime temperatures, cools buildings, and reduces ozone formation. Greater neighborhood tree canopy has been correlated to improvement of overall human health. Additionally, studies have correlated neighborhood tree shade to increased use of active transportation.	Letter (SMAQMD)	10/14/2022	Environment, Public Health, and Safety
To support public health in the AB 617 community, Sac Metro Air District recommends incorporating the following Cool Communities strategies into the final Stockton Boulevard Plan: 1. Cool roofs for all new construction that meet 2022 BEES criteria for solar reflectance and thermal emittance 2. Cool pavement for all new paved area of greater than one acre with the highest albedo possible, but no less than 0.25 3. Quantified tree canopy coverage targets for the Plan area, particularly for public sidewalks and outdoor public spaces, in addition to the City's commendable parking lot tree shade requirements	Letter (SMAQMD)	10/14/2022	Environment, Public Health, and Safety
Utilize "cool pavement" for new outdoor pavement, with the highest albedo possible, but no less than 0.25. For guidance on cool pavement strategies, please visit Sac Metro Air District's Recommended Cool Pavement Strategies.	Letter (SMAQMD)	10/14/2022	Environment, Public Health, and Safety
Utilize certified cool roofs for new construction. The 2022 California Building Energy Efficiency Standards (BEES) suggests an aged solar reflectance of at least 0.63 with a minimum thermal emittance of 0.75 for low-sloped roofs, and at least 0.25 with a minimum thermal emittance of 0.80 for steep-sloped roofs, for commercial development in the Sacramento area climate zone. The Cool Roof Rating Council provides a product directory of roofs.	Letter (SMAQMD)	10/14/2022	Environment, Public Health, and Safety
Landscaping is a critical element to improving this corridor. The lack of shade is a big detriment to a walkable corridor. Some business leaders have long objected to street trees that they believe will block the view of their businesses from the street _ WALKSacramento now Civic Thread can provide details of a plan they developed for street trees the resistance they faced from the business community.	Konveio (Working Draft Version)	10/14/2022	Environment, Public Health, and Safety
Create a small business access to capital program with an equity lens that mandates a certain percentage of the folks receiving this assistance are of a certain race and economic background.	Konveio (Working Draft Version)	10/14/2022	Inclusive Economic Development

What about a small business or capital access equity scorecard?	Konveio (Working Draft Version)	10/14/2022	Inclusive Economic Development
This section should make explicit who is most impacted and who faces greatest barriers to ensure that the economic strategies are focused on those folks.	Konveio (Working Draft Version)	10/14/2022	Inclusive Economic Development
Are facade grants a thing anymore?	Konveio (Working Draft Version)	10/14/2022	Land Use
Move to Tier 1. There was a vacant lot in midtown recently converted into an food truck type eating space. This type of demonstration project could get the ball rolling on this idea.	Konveio (Working Draft Version)	10/14/2022	Land Use
This section should include a strategy to allocate a portion of the EIFD 2 to fund transportation improvements on the corridor or another mechanism to raise funds for the improvements outlined.	Konveio (Working Draft Version)	10/14/2022	Mobility and Transportation
What about the city transportation priority plan and the Stockton Corridor study?	Konveio (Working Draft Version)	10/14/2022	Mobility and Transportation
Where stops are located also needs a study. SacTRU has advocated for years that changes are needed to stops on Stockton because of obstacles that prevent certain stops from being used by folks with disabilities.	Konveio (Working Draft Version)	10/14/2022	Mobility and Transportation
How about implementing first?	Konveio (Working Draft Version)	10/14/2022	Other
This should be moved up to tier 1.	Konveio (Working Draft Version)	10/14/2022	Other
We support housing that refelects the age and character of our neighborhood. It's all about development.	Community Hotline (Voicemail)	10/16/2022	Housing
Why didn't the City help homeowners build grandmother units in our neighborhood? They would match the culture and archtecture of the neighborhood.	Community Hotline (Voicemail)	10/16/2022	Housing
What about the homes that are going to be impacted by new apartment complexes? It's going to ruin their property value and ability to sell their homes and enjoy their property.	Community Hotline (Voicemail)	10/16/2022	Housing
Concern about parking for new large apartment complexes. If they have cars where will they park? We don't want them on our streets.	Community Hotline (Voicemail)	10/16/2022	Mobility and Transportation

Comments	Source	Date	Topic
The new apartment complexes weren't good planning and don't fit our neighborhood. I can't find information and drawings of the plan. I don't want them in my neighborhood. I hear they won't match our neighborhood. If you provide affordable units that people can atctually buy and have green space, that's a different story.	Community Hotline (Voicemail)	10/16/2022	Other
3.1: We would be interested in an easy-to-read summary of *who* attended the various meetings and events. Will this be generated?	Letter	10/18/2022	Community Engagement and Capacity Building
9.1: There are several neighborhood associations in the Study Area which are very active. Please consider them a resource as this effort moves forward. While not all residents are active in their associations, they are an excellent entry point to working with a specific neighborhood.	Letter	10/18/2022	Community Engagement and Capacity Building
Please don't be turned off by our nitpicks – there are some very important strategies and ideas in here which we don't feel the need to provide specific feedback on. We appreciate the extensive work that has already been done by the Engagement Team as well as its resident advisory committee, which includes OPNA Board members. We encourage continued collaboration with deeper reach into the Oak Park community, and ask that you consider us not only a resource, but a partner in carrying out this work. We look forward to a more livable Stockton Boulevard for residents new and old.	Letter	10/18/2022	Community Engagement and Capacity Building
1.4: Environmental Justice should be highlighted as a value here. We recommend elevating this either by way of incorporation into existing values, or if a value would be added.	Letter	10/18/2022	Environment, Public Health, and Safety
2.7: With regard to air quality and pollution exposure – California has the worst air quality in the country. While the study area may not be one of the most polluted in the State of California, it is still unacceptably high because the threshold is far higher than elsewhere in the country. Valley Vision has deployed 10 air quality monitors in the study area and is working to bring additional equipment and resources to the area to address these Environmental Justice inequities.	Letter	10/18/2022	Environment, Public Health, and Safety
3.5: Reducing pollution (air, water, illegal dumping) is a priority of OPNA not reflected in these summaries.	Letter	10/18/2022	Environment, Public Health, and Safety
8.2: CARB has actually granted funds to community organizations to deploy an air monitoring network in the study area, outside of the formal AB 617 effort led by the Sac Metro Air District. This independent project is called 'Sacramento Neighborhoods Activating on Air Quality' (SNAAQ) and has been active since 2020.	Letter	10/18/2022	Environment, Public Health, and Safety
2.4: The 'Neighborhood Study Area Residential Gentrification Assessment' is of great interest to OPNA. We would appreciate a briefing on the findings of this component of the work and how it fits into the overall plan.	Letter	10/18/2022	Housing
12.4: OPNA has been administering our Oak Park Cares program for over a year now. To date, we have raised over $15,000 which we have distributed directly to Oak Park residents in need who are having trouble paying their rent, bills, or covering other unexpected expenses. Our low-barrier program is a model which we would like to expand, and we find it applicable to several implementation actions mentioned in the report, including "Homelessness Prevention Programs" and "Personal Financial Literacy" in Tier #1.	Letter	10/18/2022	Implementation
5.2: OPNA would like to be formally involved in the identification of projects and development of the Aggie Square community fund component of the CBPA.	Letter	10/18/2022	Land Use
2.4: If timelines align, consider adding appropriate information gleaned from the City of Sacramento's African-American Experience project, which is described as "a historic context, oral history, and survey of Sacramento's African-American history from the city's early history to the recent past."	Letter	10/18/2022	Other
1.1. In Oak Park, we have a history of non-residents purporting to represent our community. This harkens back to racist land use and policy decisions of yesteryear which continue to influence our neighborhood to this day. We urge you to be more specific in defining what is meant by the word 'community' – do you mean residents? Advocates? Community-based organizations located in and/or serving our neighborhood? These are all different categories of 'community' members, each with different reasons for their involvement in neighborhood affairs, so we urge more specificity. Generally, we want to see more empowerment of plan area residents throughout this process, whose input and involvement we see as of higher value than both CBOs and outside advocates (both of whom are of course important, but serve a different role). Highlights from Multilingual Partners Meetings: Feel proud and happy to know the City of Sacramento is investing in community; appreciates the multicultural/multiethnic approach to engagement leads to being stronger together, power in coalition building and collective efforts; supporting community champions to serve as liaisons with their fellow community members; values relationships he's been able to build with the rest of the group	Multilingual Partners Meeting	10/20/2022	Community Engagement and Capacity Building
Highlights from Multilingual Partners Meetings: appreciated being able to see process from planning to execution and being involved in shaping the process and identify what other groups need to be part of addressing issues	Multilingual Partners Meeting	10/20/2022	Community Engagement and Capacity Building
Highlights from Multilingual Partners Meetings: Appreciated how the City was intentional about creating a community-led process through engagement, RPT, Aces, etc. and how this demonstrated that the City cares about people; proud of the work that has been accomplished; appreciated being part of supermarket pop-ups to do outreach beyond just the SBP, was able to connect with a variety of different people; hopes the City continues this community-led process; felt that the group was very strong because of the diversity of the group	Multilingual Partners Meeting	10/20/2022	Community Engagement and Capacity Building
Highlights from Multilingual Partners Meetings: Hearing different perspectives from such a diverse group, learn more about similar and different challenges that other groups are facing, learning more about what the City is doing to address issues; appreciated that translations for other languages were provided; Mexican Consulate has strong interest in supporting the Stockton Blvd Plan, particularly around engaging businesses associated with the Hispanic Chamber; build relationships and connections across different communities and groups	Multilingual Partners Meeting	10/20/2022	Community Engagement and Capacity Building
Highlights from Multilingual Partners Meetings: highlight was relationship building with the other community ambassadors; feels really good knowing there are other passionate people working in the community; appreciated space and encouragement around being creative and pitching ideas and the follow up on ideas people shared	Multilingual Partners Meeting	10/20/2022	Community Engagement and Capacity Building
Interested in the idea of creating subcommittees based on topic areas (safety, beautification, transportation, businesses). Would like to have bimonthly or quarterly meetings with community to report on implementation progress to build trust and transparency; partner with other groups who specialize in supporting sex workers	Multilingual Partners Meeting	10/20/2022	Community Engagement and Capacity Building
Want to continue to have a space to problem solve as a group and appreciate transparency from city about where feedback can go if it's not covered under SBP's scope	Multilingual Partners Meeting	10/20/2022	Community Engagement and Capacity Building
What is the role of the city to uplift the community's stories? What is the role the city can play in terms of small businesses?	Multilingual Partners Meeting	10/20/2022	Community Engagement and Capacity Building

Comments	Source	Date	Topic
Willing and interested to continue supporting small business engagement. Second other partner's idea around forming topic-based subcommittees and hold listening sessions with community members to ask for their ideas and solutions on key topic areas	Multilingual Partners Meeting	10/20/2022	Community Engagement and Capacity Building
I have reviewed the final draft plan as proposed by the City of Sacramento for the Stockton Blvd corridor. North of Broadway, it appears to be a welcomed improvement. I question why the same plan cannot be implemented south of Broadway. Your proposal for only two lanes of traffic in either direction between Broadway and 21st Avenue is going to create a bottleneck that will only exacerbate the current heavy congestion problem in this area, particularly during commute hours . Many residents in Colonial Heights area use this route for work, exiting San Francisco Blvd onto Stockton Blvd. Trying to turn right onto Stockton is difficult. Making a left turn is even more difficult. I can only imagine how much more difficult this will be with your new plan to have ONLY ONE LANE OF TRAFFIC available to commuters on Stockton Blvd in each direction, making it even more FRUSTRATING THAN IT IS NOW. To reiterate, I am wondering why the same plan as is proposed on the north side of Broadway cannot be implemented here as well. Your proposed plan will create a slower flow of traffic causing an added frustration to commuters south of Broadway. PLEASE RECONSIDER THIS PROPOSED PLAN to have ONLY TWO LANES for traffic, and to consider implementing the plan as indicated for the area north of Broadway.	Email	10/26/2022	Mobility and Transportation
A major challenge for people seeking housing and anti-displacement support is a lack of a centralized group/website/resource center etc. where people can find all of the different services and resources in one place.	Engagement Team Fall 2022 Outreach Summary	12/15/2022	Community Engagement and Capacity Building
Many people originally came to Stockton Blvd because of the lower cost of living relative to the rest of Sacramento; however, the area has been getting more expensive (see “Housing and Anti-Displacement” themes below)	Engagement Team Fall 2022 Outreach Summary	12/15/2022	Culture, Arts, and Community Character
Many people have deep roots in Stockton Blvd and have been living in the area for decades, raised their children in the area, etc.	Engagement Team Fall 2022 Outreach Summary	12/15/2022	Culture, Arts, and Community Character
Residents living in the are have immigrated from all over the world, including Latin America, Caribbean, Middle East, and Asia	Engagement Team Fall 2022 Outreach Summary	12/15/2022	Culture, Arts, and Community Character
Large first or second generation population of residents. Families that moved here felt that they could build generational opportunities.	Engagement Team Fall 2022 Outreach Summary	12/15/2022	Culture, Arts, and Community Character
The recurring theme in discussion was a preference for the area based on the cultural significance of the surrounding neighborhoods and businesses.	Engagement Team Fall 2022 Outreach Summary	12/15/2022	Culture, Arts, and Community Character
Little Saigon is a paragon for residents of the type of cultural identification, preservation and celebration that would like to continue to see supported.	Engagement Team Fall 2022 Outreach Summary	12/15/2022	Culture, Arts, and Community Character
Little Saigon came up (for obvious reasons) amongst most of the participants. Participants really liked the special designation of Little Saigon and wanted to see more visual representation to highlight the area, such as banners along the corridor, events like a night market and an arch over the blvd to welcome people to the area.	Engagement Team Fall 2022 Outreach Summary	12/15/2022	Culture, Arts, and Community Character
Participants have been waiting to see the Little Saigon Plaza turned into something advantageous for the community. The fact that it has remained vacant for so long is a sore point for residents.	Engagement Team Fall 2022 Outreach Summary	12/15/2022	Culture, Arts, and Community Character
Safety concerns came up as the number one issue for residents. It’s top of mind and expansive in the types of safety concerns they had.	Engagement Team Fall 2022 Outreach Summary	12/15/2022	Environment, Public Health, and Safety
Homelessness was also a large issue but folks were quick to suggest services instead of just sweeps. There was some cross-over in responses between safety and homelessness.	Engagement Team Fall 2022 Outreach Summary	12/15/2022	Environment, Public Health, and Safety
Prostitution was an issue that folks were concerned about that they wanted to see addressed with more services and enforcement. A lot of people didn’t understand why it was permitted or who was responsible for addressing it.	Engagement Team Fall 2022 Outreach Summary	12/15/2022	Environment, Public Health, and Safety
Neighborhood beautification and updates, urban greening, and vacant lot development came up for residents.	Engagement Team Fall 2022 Outreach Summary	12/15/2022	Environment, Public Health, and Safety
Cost of living has been rising dramatically in recent years, making it difficult for people to meet their basic needs	Engagement Team Fall 2022 Outreach Summary	12/15/2022	Housing
Living in the Stockton Blvd area has become more and more expensive, especially for those who moved to the area originally to experience a lower cost of living	Engagement Team Fall 2022 Outreach Summary	12/15/2022	Housing
The two most frequent themes that came up at La Superior were rental assistance and solutions for supporting unhoused members of the community.	Engagement Team Fall 2022 Outreach Summary	12/15/2022	Housing

Comments	Source	Date	Topic
Stockton Blvd has changed a lot over the years – there used to be a lot less businesses and a lot more vacant lots but more development has been coming to the area, which has brought more people to the area	Engagement Team Fall 2022 Outreach Summary	12/15/2022	Inclusive Economic Development
The shopping centers on the southern end of the corridor are a hub for community activity. The concentration of restaurants is a huge draw and they still want to see more, including various AAPI restaurants like Cambodian and Laotian. The grocery stores in particular are also a tremendous value because of the variety in the AAPI specialties.	Engagement Team Fall 2022 Outreach Summary	12/15/2022	Inclusive Economic Development
Participants want to see more support for local businesses, both in terms of sustainability and in expanding the demographics of patrons to become more of a destination.	Engagement Team Fall 2022 Outreach Summary	12/15/2022	Inclusive Economic Development
The La Superior store director shared that they have been sustaining their business independently – they have felt disconnected from the City and Stockton Blvd Partnership	Engagement Team Fall 2022 Outreach Summary	12/15/2022	Inclusive Economic Development
Cultural preservation, job growth, adult education/training, childcare, and more health centers rounded out the rest of the community's suggestions on areas to address displacement of small business/residents in the community.	Engagement Team Fall 2022 Outreach Summary	12/15/2022	Inclusive Economic Development
Mobility was another topic that came up with various areas of concern, such as shuttle service for the elderly, traffic improvements, more lighting, and more efforts to improve the ability of residents to walk around in their community. Some residents also said that they tended to shop or explore only areas near transit stops.	Engagement Team Fall 2022 Outreach Summary	12/15/2022	Mobility and Transportation
